

3D Object Entry - Generate App Token

The Brand3D Creator tool must be added to each MediaSpace instance by the Brand3D team. To facilitate this, you must provide the Brand3D team with:

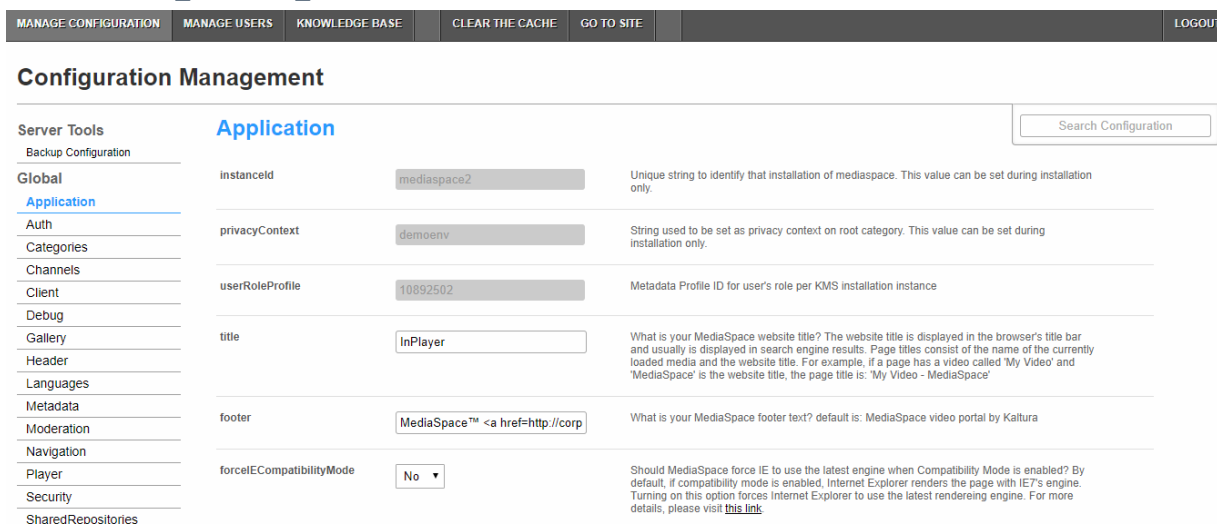

- The partner ID (Kaltura account ID)
- User email address
- App Token ID and App Token generated from the Brand3d module

Find your partner ID in the KMC under Settings > Integration.

Use the following instructions to generate the App Token ID and App Token.

1. Login to your MediaSpace Configuration Management admin site at:

[https://\[your_partner_id\].mediaspace.kaltura.com/admin](https://[your_partner_id].mediaspace.kaltura.com/admin)

Item	Value	Description
instanceId	mediaspace2	Unique string to identify that installation of mediaspace. This value can be set during installation only.
privacyContext	demoenv	String used to be set as privacy context on root category. This value can be set during installation only.
userRoleProfile	10892502	Metadata Profile ID for user's role per KMS installation instance
title	InPlayer	What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called 'My Video' and 'MediaSpace' is the website title, the page title is: 'My Video - MediaSpace'
footer	MediaSpace™ <a href=http://corp	What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura
forceIECompatibilityMode	No	Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE7's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit this link .

2. In the list of configurable items on the left of your screen, locate and click on **Brand3d**.

Brand3d

Module Info

description
This module adds an overlaid 3D model viewer to the Kaltura player, powered by Brand3D.

version
1.3.1

enabled
Yes
Enable the Brand3d module.

endpoint
URL to Brand3D configurator domain, no trailing slash.

authEndpoint
URL to Brand3D's auth service

email
MANDATORY: Brand3D account email. You can fill in this field but you must also provide the value to Brand3D team for auth to work.

password
MANDATORY: Brand3D account password. Provided by Brand3D team after you send your partner id, the app token id and hash below, and the email above.

allowedRoles
privateOnly Role
Who can create a 3D Overlays? If a role is selected, any role above it will also be able to create a 3D Overlays.

appToken

id
Id of auth app token. Must be provided to Brand3D team for auth to work.

hash
Hash of auth app token. Must be provided to Brand3D team for auth to work.

create
[Generate App Token](#)

Copy the id and hash values and provide them to the Brand3D team so your credentials are setup for the tool auth flow.
WARNING: Re-generating this token will make your Brand3D module unusable until you provide the new id and hash to the Brand3D team again.

embedAllowed

☐ Owner Only
☐ Co-Editor
☐ Co-Publisher
☐ Specific Users / Groups
☐ anonymousRole
☒ viewerRole
☒ privateOnlyRole
☒ adminRole
☒ unmoderatedAdminRole

Select one or more roles that can use the Embed module.

categoryLevelEmbed
No
Allow KMS category/channel (or KAF course gallery) managers to prevent grabbing and playing embed content from a specific category.

noCategoryEmbedAccessHTML
Grabbing of this content is possible
HTML text (may include links) to display inside the Embed tab of an entry page accessed not via a category/channel/gallery, when requireCategoryContext=Yes

autoRedirect
No
Select True to auto-redirect a user to the SSO login page if the user has not authenticated with MediaSpace. If a user has authenticated globally, they will be auto-authenticated by MediaSpace and redirected to the page with the video. Select False to display a message to the user to manually select when/whether to re-authenticate.

noCategoryPlayAccessHTML
Playback of this content is only all
HTML text (may include links) to display inside the iFrame, in case category-level embed grab and play are disabled for the category/gallery from where embed was originally grabbed, and/or when requireCategoryContext=Yes and a (legacy) secured embed is missing a category context.

notAuthenticatedHTML
Not authenticated
HTML text (may include links) to display inside the iFrame if autoRedirect is set to False

notAuthorizedHTML
You are not authorized to view this
HTML text (may include links) to display inside the iFrame in case Kaltura Entitlement authorization fails

autoRedirectMessageHTML
HTML text to display while the user is auto redirected to the login page

autoRedirectIframe
No
When autoRedirectIframe is disabled (default), the redirect for authentication will use the top browser window. When autoRedirectIframe is enabled, the redirect will occur in the iFrame

overrideCSSURL
URL to an alternate CSS, to allow a customer to customize the iFrame design to fit corporate style guide

Save

- In the appToken area, next to 'create', click **Generate App Token**. This action populates the id and hash fields.
- Click **Save**. A message displays confirming your configuration for Brand3d was saved.
- Click **OK**.
- Provide the Brand3D team with the information in the id and hash fields, along with your partner ID (Kaltura account ID) and user email address.

Once Brand3D receives your email, they will set up the account and email you a password.

⚠ After you provide the Brand3D team with the above information, if you ever click **Generate App Token** again (i.e. regenerating the token), your previous token will be overwritten and you must provide the new id and new hash to the Brand3D team.
