

Install Kaltura Capture

 This article is designated for all users.

About

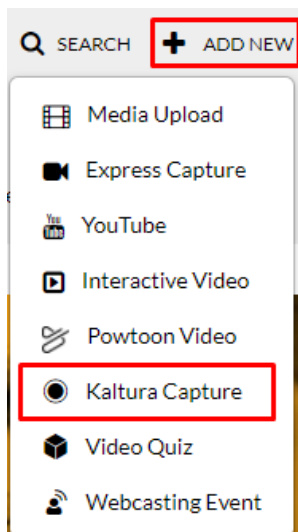

This article provides steps to download and install Kaltura Capture for both Windows and Mac OSs.

Getting Started

1. Log into your KMS or KAF application.
2. Depending on whether V2UI/theming modules are enabled, follow these steps:

If V2UI is enabled,

- Click **Kaltura Capture** from the **Add New** menu.

- You are redirected to a download page.

The Kaltura Capture Desktop Recorder

If you've already installed Kaltura Capture, it will launch automatically.

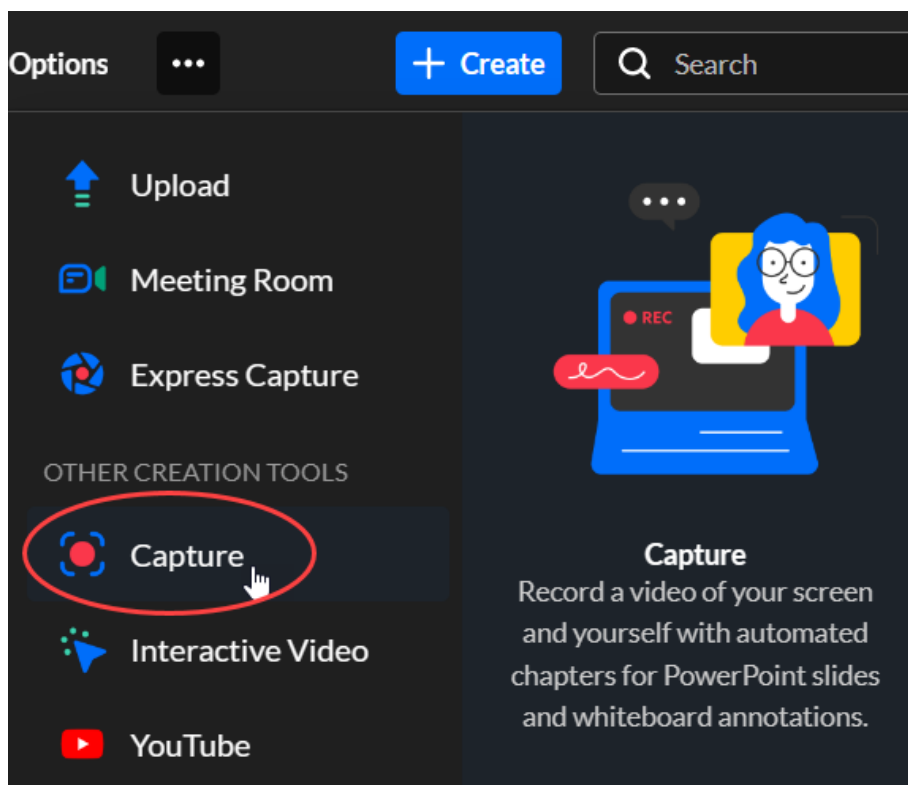

Using Kaltura Capture for the first time?

[Download for Windows](#) | [Download for Mac](#)

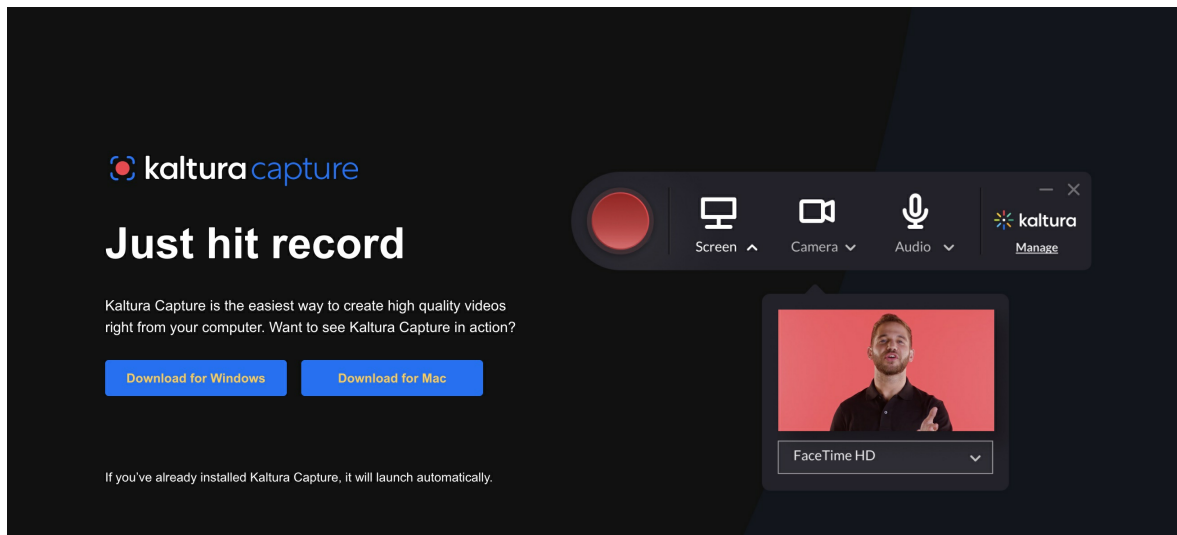

Learn more: See the [Kaltura Capture - User Manual](#) for additional information on supported systems and usage instructions.

If **Theming** is enabled,

- Click **Capture** from the **+Create** menu.

- You are redirected to a download page.

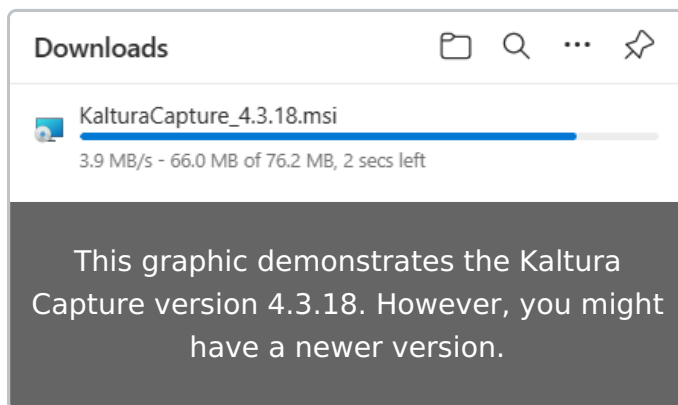

3. If installing the Kaltura Capture software for Windows, go to [Download for Windows](#). If installing the Kaltura Capture software for Mac OS, go to [Download for Mac OS](#).

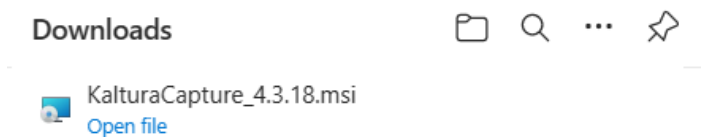

Download for Windows

- a. On the download page, click **Download for Windows**.

A progress bar displays:

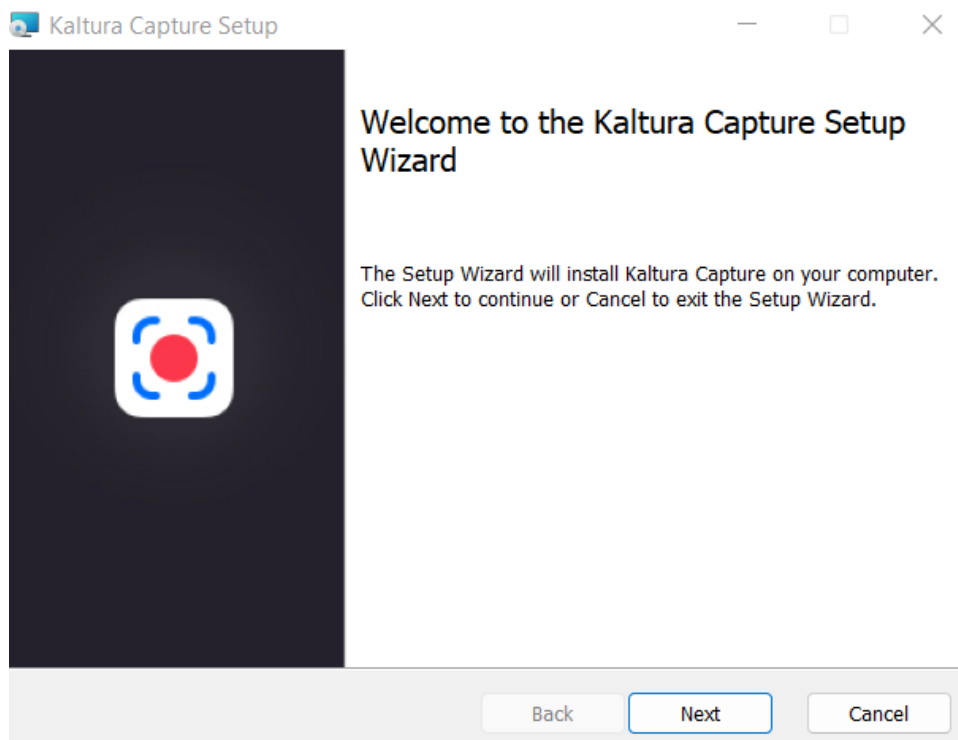

- b. When the download is completed, you will see:

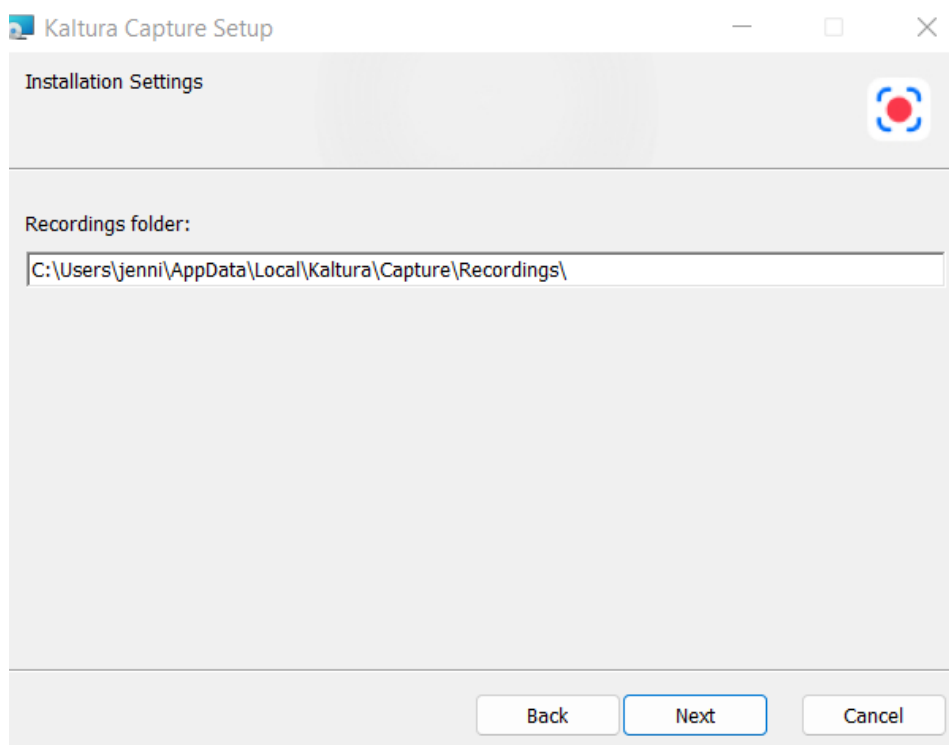

- c. Click **Open File**.

The *Welcome to the Kaltura Capture Setup Wizard* screen displays:

d. Click **Next**.

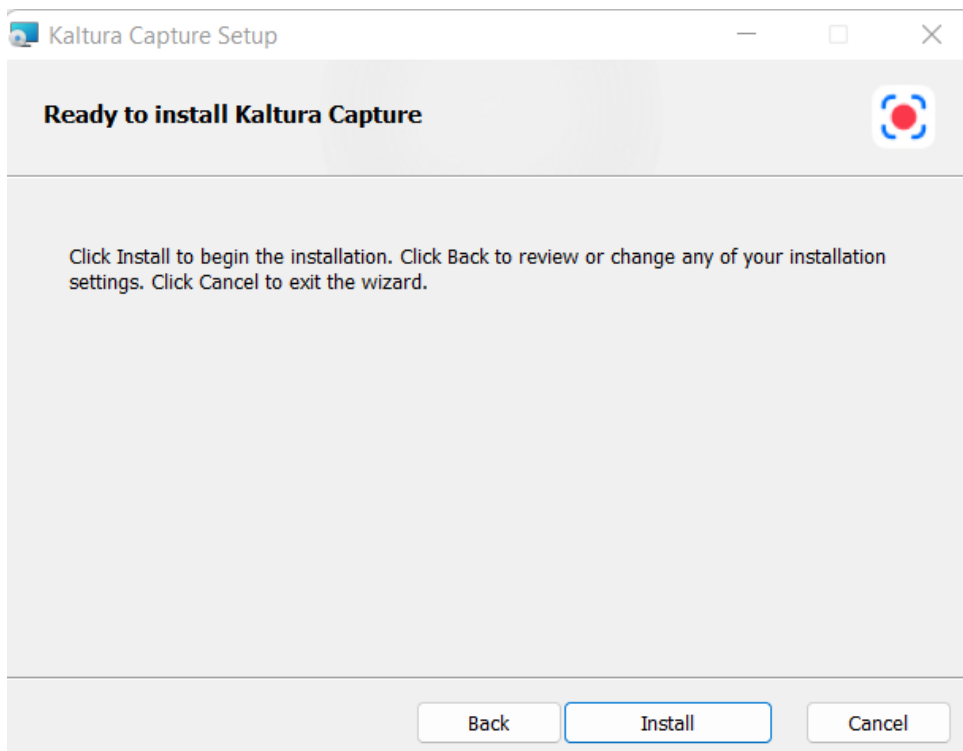

The *Installation Settings* screen displays:

(Optional: If you want to change the location of your stored recordings, type the new location in the *Recordings Folder* field.)

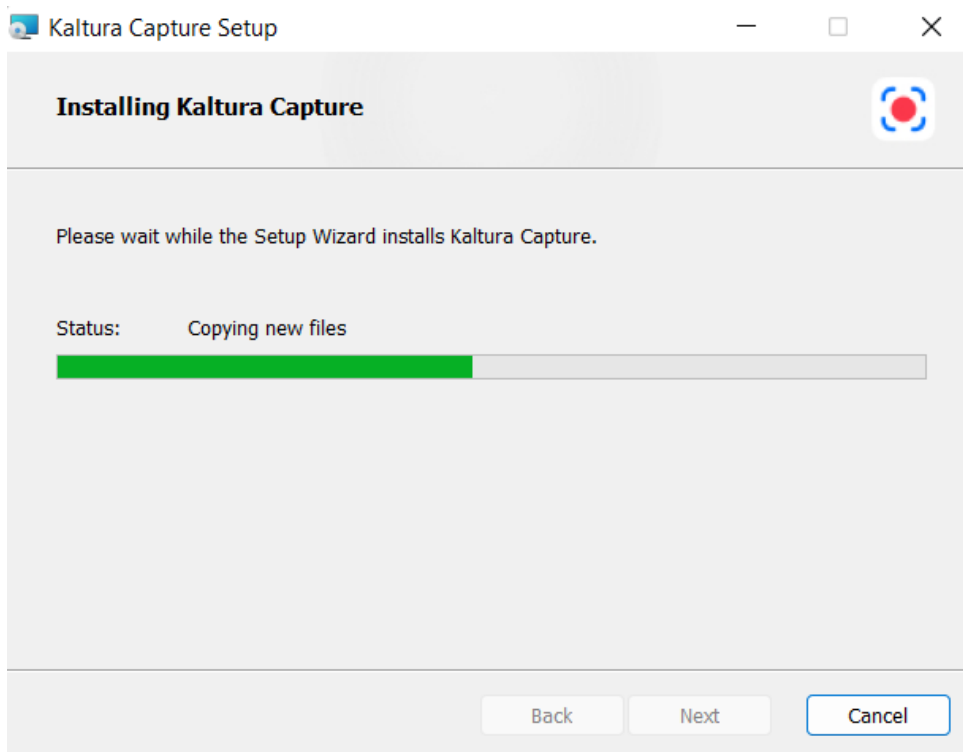

e. Click **Next**.

The *Ready to install Kaltura Capture* screen displays:

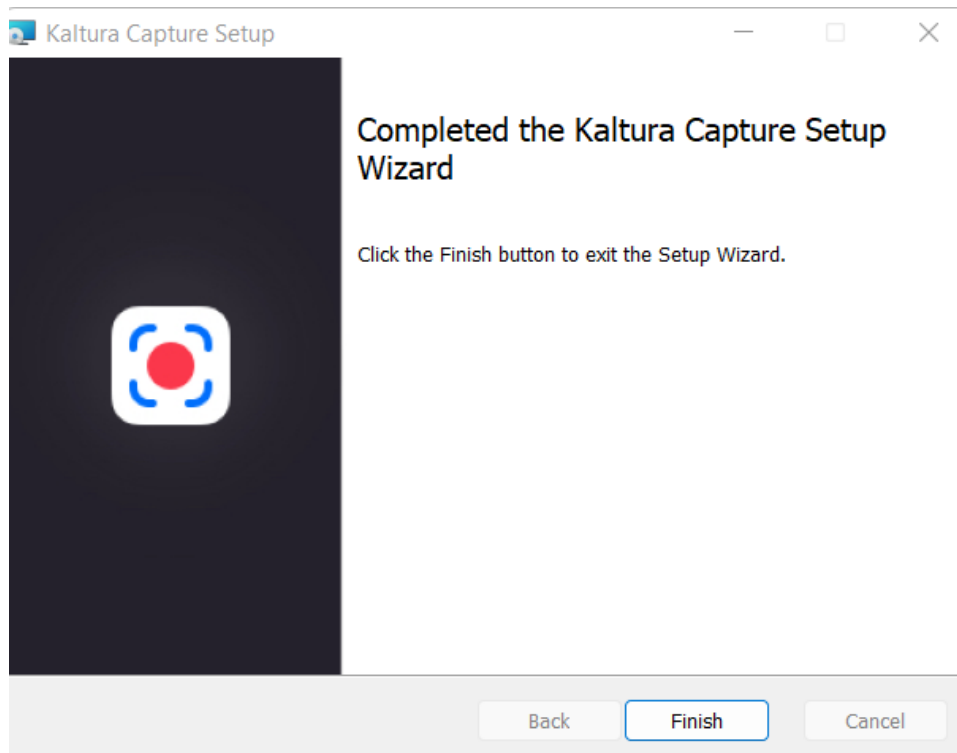

- f. Click **Install** to begin the installation.

A progress bar displays:

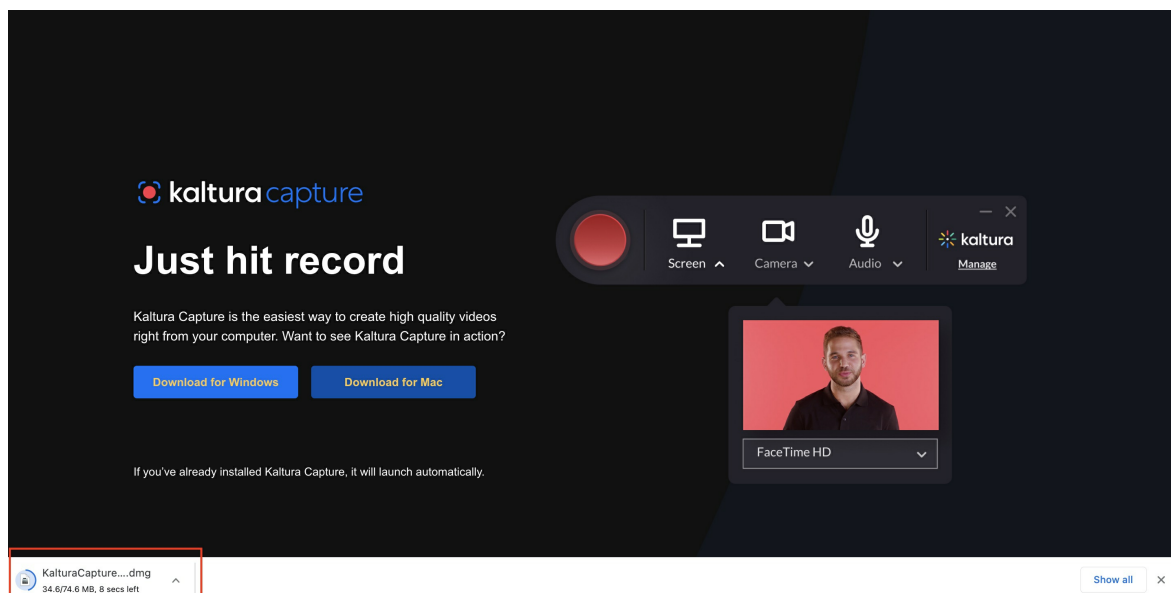

- g. When the installation is completed, you will see this screen:

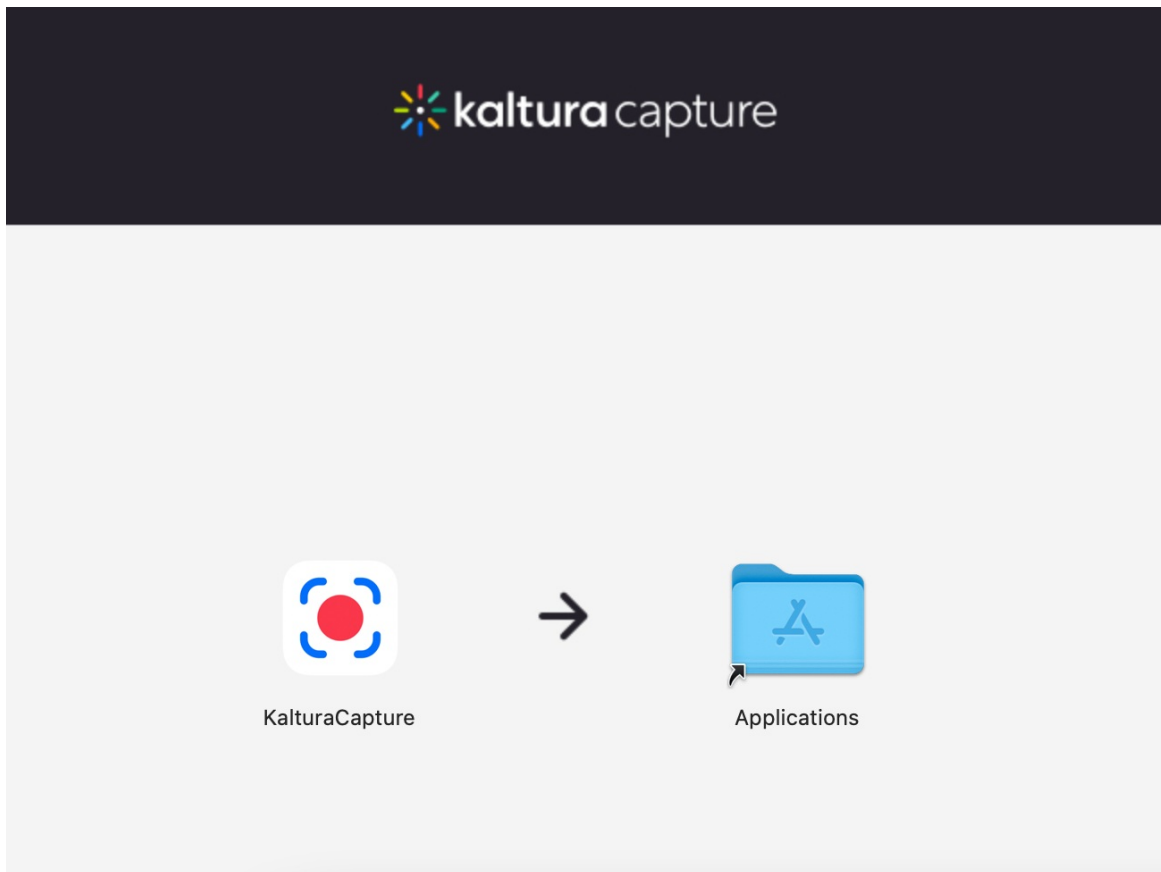

h. Click **Finish**.

Download for Mac OS

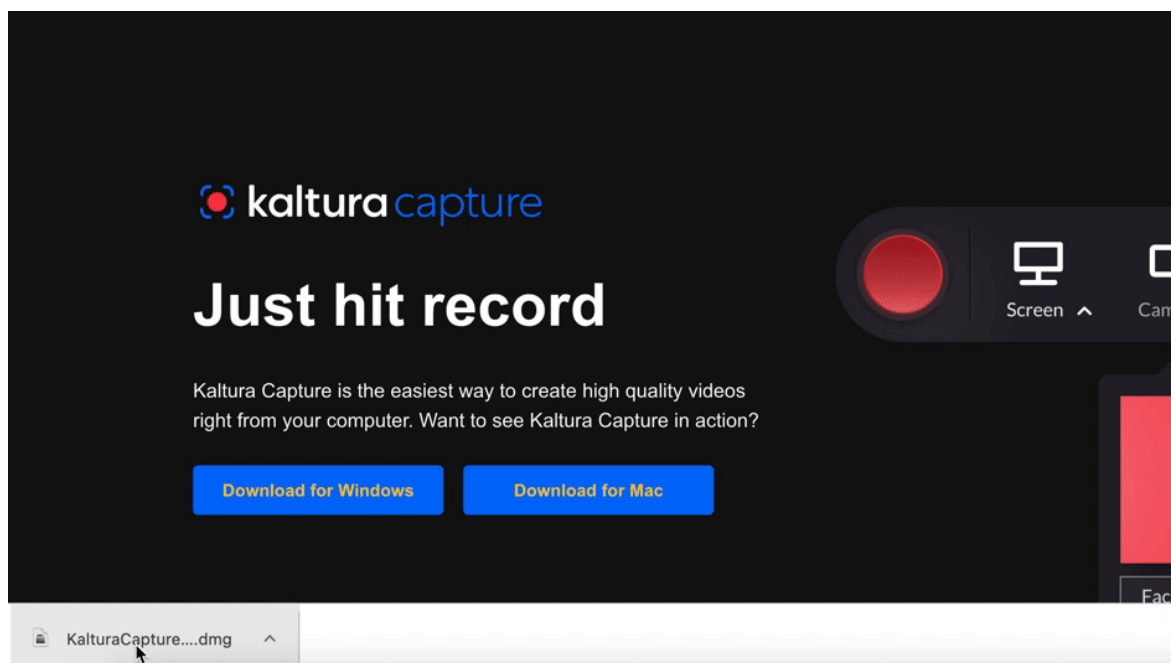

1. On the download page, click **Download for Mac**.
.dmg file will download.

2. After the .dmg file downloads, double-click the file to open it.
The following window displays:

3. In that window, click and drag the Kaltura Capture application icon to the Applications folder icon.

4. Enable Mac OS for the Kaltura Capture application to record your screen, camera, and audio. To learn more, see [How to Enable Privacy Settings for Kaltura Capture on Mac](#)

Ready? Let's start to record!

To learn how to start recording, see [Create a recording](#).
