This article describes how to replace media entries.

You can replace media, and retain the entry's metadata, URL and analytics. The time-based metadata on the entry is kept in place, however it will likely be out of sync with the new media. The time-based metadata should be manually adjusted.

If the media is published in a moderated channel/category, media will be unpublished and moved to the pending moderation state. If the media is in an unmoderated channel/category, the media will still be published.

NOTE: Media will be unpublished from a moderated location (channel/gallery/category) and will remain published otherwise.

📰 To replace a media entry

- 1. Access the Edit Media Page (https://knowledge.kaltura.com/help/managing-media---editing-entries).
- 2. Click on the Replace Media or Replace Video tab. Replace Media screen displays.

Details	Options	Collaboration	Thumbnails	Presenters	Captions	Attachments	Live Stream Details	Timeline	Replace Media	Display
