

Manage Chapters and Slides

Last Modified on 01/24/2022 12:53 pm IST

This article describes how to manage chapters and slides in Kaltura MediaSpace and KAF applications.

Chapters are like bookmarks in the video and can be used to navigate through the video. You can use chapters to mark the beginning of a new topic, highlight important segments, or help navigate through the content of a long video. You can add, edit, and delete chapters and slides in the Timeline Tab. Contact your administrator to enable this feature.

A Slide is a synchronized visual element to the main media.

After chapters and slides are created, the player is displayed with a matching plugin that presents the chapters and slides view on it.

A viewer only sees the extended player and does not see the timeline for editing. A viewer can navigate between chapters and slides inside the player view, as well as search on its text. For more displaying options see [Viewing Rich Media in the Kaltura Player](https://knowledge.kaltura.com/help/viewing-rich-media-in-the-kaltura-player) (<https://knowledge.kaltura.com/help/viewing-rich-media-in-the-kaltura-player>).

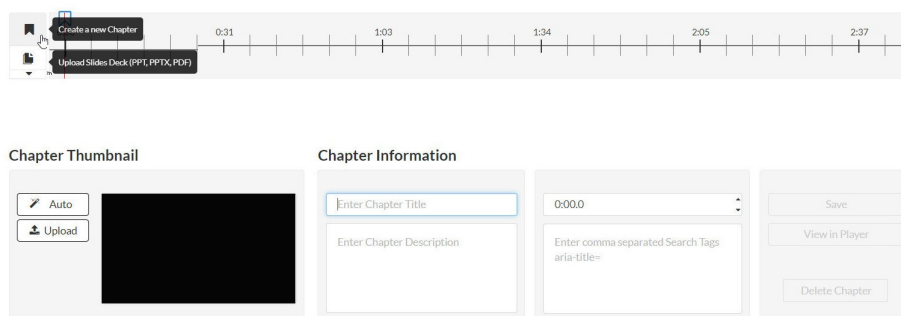

NOTE: In KMS and KAF instances that are set with remote storage configuration, slides on entries are stored and played from the remote storage.
