

How to add your logo to MediaSpace

 This article is designated for administrators.

Are you setting up your site identity? Here's how to add a logo to your site's header:

1. Login to the Kaltura MediaSpace Admin Console.
2. On the Configuration Management page, select the [Header](#) module.

3. Paste your image URL in the **logoImageUrl** field **or** upload your logo image in to the **logoImageUpload** field.

A screenshot of the Kaltura Configuration Management page showing the configuration for the logo. There are two sections. The first section has a label 'logoImageUrl' and an empty text input field. The second section has a label 'logoImageUpload' and a text input field containing the URL 'https://cfvod.kaltura.com/p/483401'. Below the URL field are two buttons: 'Upload Logo' and 'Remove'.

4. Make the following configurations in the **logoLink** field:
 - If you don't want the logo to be clickable, type *false*.
 - If you want to display the home page when the user clicks on the logo (the same page that is displayed when MediaSpace opens), type *home*.
 - If you'd like to open a different page in a new browser window/tab when the

user clicks on the logo, type the full URL (starting with http://).

logoLink

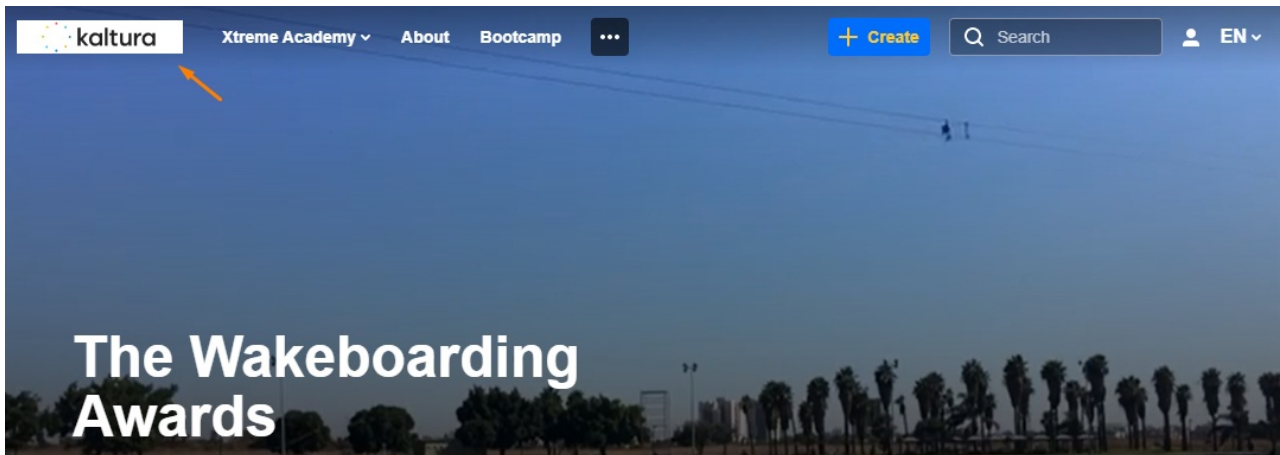

home

The options for defining the behavior when a user clicks the logo are:

1. Enter 'false' if you do not want the logo to be clickable;
2. Enter 'home' to display the home page (displayed when MediaSpace opens);
3. Enter a full URL (starting with http://) to open a different page in a new browser window/tab.

5. Click **Save**.

6. Go to your MediaSpace site. The new logo is displayed in the header (you might need to refresh the page).

⚠ For the supported logo image formats refer to [The Kaltura Thumbnail API](#).
