

Export Logs from the Webcasting Producer Application

Last Modified on 02/11/2021 2:47 am IST

The Webcasting producer application stores the application logs. The logs may be found by clicking on **control + option + d** (Mac) or **ctr + alt + d** (Windows). An icon is then displayed at the top of the producer app

Click on it to open the application debug panel.

App Ver: 4.1.315
