

# Languages

Last Modified on 11/28/2021 10:32 pm IST

Field	Description
DownloadLocaleText	Download a Zip file with all texts for all languages for this instance. These resources can be used to create or update custom languages.
UploadCustomLanguage	Upload new custom language
languageAdminName	Insert the name of the language to be presented in the language drop-down list for the admin, in the Application section, languageSelection, and language fields.
languageClientName	Insert the name of the language to be presented in the language drop-down list for the users.
languageCode	For KAF use - formal language code to be used to sync the instance language to the hosting application (LMS, CMS, SBS) chosen language.
localeFile	Upload your customize <u>.MO file</u> . in order to convert your customize <u>.PO file</u> to .MO file you can use some available tools in the web
localeIcon	Upload custom language flag icon. In order to be presented to KMS end-users in the drop-down list, in case this language will be selected for presentation. Icon should be in "*.jpg;*.jpeg;*.bmp;*.png;*.gif;*.tif;*.tiff;*.ico" format and dimensions should be 30px X 26px (the application will resize any given image, however for best visual result use these dimensions). You can also choose from this library of icons: <a href="http://freebiesbug.com/psd-freebies/100-flat-flag-psd-icons/">http://freebiesbug.com/psd-freebies/100-flat-flag-psd-icons/</a>
languageId	Unique language id for application usage.
LanguageException	Add a language exception, to change any string in the app. It is recommended to download the English PO to retrieve all the relevant text in the form of 'msgid'.

Language	Choose the language you would like to apply this change to.
Field msgid	Description Indicate what is the text you would like to change. You should copy the exact msgid from the <u>PO file</u> .
Exception	Enter the new text to replace the existing one.
importAndExportExceptions	Import and export language exceptions for this site. The file format is CSV, with no header line, with 3 columns, for the selected language (short name, e.g.: "en"), the msgid and the Exception.
Export	Download the list of all language exceptions.
Import	Upload a list of all language exceptions. <b>This action will override all the existing exceptions!!</b>
CustomToken	Configure custom tokens for your application. Tokens can then be used in configuration fields of type text in other modules, and will be replaced by the value filled up.  The following System Tokens are saved and cannot be used as custom token IDs: {FIRSTNAME} {LASTNAME} {TITLE} {COMPANY} {COUNTRY} {EMAIL} {URL}
TokenID	Enter an ID in the form of alphanumeric characters only. Once entered, you will be able to use this ID in the form of {Your_Token_ID} in other modules.
LocalizedToken	One token can be translated to many languages. If no translation is needed for the token - use only one localized token.
Language	The language code this value will be used for the token.
TokenValue	Enter a value to replace the token in other modules where this token is used.
