YouTube

Public YouTube video content and metadata can be added to MediaSpace and KAF applications.

> ⚠ YouTube content can be played on the Kaltura V2 player from version 2.13 and above. To update the player version, refer to How to Update the Kaltura Player to the Latest Version

Because the video itself still 'resides' on YouTube, a YouTube entry is treated differently in some ways from a native Kaltura entry.

- What is supported?
    - Basic and custom metadata
    - Sunrise/sunset (scheduled publishing)
    - Commenting
    - Collaboration (changing owner, adding co-editor and co-publisher)
    - Attachments
    - *Uploading a caption file to Kaltura entry / Requesting captions via REACHv2*
    - Replace Video (with new YouTube URL)
    - Playback analytics
    - Video Quiz

- What is not supported?
    - Kaltura REACH auto-captioning
    - Change Thumbnail
    - Enable download
    - *Viewer's ability to enable/disable YouTube captions (these are the captions associated with the YouTube video)*
    - Timeline (Chapters and slides)
    - Trim/Clip
    - Playback rate selector

Field	Description
enabled	Enable the Youtube module

previewPlayer Field	The player uiconf to use for the YouTube entry preview Description when adding a new entry. Leave blank to use the default MediaSpace player.
replaceYouTubeEntryMessage	The message to display when replacing a YouTube entry.

⚠️   It is best practice to check current availability of a video ingested to Kaltura but hosted on YouTube. A spinning wheel displays for KMS users if the YouTube video has been erased or unpublished from the YouTube platform.
