

Kaltura Capture - Prerequisites and system requirements

 This article is designated for all users.

To set up Kaltura Capture you'll need the following:

1. A Kaltura account.
2. A Kaltura MediaSpace instance or Kaltura Application Framework (KAF) instance.

For end users installing Kaltura Capture, the following lists the minimum hardware and software requirements for Kaltura Capture. For additional information on system requirements, please consult with your Kaltura representative.

HW/SW	Requirement
Operating System	OS: Windows 10 (64bit) and above macOS 10.14 (Mojave) - 11 (Big Sur)
Memory	4GB RAM
Storage	1GB min available
Processor	Intel i5 or later (min 4 cores) or AMD A10 or Apple M1
Encoding	Intel Quick Sync
Screen Resolution	Minimal supported screen resolution is 1024 X 768 (100% scale)
Browser	For launching the application through KMS/KAF, see KMS/KAF - Supported Browsers / Devices

 When using iOS, you are required to enable the Kaltura Capture security settings. Please visit our article [How to](#)

Enable [Privacy Settings](#) to learn more.

! Currently, Kaltura Capture is not supported on mobile or tablet.
