

## KMS & KAF Release Notes - 2020 and older

**+** [Click here to see the list of release notes](#)

---

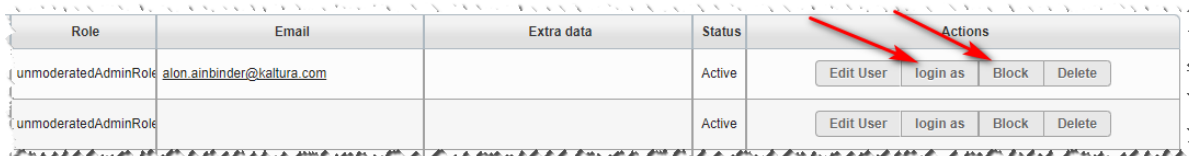

### KMS Version 5.103.03 - December 21, 2020

**Version: 5.103.03**

**Date Released: December 21, 2020**

#### What's New

- **Kaltura Meeting** – Site Admins are now able to select how Kaltura Meeting Rooms will be opened - in a new tab or in the same tab. If the new tab option was selected, Admins will be able to select the Site domain (kaltura.com option) or newrow.com domain. Read more in the [Enable Live Rooms](#) article.
- **KMS/KAF admin: Login As** – The Login As action in the Manage Users page of the admin page has been added to allow site admins to login as any specific user. This is a very important tool that allows for better and faster support and investigations, and is also very useful for the site admins when testing new features and preparation for new releases.  
Note that in KAF, this feature is not the same as using the LMS's impersonation tool inside a course, but instead it allows the admins to reach the My-media section for the users. See [User Management](#) for additional information. (KMS-21677)
- **KMS/KAF admin: Block User** – The Block user action in the Manage Users page of the admin page has been added that enables site admins to block any user, without deleting them from the site. See [User Management](#) for additional information. (KMS-21783)

Role	Email	Extra data	Status	Actions
unmoderatedAdminRole	<a href="mailto:alon.ainbinder@kaltura.com">alon.ainbinder@kaltura.com</a>		Active	<a href="#">Edit User</a> <a href="#">login as</a> <a href="#">Block</a> <a href="#">Delete</a>
unmoderatedAdminRole			Active	<a href="#">Edit User</a> <a href="#">login as</a> <a href="#">Block</a> <a href="#">Delete</a>

- **KMS Navigation**
  - **Label** – A new type of item is available, allowing the KMS admin to set a non-clickable navigation bar item, that can hold clickable sub-items. (KMS-22070)  
See the [Navigation](#) module for more information.

2
DELETE

type
Label
Select one of the options: Playlist, My Media, My Playlists, Link, Category, Entry Id, or Channel

name
Not Clickable
Enter the label for the menu item. The label is displayed in the main navigation bar.

items
Add items that would be displayed in a drop-down menu

1
DELETE

type
Link
Select one of the options: Playlist, My Media, My Playlists, Link, Category, Entry Id, or Channel

name
This is a Clickable item
Enter the label for the menu item. The label is displayed in the main navigation bar.

value
/channels
Enter the menu item's playlist ID or URL.

- **Group/Users restriction** – This feature allows KMS admins to set restrictions on any navigation bar item, showing the item only for permitted users. (KMS-21837) See the [Navigation](#) module for more information.

AllowedGroups
Select Groups
Select a group to show this item to, users not in the group will not see this link. Leave empty to show the item to all users.

## Resolved Issues

ID	Description	KMS.KAF Related
KMS-22793	Webcasting – The ability to view the webcast analytics before the recording is associated to the webcast entry was added	KMS/KAF
KMS-22820	Media scheduling metadata is now in sync with the Scheduling object (scheduling calendar).	KMS/KAF
KMS-21892	The ability to set an expiration for the Kaltura Capture AppToken has been added. The expiration time of the AppToken is configurable from within KMS Admin <a href="#">KalturaCapture</a> module.	KMS/KAF
KMS-21540	Several UI adjustments have been made to the Edit Entry page, namely elements spacing for the player and basic information components.	KMS/KAF
KMS-22632	Cross-Site Request Forgery (CSRF) vulnerability has been fixed in the playlist/create action to eliminate illegal requests to KMS to create a playlist.	KMS
SUP-24671	KMS admin – When selecting Manage Users > Edit a user > "Send by email" in the KMS Management Console, if the default email app is gmail, it now launches in a new tab.	KMS
SUP-24848	A member of a group that is an owner of an entry can now request captions.	KMS/KAF
SUP-22885	[BB] The 'Appears In' link on a single media page is no longer clickable, as expected.	KAF
SUP-23924	[D2L] Video Embeds no longer have a gap below the video on screens wider than 1024px.	KAF
SUP-24262	Publishing to a Media Gallery from My Media no longer requires the LTI Kaltura hand-shake with "Media Gallery.	KAF
SUP-21787	[D2L] The issue were embedding a playlist resulted in an error was fixed.	KAF
SUP-23113	The Channel Actions menu is now displayed properly.	KMS
KMS-21794	[SAML] The KMS SAML handling code has been fixed and is no longer vulnerable to XML Signature Wrapping (XSW) attacks.	KMS
SUP-22450	[SAML] The logout issue causing an error 500 on logout page related to nameID issue was fixed.	KMS
SUP-24868	The XSS vulnerability on playlist pages has been fixed.	KMS
SUP-25029	The issue in the <a href="#">Registration</a> module where users with different user Ids (lowercase/uppercase letters) was fixed.	KMS
SUP-24010	Start Meeting button is now working as expected when using the "Open in New Tab" feature.	KMS/KAF

## KMS Version 5.100.66 - November 16, 2020

**Version: 5.100.66**

**Date Released: November 16, 2020**

## Resolved Issues

ID	Description	KMS/KAF Related
SUP-23817	(Blackboard) An issue where using the <a href="#">Kaltura Media Mashup Tool</a> to embed media in Blackboard resulted in LTIMashupCreate being downloaded has been resolved.	KAF
SUP-22871	In the REACH Services Dashboard, when <a href="#">Filters</a> are expanded, all Source Languages display correctly in the scrolling menu.	KAF
SUP-23071	When searching for videos to add to a <a href="#">Channel Playlist</a> , if proper permissions are in place, the "No media items found" message no longer displays to users.	KMS/KAF
SUP-23522	(Canvas) The XML for the Canvas plugin setup now reflects the vanity domain that is used for the KAF, allowing the full setup of the vanity URL in Canvas using KAF with the same domain.	KMS
SUP-23396	The <a href="#">KAF Start Meeting button</a> is now correctly displayed on any screen resolution.	KAF

## KMS Version 5.100.64 - October 12, 2020

**Version: 5.100.64**

**Date Released: October 12, 2020**

## What's New

- **Language and Translations**

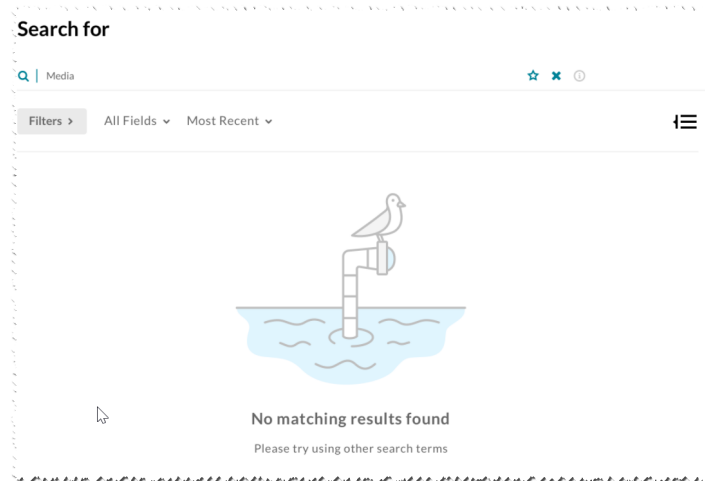

The "[Language Exception](#)" field was added to the [Languages module](#). Admins can now change specific language text/string to any other language directly in the module, without having to upload a new MO file.

Admins will need to download the English PO file, search for a specific msgid text, and fill in a new string for it in the module. (KMS-21675) See [Localization for KMS/KAF Administrators - How to Change Your Kaltura Application Language?](#) for more information.

- **KMS Admin** - Additional instructive text was added to the [Staticpages module](#)

providing additional information regarding supported directives and guidance on writing Static page code. (KMS-21705)

- **Design** - Improved design of "No Results Found" alert in the Search feature. See [KMS Search Functionality](#) for more information on Searches in KMS. (KMS-21343)

- **Galleries**
  - We added the ability to remove (via the "Delete Gallery" button in the Edit Gallery Page) and add galleries (via the "Add a Sub Gallery" menu item in the Edit drop down menu of an existing gallery). Deleting a Gallery will also delete any sub galleries of the deleted gallery, if they exist.
  - Changed the "Back to Category" button to "Back to Gallery".  
See [My Channels/Media Gallery](#) for more information on the Media Gallery. (KMS-21551)

- **Caliper** - more events

Added the following Caliper events to the player:

- AssessmentItemEvent
- MediaEvent
- NavigationEvent
- ViewEvent

See [Support for Caliper - How Caliper Works with Kaltura Extensions and KAF](#) for more information. (KMS-21336)

- **KMS GO** - A new feature was added to KMS Go allowing the Admin to select users for which recorded content will not be saved on their mobile device. The feature is configured in the [deleteRecordedContent](#) field of the [Kmsapi](#) module. (KMS-21425)

## Resolved Issues

ID	Description	KMS/KAF Related
KMS-21657	The Blackboard module now has the view file for the module header.phtml and renders the header correctly. This is to support the analytics of the Annoto module.	KAF
SUP-23396	[Meetings] The Start Meeting button on Media Gallery now displays correctly on small screens.	KAF
SUP-23641	XSS vulnerability related to pages containing tabs is now mitigated.	KMS/KAF
SUP-23678	[Meetings] The issue where a save on the channel edit page by user with no permissions to see the "Enable Live Room" checkbox disabled the feature is now resolved.	KMS
SUP-23309	[UI] Setting the "Buttons Color" in the Styling page now correctly applies to Home buttons.	KMS/KAF
SUP-23575	User can properly set publishing status for multiple entries that were uploaded at the same time. ID labels for form controls were corrected.	KMS/KAF
SUP-23313	Sorting the creation view "Created At" from ascending to descending now functions properly.	KMS/KAF
SUP-22943	Customer Favicon now displays correctly on channel tab.	KMS
SUP-23070	A programming code no longer displays on top of the BSE window.	KAF
SUP-23430	[Webcasts] "Manage Event" button now displays in Actions drop down menu for Webcast Moderators who are assigned via group and via individual user name.	KMS
SUP-23198	While filtering media for "My Channel", the interactive button "Add to Channel Playlist" now functions properly.	KMS
SUP-21840	[Accessibility] submit search icon now has alt text/attribute.	KMS
SUP-23105	Users can now re-open the search after closing it in KMS mobile view.	KMS

## KMS Version 5.100.29 - August 10, 2020

### Version: 5.100.29

**Date Released: August 10, 2020**

## What's New

- **Webcasts**
  - To improve creation flow, after [creating a webcast event](#) (after clicking the **Create Event** button), users are redirected to the [Edit Webcast page](#) where they can edit the event's settings. (KMS-19806)
  - Owners can now configure and display the SIP stream source in the [Kaltura Video Conference Integration \(VCI\)](#). (KMS-21051)
- **Maintenance** – Streamlining of admin pages
  - Some legacy fields were removed from the [Client module](#) in configuration management. (KMS-21615)
  - The Bootswatch module was removed from the applications, as the module was deprecated and has not been supported since 2018. (KMS-21528)
- **Analytics** – Using the playerIdv2 field in the [Userreports module](#), Admins can now select what player to show in the analytics page. (KMS-21198)
- **Edit Media Page** - Fields were added to the [Edit Media page](#) side bar. (PSVAMB-15540)
- **UI** - The channel page header and menu UI was adjusted. Buttons and styles related to Kaltura Meeting and Subscriptions are properly aligned. (KMS-21190)

## Resolved Issues

ID	Description	KMS/KAF Related
KMS-21649	[Analytics] <a href="#">Category Analytics</a> no longer displays the filter/search for Users and Entries in 'Category Performance Over Time' section in KMS/KAF.	KMS/KAF
SUP-22835	Users can now hover over the timeline and see the full chapter description. See <a href="#">Manage Chapters and Slides</a> .	KMS/KAF
SUP-21910	[UI] When using a tablet device and Related Media exists for the entry, the page layout is now correct for the Player and Details section.	KMS
SUP-22851	The <a href="#">Add New menu</a> is now displayed on smaller screens.	KMS/KAF
SUP-22926	Assignment Submission workflow no longer clones collaborators from original media.	KAF
KMS-21588	[Meetings] The size of the Join Meeting button in the Channels page was adjusted.	KMS

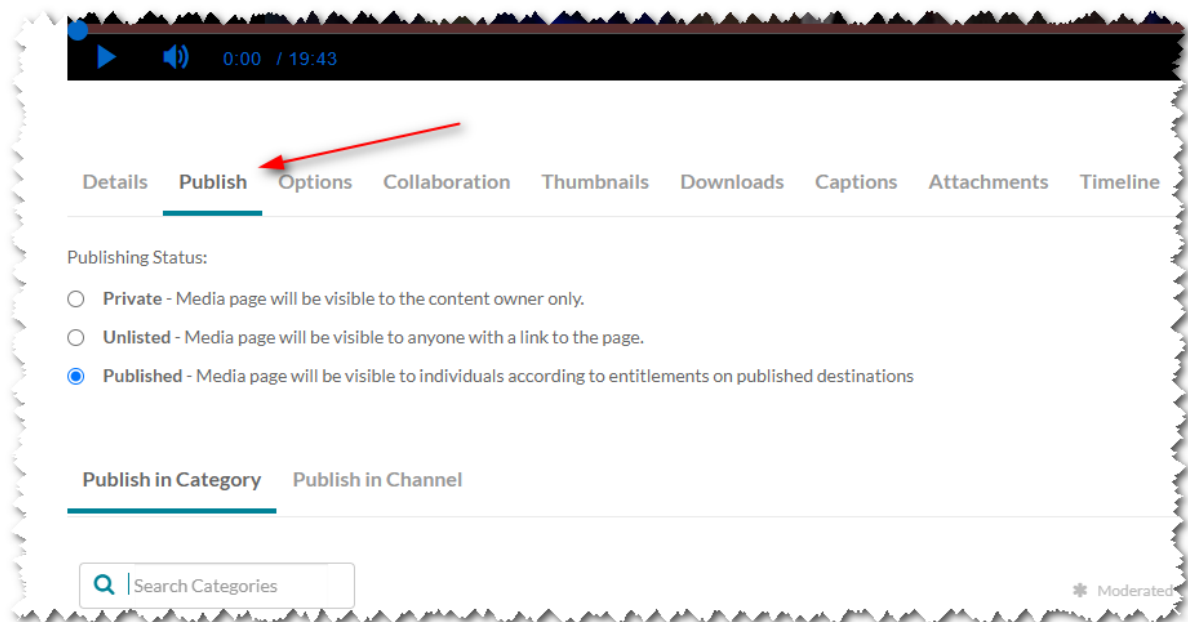

## KMS Version 5.100.10 - July 27, 2020

**Version: 5.100.10**

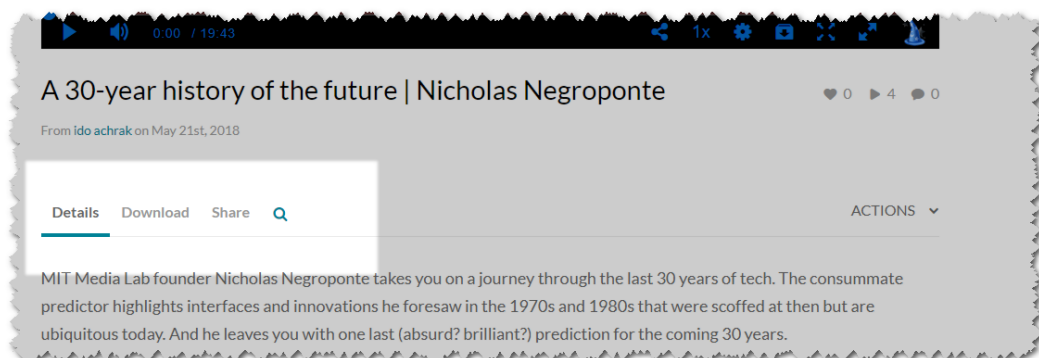

**Date Released: July 27, 2020**

### What's New

- **Publish Available in the Edit Media Page** – As part of a series of UI flow changes (some of which will be introduced in future releases), users may now publish media from the [Edit Media Page](#). (KMS-21376)

- **UI Enhancements:**
  - Updated tab displays in KMS and KAF. For instance, see the new tab display in the [Media Entry Page](#) below. (KMS-20842)

- Updated button sizes and fonts. (KMS-21370)
- Added a dark background to the Channel's header banner to make it more

visible. See [My Channels](#). (KMS-21538)

- Made small changes to the tab margin and spacing. (KMS-21520)

- **Video Path Analytics** – Path analytics are now available in KMS and KAF. (KMS-20737)

Videos Overview

9 Videos

#	^	Name	Plays	Unique Viewers
1		 Introduction <a href="#">📌</a>	126	7
2		 Entrepreneur	29	5
2		 Influencer	12	5
2		 Social Activist	9	3
2		 Graduate	8	3

- **EntryDesign Module in KAF** – The [EntryDesign module](#), which allows the styling of each entry separately, is now available in KAF. (KMS-21155)
- **xApi** – Kaltura Meeting event is now shown on the [xapi module](#) list. See [xAPI Analytics Guide](#). (KMS-21211)
- **Static Page Support for V7 player with KS** – Allows KMS admins to create a static page in KMS with automatically generated KS. (KMS-20765)
- **New Presenters Design** - New design for the live events presenters. (KMS-21232)

Details Share Attachments  ACTIONS ▾

The notion of "doing good is good for business" has quickly advanced to corporate-adage status. But does it stand up to scrutiny? The social-enterprise movement is maturing, and more and more commercial organizations are filling the gaps in social infrastructure and environmental protection. But is this progress, or have we simply let traditional business and government off the hook?

**Veronica Belmont**

SUP-22957	The issue with the Download tab caused due to cache was resolved.	KMS/KAF
KMS-21342	[Accessibility] Action items in the gallery/channel's collapsed view are now associated with video title to allow SR support.	KMS/KAF
KMS-21275	[Accessibility] The search icon is not a button, and is not tab-able.	KMS/KAF
KMS-21272	[Accessibility] The search 'Filters' button indicates status.	KMS/KAF
KMS-21274	[Accessibility] View selection is a list, and does not behave as a button.	KMS/KAF

## KMS Version 5.99.120 - July 21, 2020

**Version: 5.99.120**

**Date Released: July 21, 2020**

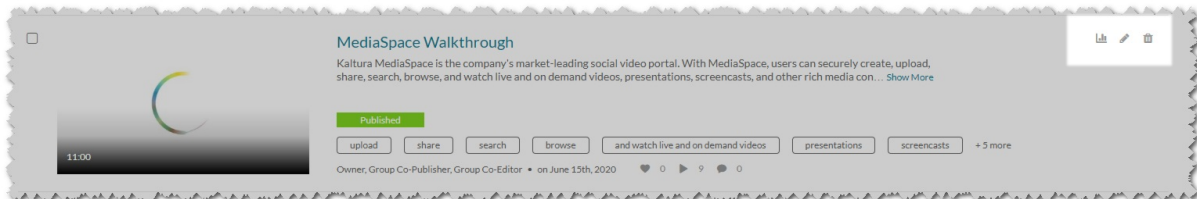

### Resolved Issues

ID	Description	KMS/KAF Related
SUP-22994	REACH - Alignment jobs are now getting processed (Verbit)	KMS/KAF
SUP-22598	Referrer added to secure embed codes	KMS

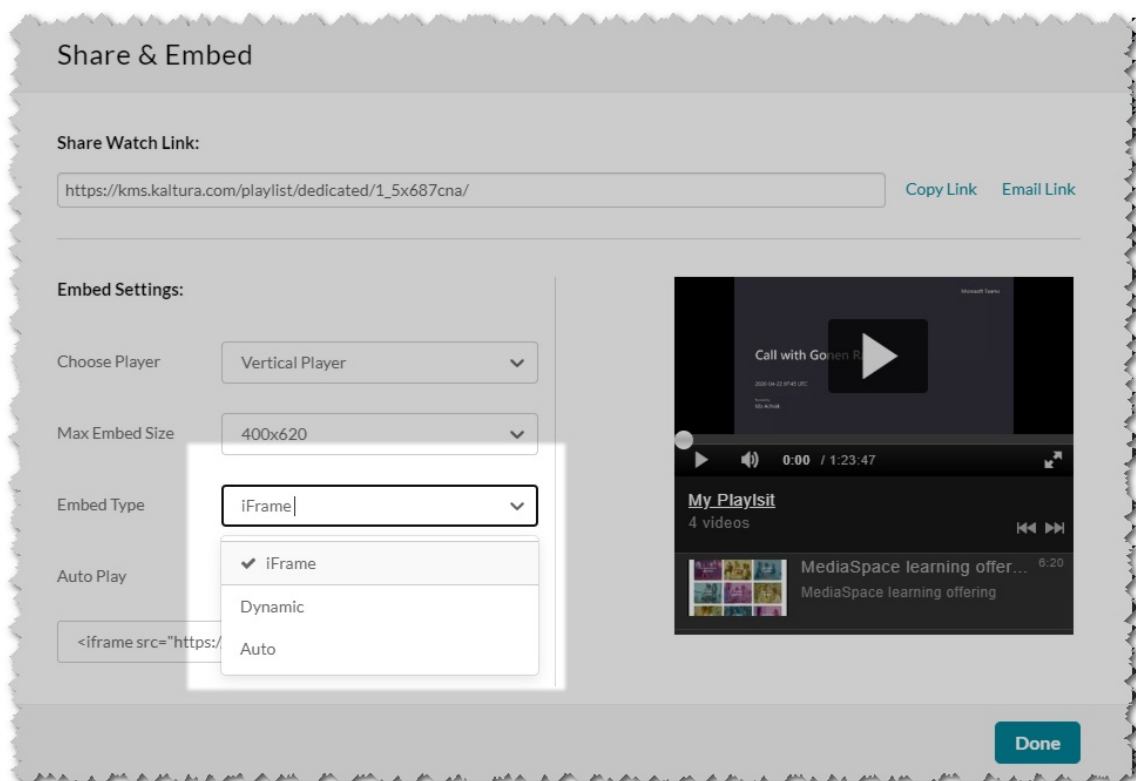

## KMS Version 5.99.116 - July 14, 2020

## What's New

- **My Media View Analytics Button** – A View Analytics button is now available next to each entry on the [My Media page](#), allowing users to reach the [Entry Level analytics dashboard](#) with one click. (KMS-20758)

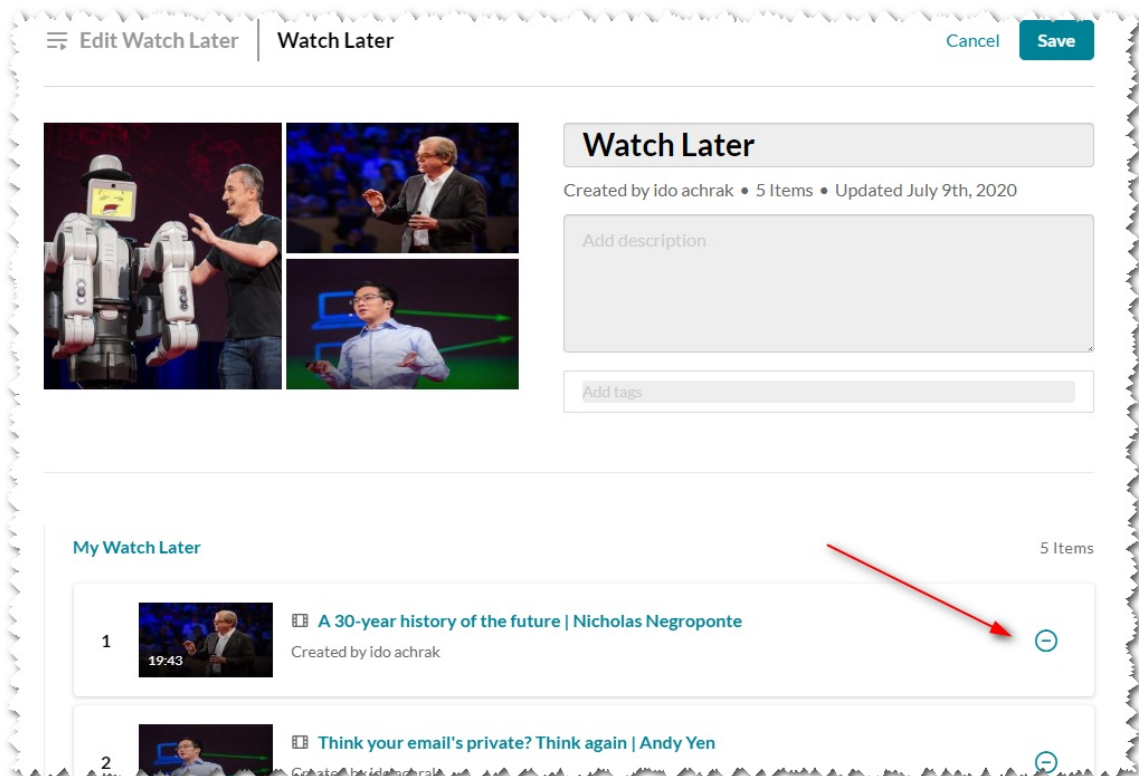

- **Caliper 1.2 Compliant** – Kaltura Application Framework (KAF) is now Caliper 1.2 compliant. (KMS-20472)  
See [IMS Global Learning Consortium](#) for more information.
- **Playlists**
  - Playlist Embed Type – The user may now choose the *type* of embed when embedding a playlist. See [Share and Embed Playlists](#). (KMS-19669)

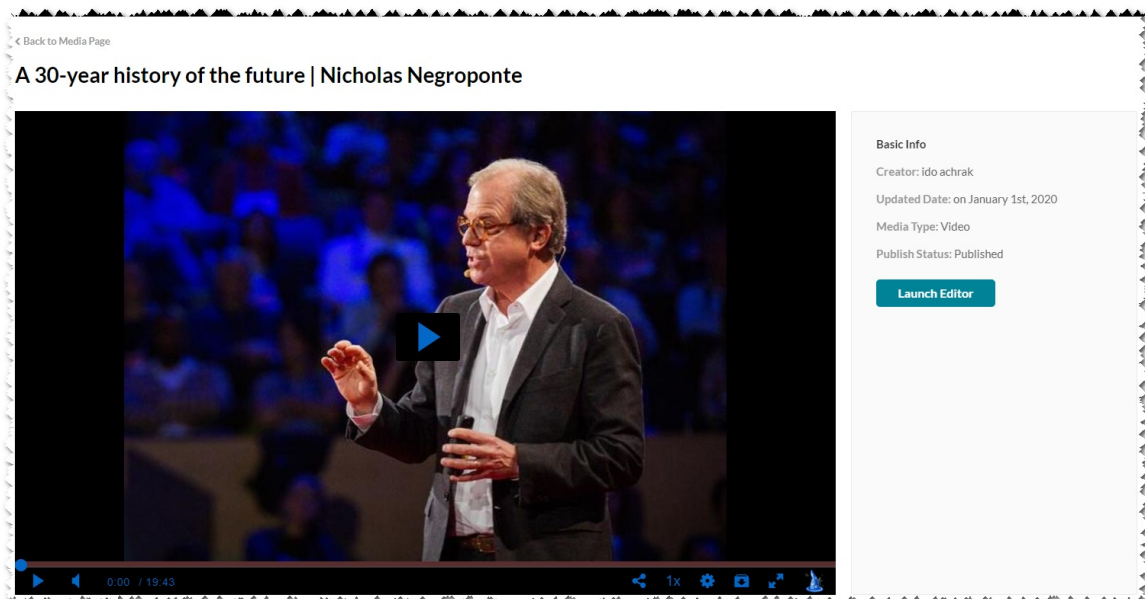

- Users can no longer modify the order of the "Watch Later" playlist via the Edit Watch Later window, but they can still remove media from the playlist by

clicking the Remove (minus) button to the right of the media. See [Edit Playlist Details](#). (KMS-21277)

- Edit Playlist page UI – The separation line between the "Add Items To Your Playlist" section and the "My Playlist" section was lengthened. (KMS-21318)
- Playlists are now supported in KAF's setup with context security. (KMS-21166)
- **UI Changes**
  - [Edit Media Page](#) – Structural changes were made to the upper portion of the page. Further changes to the remainder of the Edit Media page are planned for the near future. (KMS-20682)

- **Media Entry Page** - Small UI changes were made, such as font style and size and margin sizes. (KMS-20951)
- **My Channels** -
  - Removed the line under the channel page description. (KMS-21191)
  - Changed color and size of Channel Actions button. (KMS-21193)
  - Header's thumbnail is now set to 9:16 ratio. (KMS-20934)
- Removed the double lines in the BSE's Embed Settings page. See [Using the Kaltura Browse Search and Embed \(BSE\) Feature](#). (KMS-21209)
- **KMS Live** - Admins can now use both [liveentry](#) and [kwebcast](#) modules in the same KMS. This is in preparation for the new Live Capture event that will handle its own entries. (KMS-20732)
- **Publish From My Media** - When a user clicks Save to complete the process of publishing media from My Media, they are now redirected to the My Media page. See [Publish Media in MediaSpace](#). (KMS-21002)

## Resolved Issues

ID	Description	KMS/KAF Related
SUP-22907	"No KS where KS is required" error message in channel playlists is no longer displayed for certain deployments using KS-restriction access control. (July 6 Hotfix)	KMS
SUP-22238	"You must choose entries to add" message is no longer displayed for users when searching and publishing inside the "add content to channel" page.	KMS/KAF
SUP-22598	The referrerPolicy is now explicitly specified in the secure Embed codes to ensure successful redirects.	KMS
SUP-22792	Analytics for recorded live events now display correctly.	KMS/KAF
SUP-22631	Oembed type embeds now generate shortened links.	KMS
SUP-22756	xAPI - "objectType": "Agent" is now correctly placed in the new Meeting xAPI event.	KMS/KAF
SUP-21324	A group's Screen Name is now available for synced groups.	KMS
PSVAMB-14624	Editing of custom data no longer changes the metadata order of type "multiple free text".	KMS/KAF
SUP-21761	IVQ analytics – All quiz users are now listed on the CSV export.	KMS/KAF

## KMS Version 5.99.102 - July 5, 2020

**Version: 5.99.102**

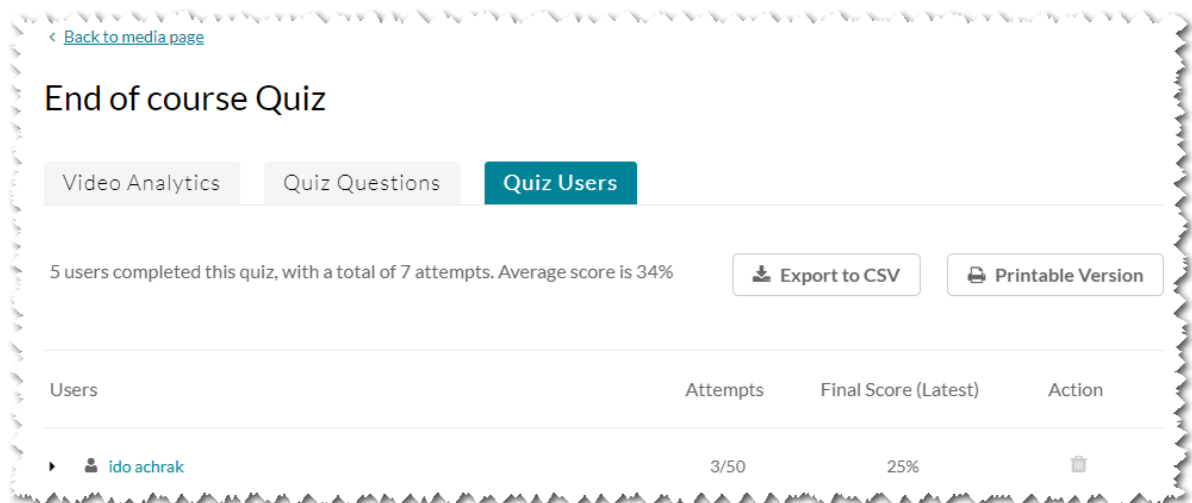

**Date Released: July 5, 2020**

### What's New

- **Playlists** – The following UX and UI changes have been implemented:
  - Added friendly images for alerts and search results
  - More focused steps for creating a new playlist
  - Added tool tips on each of the media items in the "Add to Playlist" component
  - Switched sides of the "from" and "to" columns in the "Add Items To Your Playlist" component

- **UI Update** – enhanced the application UI to conform all button sizes and fonts in the application, and adjusted the weight of thumbnails text (KMS-20531, KMS-20963).
- **Quiz Average Score** - The average score was added to the VQ analytics, under the Quiz Users tab (KMS-21112).

- **KMS Admin** – Admins can now search for categories using free text in the relevant modules of the applications admin pages (KMS-21165).

## Resolved Issues

ID	Description	KMS/KAF Related
PSVAMB-14614	Accessibility] Added contrast to the missing Home Playlists text.	KMS
SUP-22221	The Pending tab now displays the correct number for galleries with child categories.	KMS
KMS-21154	The "securePlaybackWithIprestrict" feature now supports live entries	KMS/KAF
KMS-19438	Brightspace – In the Course Content section, BSE embeds now change according to the selection	KAF
SUP-22378	Webcasting moderators with capital letters in their users' ID can now properly access the Webcasting Moderator View application	KMS

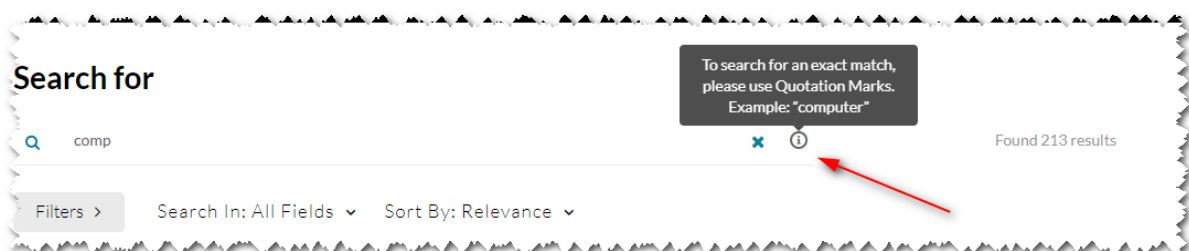

## KMS Version 5.99.85 - June 21, 2020

**Version: 5.99.85**

**Date Released: June 21, 2020**

### What's New

- **My-Media - Table View Display** – A new [Table view](#) is available for all users in the My Media page. Admins may control what columns to show or hide, and also choose the default view for My Media from the new [My-media](#) module. (KMS-21088).
- **Search** – The (i) Information icon is available on all search pages. Admins may set the information text for the Search box in the [Search](#) module. (KMS-20940)

- **Design and UI changes**
  - The Live indications and buttons' colors now match all colors of the [Liveentry](#) and [Kwebcast](#) modules. (KMS-21014)
  - Channel Header changes – Vertical white gaps have been removed and the elements' alignment have been adjusted. (KMS-20948)
  - The Home Page thumbnails behavior on hover is aligned to match the gallery's

thumbnails (PSVAMB-13602)

- **Accessibility** – Many accessibility enhancements have been implemented. Please see in the Resolved Issues section for details.
- **xAPI** – We added 2 Kaltura Meeting (aka Newrow) events (KMS-21078):
  - The Room owner data that was missing was added to the private room statements.
  - The Parent quiz completed ID statement has been modified and includes the room ID and room owner.
- **Statistics icons** (Like and 5-Stars Rating) – The statistic icons are also displayed in the Search results in Mobile View (PSVAMB-13657)

## Resolved Issues

ID	Description	KMS/KAF Related
KMS-20846	[Accessibility] The new webcast color contrast is now accessible .	KMS/KAF
KMS-20595	[Accessibility] The Edit Entry page - timeline chapters are now keyboard accessible.	KMS/KAF
KMS-20597	[Accessibility] The Edit Entry page - timeline elements no longer tab to hidden elements.	KMS/KAF
SUP-21196	[Accessibility] Added Aria labels to all form fields in the Event Registration page.	KMS
SUP-21841	[Accessibility] Removed the arialabbeledby for the "HeaderAccordion" in the home page carousel.	KMS
SUP-22252	[Accessibility] Removed the focus from non-interactive elements in the search results page	KMS/KAF
SUP-22412	The order of statistics icons in Webcasts page has been fixed.	KMS/KAF
SUP-22054	Video Quiz entries now show in the Media Gallery when using the "Display embedded media in this Media Gallery" feature.	KAF

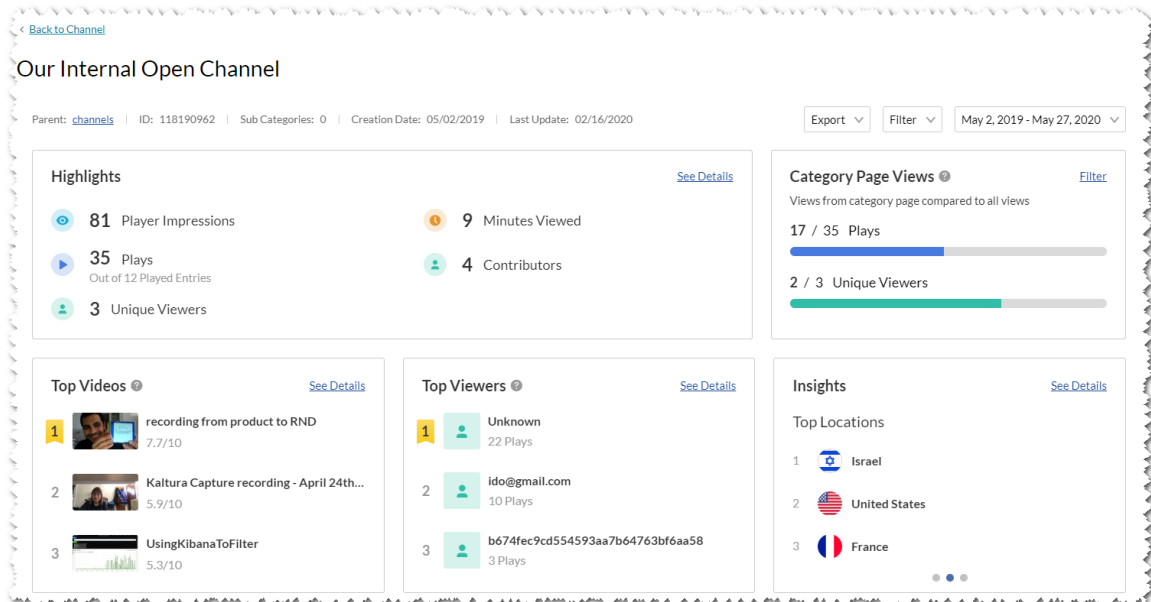

## KMS Version 5.99.68 - June 2, 2020

**Version: 5.99.68**

**Date Released: June 2, 2020**

## What's New

- **Category Analytics** - The new category analytics is now available in KMS and KAF. This page is similar to the [KMC Category Analytics Dashboard](#), and will provide all the essential analytics for category owners. (KMS-20869)
  - Category analytics are available for all categories - KAF's Media Gallery, KMS's Channels, and now, also Galleries.
  - The KMS Gallery analytics will also display analytics from sub galleries.

- **Channel Sorting** - A new channel sorting option "Update Date" has been added to the [ChannelsSorting](#) field in the [Channels](#) module of the KMS admin. Admins may now set this sorting options the default. "Update Date" displays the most recently updated channel first on the list. See the [channelsSorting](#) field in the [Channels](#) module of KMS admin for configuration details (KMS-20748).

## Resolved Issues

ID	Description	KMS/KAF Related
KMS-20715	[KMS admin] Removed the field 'showsearchboxinheader' from the <a href="#">Navigation</a> module because it is no longer needed.	KMS/KAF
KMS-20947	[UI] Entry page top padding in KMS was adjusted to the correct size of 40px.	KMS
KMS-21056	[KMS admin] Changes and corrections to informational text in the following modules: <a href="#">Kalturacapture</a> , <a href="#">Embed</a> , <a href="#">Styling</a> , <a href="#">Watchlater</a> .	KMS/KAF
KMS-20918	Logo link in an empty channel displays as "Not Secure" in the browser's console.	KMS
SUP-21185	Added a 'Save' alert when replacing the media's thumbnail.	KMS/KAF
SUP-21417	[Moodle] VQ frame now receives its size from the BSE embed sizes.	KAF
SUP-21997	Entry count is now the same in the entry page and in the Webcast home page.	KMS
SUP-22001	Media is no longer uploaded twice when clicking the Back button.	KMS
SUP-22015	Registration – The 'Exclude Users' feature on the registration form now functions properly.	KMS
SUP-22023	Filtering Channels by URL for subscribers now produces the correct results.	KMS
SUP-22096	The Webcast's "Add to Calendar" button is now responsive.	KMS/KAF
SUP-22105	Media Upload from BSE in generic KAF is now working in IE11.	KAF
SUP-22147	Secure Embeds no longer produce a black screen due to an older version of the History module.	KMS
REACH2-851	[Accessibility] Contrast of the 'Order screen' text was corrected.	KMS/KAF

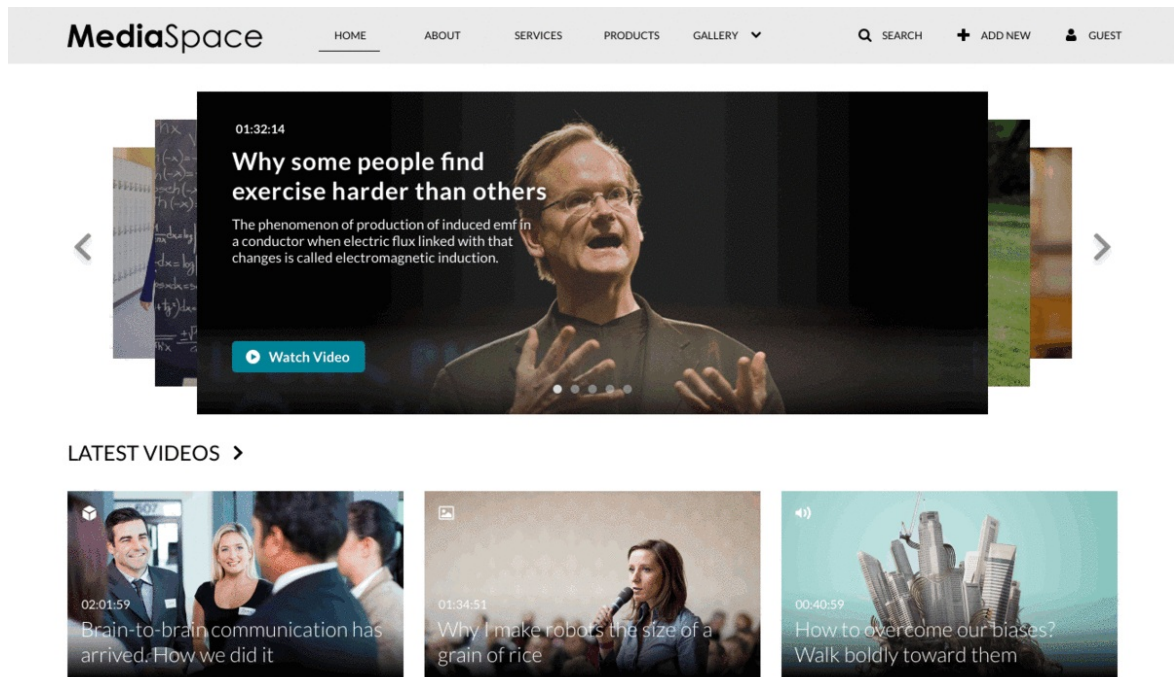

## KMS Version 5.99.50 - May 19, 2020

**Version: 5.99.45**

**Date Released: May 19, 2020**

### What's New

- **Home Page Carousel** - UI enhancements to the three carousel versions on the KMS home page (KMS-20241):
  - Added 'Duration' to all versions.
  - Aligned the title text and icons.

### • Accessibility -

- HTML items now have unique IDs. (KMS-20601)
- Like and Play buttons on carousel now have alternative text. (KMS-20503)
- Tabs are now correctly ordered on the Edit Entry page. (KMS-20575)
- Non-interactive elements should not be focus-able and keyboard-tabbed, therefore the entry description field in the search results is not focus-able or keyboard-tabbed. (KMS-20958)
- All of the Edit page Description text options and text box are SR readable. (KMS-20928)
- Added aria-labelledby attribute to the collapsed global search icon in KMS. (SUP-21836)

### • KMS Admin -

- KMC users who login to KMS using the Kaltura Auth will now automatically logged into KMS Admin. (KMS-20793)
- Because the Watch Later Playlist is now available in both KMS and KMS-Go, we removed the **Notice** under the Module Info in the Watchlater module. (KMS-20932)
- Added support for partial search and autocomplete for Groups Search. (KMS-20862)
- Manage Groups page - Users who are associated with creation mode=automatic are now displayed correctly (Automatic or Manual) in the Creation Mode column of the Groups Management table. (SUP-21934)

### • Entry Theme -

- In the Display tab of the Edit page, when the user unchecks the Sidebar option

under Show elements, the player expands to fill the sidebar space. (KMS-20850)

## Resolved Issues

ID	Description	KMS/KAF Related
SUP-21951	Playlists within MediaSpace are now properly loading.	KMS
SUP-22043	Channel Playlists module may now be activated for new KAF instances.	KMS
SUP-21120	Carousel in Channel Theme for a public channel now functions properly for anonymous users.	KMS

## KMS Version 5.99.38 - May 11, 2020

**Version: 5.99.38**

**Date Released: May 11, 2020**

### What's New

- **Translations** - A new translation file for KMS and KAF was added, mainly covering translation for the new playlists pages and the webcast registration feature. (KMS-20945)

## Resolved Issues

ID	Description	KMS/KAF Related
SUP-21949	Scheduling: Time of event is now correct when added to Google Calendar.	KMS
KMS-20952	i18n: Fixed the issue where the subscribe button was not translated due to last release changes (KMS-19987)	KMS

## KMS Version 5.99.36 - May 4, 2020

**Version: 5.99.37**

**Date Released: May 4, 2020**

## What's New

- **Webcast Home Page** - Anonymous users may now access the Webcast Home Page. This provides an opportunity to put the registration feature to great use.
- **Accessibility** - The following are now SR supported:
  - 'Subscribe to Channel' button and link. (KMS-19987)
  - '3 dots' menu on top of the thumbnails in the category pages. (KMS-20838)
  - Edit page fields. (KMS-20776)

## Resolved Issues

ID	Description	KMS/KAF Related
SUP-21855	KMS CSS in the Webcast Event Page - 'Add to Google Calendar' issue with link generation was resolved.	KMS
SUP-21053	The Kaltura Session for caption editor was extended to 12 hours to provide a longer editing time.	KMS/KAF
SUP-20730	The player's controls are no longer hidden if the browser is not wide enough for embeds while using the transcript widget.	KAF
SUP-20647	Multi Auth - Added the ability to logout and immediately log back in with a different auth type.	KMS
SUP-19112	If ampersand character ("&") is used in the media name, the upload flow no longer changes it to "&amp;".	KMS/KAF
KMS-20445	Fixed an XSS showing in log collector. (Not reproducible in browser.)	KMS

May the fourth be with you!

## KMS Version 5.99.23 - April 20, 2020

**Version: 5.99.23**

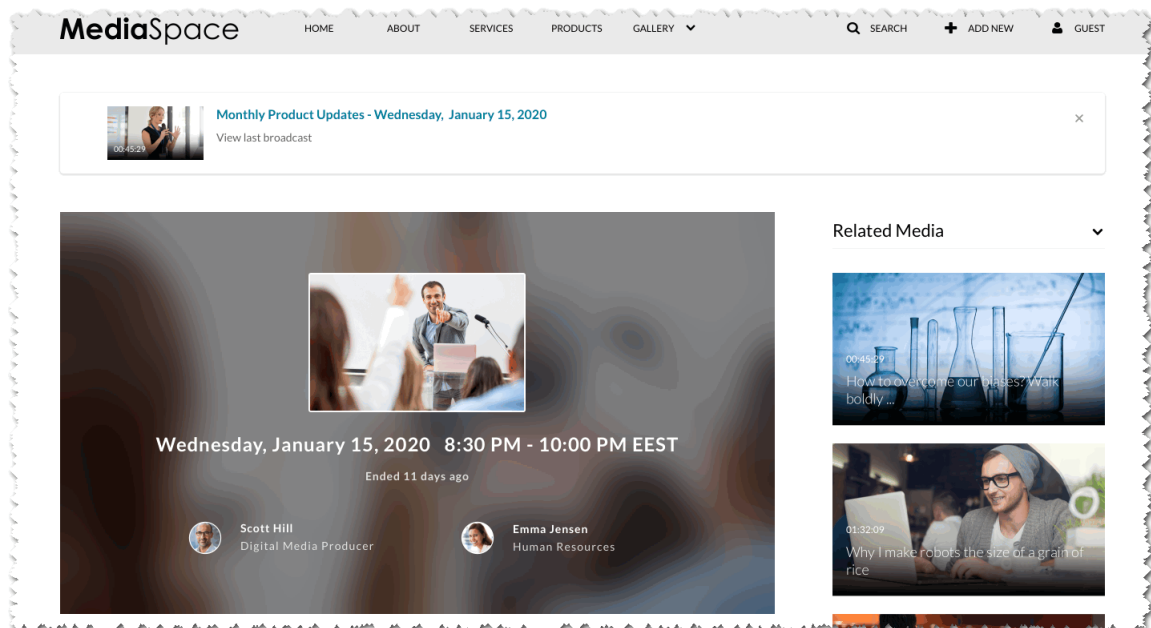

**Date Released: April 20, 2020**

## What's New

- **Webcast Features** - Kaltura is pleased to release several new Webcasting features in KMS.
  - Scheduling - Google Calendar support has been added. Now, when a user selects the "Add to Calendar" menu item from the Actions pull down menu, they can add the Webcast Event to their Google Calendar in one easy step, instead of

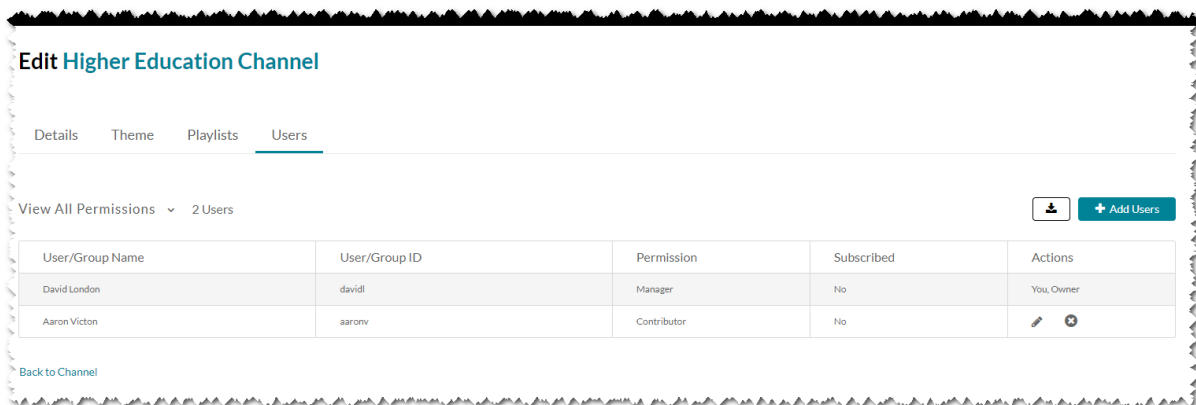

having to download an .ics file and manually importing it into the Google Calendar. Please see [Kaltura Webcasting Attendees Guide](#) for more information. (KMS-20733)

- The “last archived” box may be added above each live event. When enabled, this box displays a link to the last archived video from the live entry. Please see [Kaltura Webcasting Administrators Guide](#) and [Editing a Webcasting Event](#) for more information. (KMS-19837)

- To allow plugin control from the player, the application will no longer push the dual screen player flash vars for Webcast entries. (KMS-20717)
- Enable Preview Live - This configuration has been added to the Live Stream Details tab in the Edit Webcasting Entry screen. When enabled, the user must click on the **Go Live** button from either the [Producer Application](#) or from the KMC [Real-Time Dashboard](#). For more information see [Editing a Webcasting Event](#). (KMS-20459)
- **Channel Members List** – The ability to download a CSV list of the channel's users has been added, and some minor UI changes have been made. Please see [Managing a Channel in Kaltura MediaSpace](#) for more information. (KMS-19916)

- **Caliper** – The Caliper feed now supports Quiz events. (KMS-19985)
- **Channel Playlists** – A new component has been applied in the workflow that enables a user to add media to a channel’s playlist directly from the thumbnails in the Channel Page. Please see [Create and Add Media a Playlist](#) for more information. (KMS-20256)

## Resolved Issues

ID	Description	KMS/KAF Related
KMS-20587	[Accessibility] A label has been added to correctly identify the Publishing Schedule radio buttons by screen readers.	KMS/KAF
KMS-20677	[Accessibility] In the History Page, the "Remove from Watch History" now includes details on what media is being removed, i.e., "Remove [entry name] from Watch History".	KMS
KMS-20784	[KMS Admin] Validation for Auth[N/Z]Adapter values have been added.	KMS
KMS-20787	[UI] Changes to the icon sizes in the Live Stream Details Tab in the Entry Page have been implemented.	KMS/KAF
PSVAMB-12099	[Webcast] Expand button now functions properly in the Default Player. If you are experiencing an issue with the Expand button on the Webcast Player, please contact Kaltura customer care.	KMS/KAF
SUP-19462	Canvas/Express recording in BSE – Fixed issues that were occurring when "Save and Embed" was allowed during content upload.	KAF
SUP-20212	[i18n] Japanese Localization for the "Launch Webcast App" in Edit Page was corrected.	KMS/KAF
SUP-20530	The date picker issue with a time zone overlap was resolved.	KMS/KAF
SUP-20582	Co-viewers are no longer able to publish content in KAF via the BSE.	KAF
SUP-20603	When using custom language, date formats now display correctly.	KMS/KAF
SUP-20743	[i18n] Fixed the typo in the SAML Unauthorized Users message.	KMS
SUP-20793	Clicking on a playlist containing unlisted media will no longer redirect to the login page.	KMS
SUP-20995	The player that is set for the playlist on the Admin channeltheme module is now being used for Channel Playlist Playback.	KMS/KAF
SUP-21262	[i18n] Backup Configuration popup message text in the Application Admin Page was re-written for clarity. "Your app configuration was backed up successfully today {\$now}. Note: This configuration was last saved on {\$save time}".	KMS/KAF
SUP-21448	Adding a user to a channel no longer adds empty users as well.	KMS/KAF
SUP-21463	A list of users is no longer added as collaborators to the entry when no user is selected in the Add Collaborators box.	KMS/KAF
SUP-21506	The Entry Analytics Page now successfully loads if the Comments Custom Metadata Profile is empty.	KMS/KAF

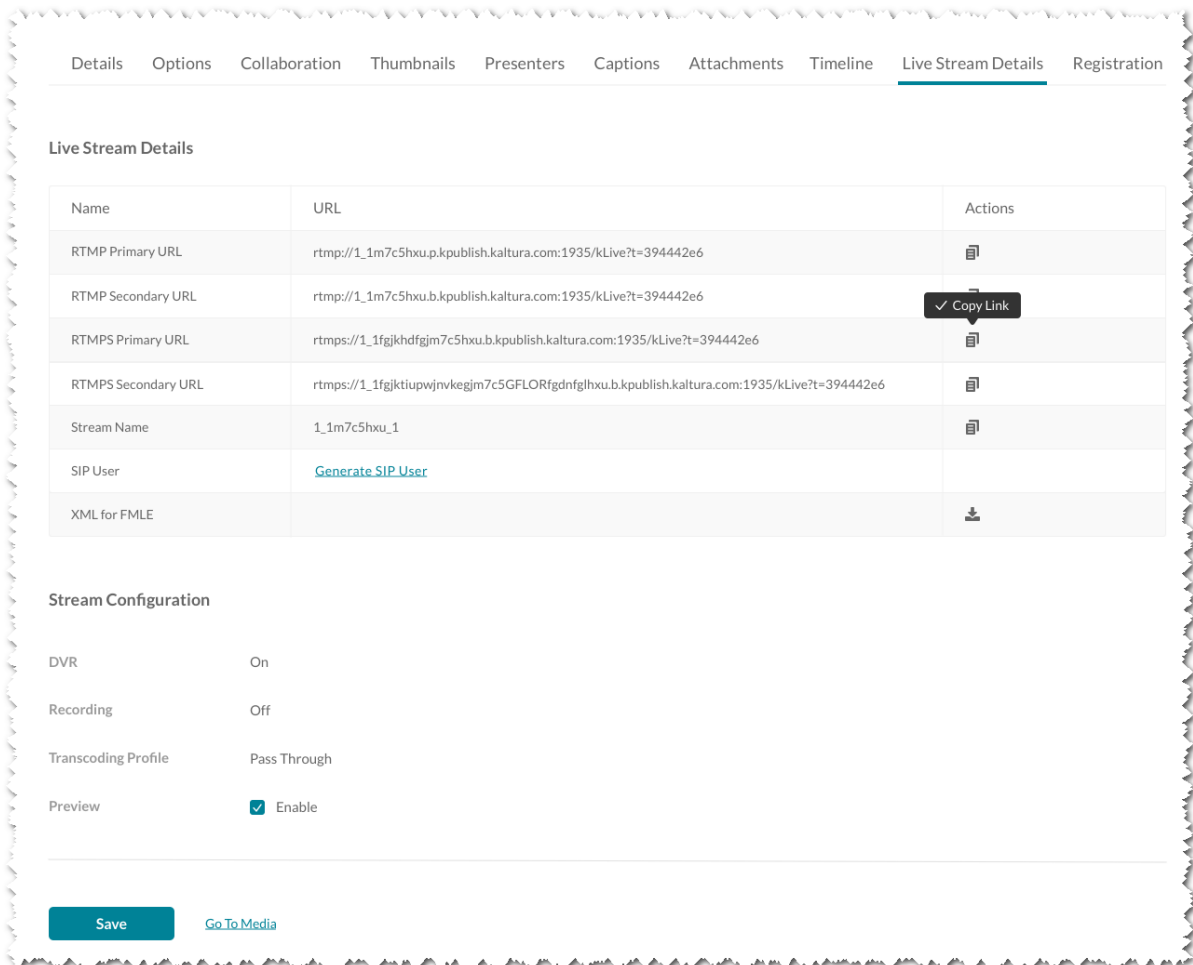

## KMS Version 5.99.05 - March 31, 2020

**Version: 5.99.05**

**Date Released: March 31, 2020**

### What's New

- **Live Stream Details Tab - The Live Stream Details** tab for editing Live and Webcasting entries has been modified and now includes additional data. (KMS-20459). Please refer to the [Webcasting documentation](#) for more information.

## KMS Version 5.99.04 - March 24, 2020

**Version: 5.99.04**

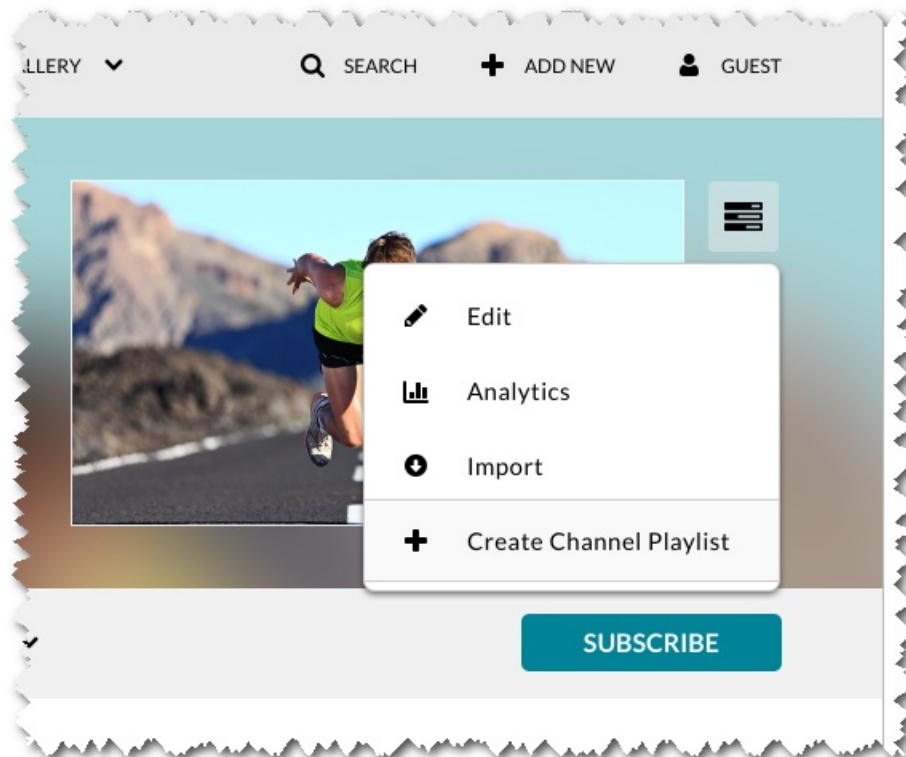

**Date Released: March 24, 2020**

Introducing the Kaltura MediaSpace and KAF New Entry Analytics Page! See [Getting Started Guide](#).

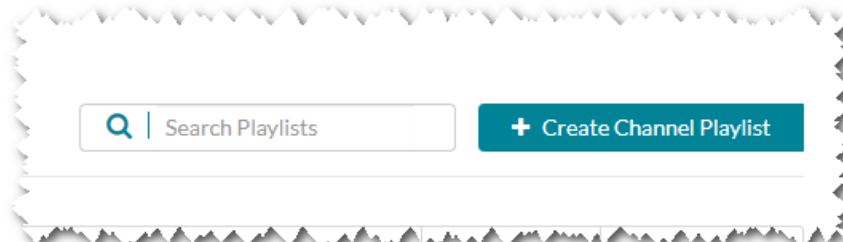

Note: The Analytics change will be deployed with this version due to deployments delays.

### What's New

- **KMS and KAF Analytics** - The KMS/KAF Entry Analytics page is available for each individual media entry.  
The KMS/KAF Entry Analytics are very similar to the KMC analytics. The analytics information provides an in-depth understanding of the media viewership and interactivity of users with the media.  
On the release date, the new and enriched analytics page will replace the current analytics page and will be available for all KMS and KAF applications.
  - If you would like to turn the feature on ahead of the release date, please contact your Kaltura representative.
  - For detailed information about the new entry level analytics, see the [Entry Level Analytics \(KMS/KAF\)](#) article.
- **Download Capabilities** - We have added the ability to download the video part of Webcast entries with VOD recording available on it. (KMS-19814)
- **Playlists** - Additional new features and improvements to Channel/Media Gallery playlists:
  - Ability to create new playlist from the Channel/Media Gallery header menu. (KMS-20251)

- A new 'create playlist' button and UI changes to the playlist table on the Channel/Media Gallery edit playlist page. (KMS-20257, KMS-20264)

- New Edit page for Channel/Media Gallery playlists. (KMS-20258)

## Resolved Issues

ID	Description	KMS/KAF Related
SUP-21241	UI: Fixed the issue where in some instances, when using the styling module, the application reverts to the UI v1.	KMS/KAF
SUP-21046	Email Notifications: The email subject is no longer incomplete when the application title in KMS/KAF admin has ampersand (&).	KMS/KAF
SUP-20410	UI: Fixed the issue where the 'amp&' shows on the "appears in" for categories with ampersand (&) char.	KMS

## KMS Version 5.98.27 - March 16, 2020

**Version: 5.98.27**

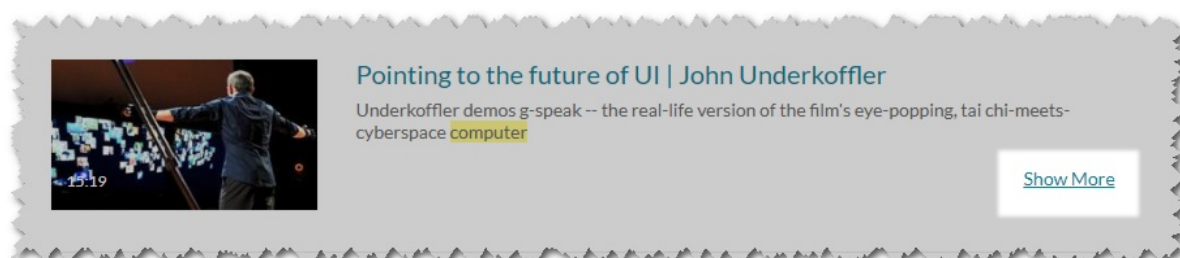

**Date Released: March 16, 2020**

Note- The Analytics change will be deployed on the next version (March 23rd) due to deployments delays.

But no need to wait, you can contact your Kaltura representative and ask them to manually switch today.

### What's New

- **KMS and KAF Analytics** - The KMS/KAF Entry Analytics page will be available for each individual media entry **in the next version**.
  - If you would like to turn the feature on ahead of the release date, please contact your Kaltura representative.
  - For detailed information about the new entry level analytics, see the [Entry Level Analytics \(KMS/KAF\)](#) article.
- **Playlists** - The following enhancements have been implemented for playlists:
  - Ability to add Channel/Media Gallery Playlists directly from the Category's home page Edit menu (KMS-20251).
  - Creating and Editing a Channel/Media Gallery Playlist now uses the new Playlist Edit page. (KMS-20257, KMS-20258).
- **Search** - The 'Show More' button is now available for all search results, even if keywords are only found in the name or description.

### Resolved Issues

ID	Description	KMS/KAF Related
KMS-20467	Accessibility: The Like button now indicates status to screen readers.	KMS/KAF
KMS-19382	UI: Unified colors for all icons in the applications.	KMS/KAF
PSVAMB-11097	Duplicated playlists no longer arrive in reversed order when using the Copy Course/Import Channel tool.	KMS/KAF
SUP-20693	Fixed the issue where entry owners who are also in a group cannot edit some of the content in My Media.	KMS/KAF
SUP-15662	UI: Fixed the UI issue where scrolling down through long categories resulted in glitching thumbnails.	KMS/KAF

## KMS Version 5.98.11 - March 2, 2020

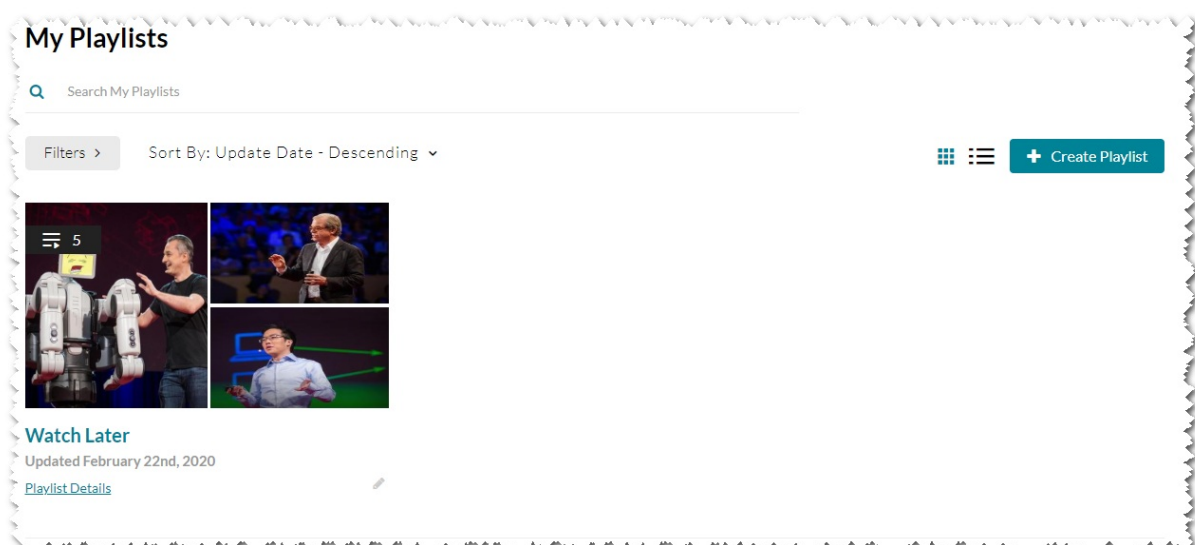

**Version: 5.98.11**

**Date Released: March 2, 2020**

### What's New

This week's release primarily focuses on Playlists improvements.

- **Watch Later Playlist** – The Watch Later Playlist feature is available for each logged in user in their My-Playlist page. The Watch Later Playlist is used to collect content to watch later and is shared with the KMS Go application. This playlist cannot be deleted and cannot be published. (KMS-19906)

- **Create Playlist Button** – This important button can be found on the top of the My Playlists page, and allows users to create a new playlist directly from the My Playlists page. (KMS-20183)
- **Add-to-Playlist Component** – The Add-to-Playlist component is now available in each playlist. When editing your playlists (Personal or Channel/Media Gallery playlist) you can add content without the need to browse for content on the site. (KMS-20287)

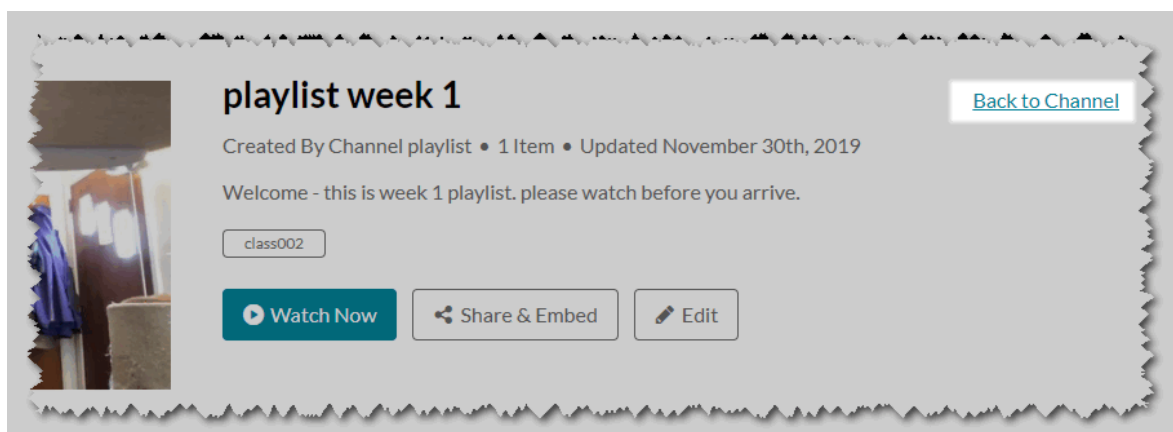

(Double click to watch full screen)

For Personal playlists: You can add content from My-Media or from any other content that is available to you through searching for content.

For Channel or Media Gallery playlists: This capability will be added in an upcoming release, Users will be able to add content from the category content itself, or from My-Media. If content from My-Media is chosen, it will be added to the playlist and also be published to the Channel or Media Gallery at the same time.

- **Channel Playlists Improvements:**

- **Back to Channel Button**– This UX change allows a better flow for navigating from the Channel Playlist or Media Gallery Playlist back to the category page itself. (KMS-20252)

- **Changes to the Channel's Playlists Table** – The Channel's Playlists table has been enhanced. All of the the actions have been merged info one column called "Actions", with tool tips for each one of the actions. The Delete icon Was changed to a Trash Can icon, and the icons have been aligned to the KMS/KAF style (KMS-19670)

## Resolved Issues

ID	Description	KMS/KAF Related
KMS-20278	KMS Admin: The text and links in the customData module have been changed to redirect to the KMC-NG.	KMS/KAF
KMS-20457	Home Page Playlist: The issues where the Home Page rule-based playlist links led to an empty playlist were fixed.	KMS
SUP-19954	Sakai: Fixed the issue where users get inconsistent access denied in Sakai's media gallery.	KAF

## KMS Version 5.97.24 - February 18, 2020

**Version: 5.97.24**

**Date Released: February 18, 2020**

### What's New

- **Event Registration** – An early release of the Event Registration Feature is available. Please contact your Kaltura representative to enable Event Registration on your account. The full release is intended in one of the next coming releases. Event Registration documentation can be found [here](#).
- **Icon change** - While Videos show the Play icon and stats, Image type media now shows the Views icon and stats.

## Resolved Issues

ID	Description	KMS/KAF Related
KMS-20356	Edit playlist - Save & Cancel buttons display correctly when the title is long.	KMS/KAF
KMS-20202	SAML module - An option has been added to send the NameID on SAML logout. This is not relevant to all SAML setups, and when needed, uses a new setting in the AUTH module.	KMS
KMS-20516	UI: The issue where a white box shows in the tags edit box has been fixed	KMS/KAF
KMS-19916	UI: The gap in the channel/category members page (under the channel/category edit) display has been eliminated.	KMS/KAF
KMS-19926	Accessibility: The 'Subscribe To Channel' Link keyboard has been made accessible.	KMS

## KMS Version 5.97.13 - February 10, 2020

**Version: 5.97.13**

**Date Released: February 10, 2020**

### What's New

- **Pre-load Parameter** – We have changed the 'preload' parameter max-age value from 30 days to 365 days. (SUP-20553)

## Resolved Issues

ID	Description	KMS/KAF Related
SUP-20965	Solved the issues where live events via the webcast module did not record due to the recordStatus field. (HF February 13)	KMS/KAF

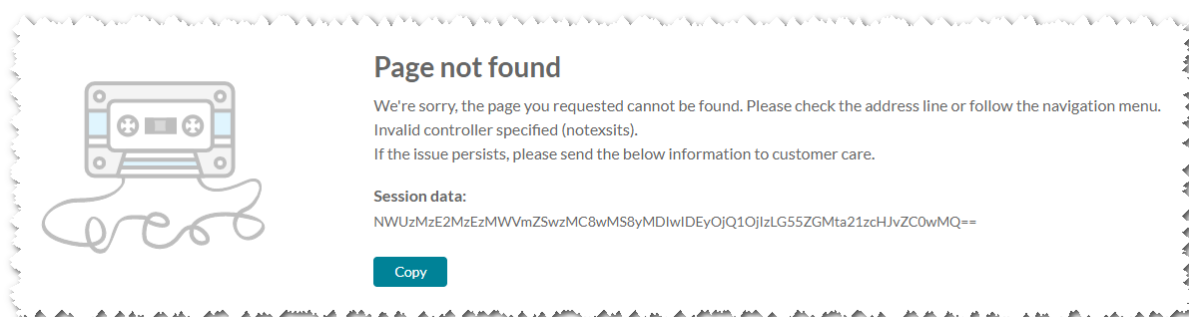

## KMS Version 5.97.08 - February 3, 2020

**Version: 5.97.08**

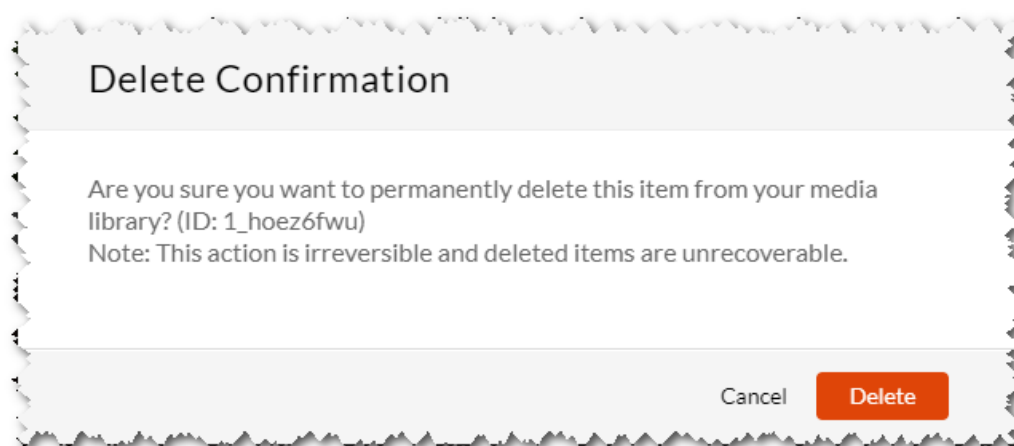

**Date Released: February 3, 2020**

### What's New

- **Quiz Re-take Capability** – Added re-take quiz capabilities to the grade book integration in Blackboard Ultra and Sakai LTI. This enables users to create quizzes that allow for re-takes. Read more in the [Quiz Articles](#). (KMS-20002)
- **UI** – Added an image to accompany error messages in KMS/KAF "Session Data"/logs, and also a "copy message" for the session's string. (KMS-19981)

- **Text Changes** –
  - Changed the filter text in My Playlists Page from "Media" to "Playlists". (KMS-20181)
  - Changed the Delete Entry alert text to warn users that the action is irreversible and the deleted items are unrecoverable. (KMS-20266)

- Added information to header, enabledHsts, and securePlaybackWithIprestrict areas of the Security module in the KMS Admin (/admin/config/tab/security). (SUP-20661)

- Corrected grammar in the message that displays for unauthorized users on the MediaSpace homepage. (SUP-20743)

## Resolved Issues

ID	Description	KMS/KAF Related
SUP-17091	[i18n] Translated the word "Explore" for all languages supported in KMS Go.	KMS
SUP-19906	Additional Date Format added to KMS/KAF: DD-MMM-YYYY, HH:MM GMT (e.g. 01-Jan-2020, 13:15 GMT).	KMS/KAF
SUP-17981	Labels no longer merge with the background color and are now readable when the accessibility "Contrast" feature is enabled.	KMS/KAF
SUP-20553	Changed the 'preload' parameter, max-age value, from 30 to 365 days.	KMS/KAF
SUP-19900	When clicking the link to PDF on TouchCast videos embedded using Kaltura embed code, the PDF now loads.	KMS/KAF
SUP-20788	We have set the "kms-locale" cookie as "secure". This is to to comply with the Chrome v80 release, to allow KAF to receive translations from the hosting LMS	KAF

## KMS Version 5.96.26 - January 14, 2020

**Version: 5.96.26**

**Date Released: January 14, 2020**

### What's New

- **Chrome 80 Default SameSite Policy Update** – Chrome version 80 (to be released in February 2020) will introduce changes around the default "SameSite" cookies policy, i.e. under which circumstances the browser sends 3rd party cookies. For more detailed information, see <https://web.dev/samesite-cookies-explained>. In this version, Kaltura has configured all Kaltura products to function properly with this update. (KMS-19983)
- **Add to Playlists Functionality** – A new "Add to Playlist" button was added to My Media and single entry pages. This functionality allows addition/removal of content from the playlist and also allows users to create new playlists on the spot. The ability to search for playlists was also added here. (KMS-20229)

Stay tuned for more to come in Playlists, Watch Later playlists, Rule-Based Playlists, and Channel/Media Gallery Playlist enhancements.

## KMS Version 5.96.13 - January 7, 2020

**Version: 5.96.17**

**Date Released: January 7, 2020**

### What's New

- **Browse, Search, and Embed (BSE) Playlists** – A new feature was added to the LMS plugins allowing course owners to use the BSE to embed the media gallery playlists into the course content. Turn on Channel Playlists, then navigate to the BSE module to choose players.

### Resolved Issues

ID	Description	KMS/KAF Related
SUP-19752	[Accessibility] The 'Add Chapter/Slide' feature is now accessible via keyboard navigation.	KMS/KAF
SUP-19881	[UI] Media Gallery thumbnails display in proper size on very small screens.	KAF
SUP-20290	Admin: No longer allowed to save the Home module if the custom playlist ID is not filled.	KMS/KAF

## KMS Version 5.96.06 - December 30, 2019

**Version: 5.96.06**

**Date Released: December 30, 2019**

### What's New

- **KMS and KAF admin pages changes** – As part of ongoing efforts to improve the administration pages, legacy and unused modules have been removed, for example uiV2, the “showMediaURL” & “emailShare” fields from the 'Embed' module were deleted for security reasons, and typos have been corrected. (KMS-20204, KMS-20109, KMS-19973).

## Resolved Issues

ID	Description	KMS/KAF Related
KMS-20046	The error 500 that occurred for certain SAML settings caused when logging out of KMS has been resolved.	KMS
SUP-20493	[IVQ] Users can now change the thumbnail for a quiz entry.	KMS/KAF
SUP-20340	[i18n] The extra space in the generic error message was removed	KMS/KAF
SUP-20011	Group members with Co-Editor permissions are now able to request captions.	KMS/KAF
SUP-19752	[Accessibility] Adding chapters/slides are now keyboard accessible	KMS/KAF
SUP-19538	SAML Group sync – The issue where users were not assigned the correct role was resolved.	KMS

## KMS Version 5.95.06 - December 23, 2019

**Version: 5.95.06**

**Date Released: December 23, 2019**

### What's New

- **Playlist Adjustments** - Many small adjustments to the recently released playlist feature. More large items to come in the next sprint. Stay tuned!
- **BSE Video Submission** - A new optional endpoint in the LMS integrations, allowing for a new Video Submission flow.

A new button displays to allow submission flow (where the embedded content is cloned) without the need for a pop up. (KMS-19889). This new endpoint is now available in the following LMSs:

- Canvas XML page - two new XML items were added for the assignment flow and also for the Quick Ingest. (KMS-20079)
- Brightspace by D2L
- Sakai LTI
- Blackboard - BBUltra courses only

For Moodle and Blackboard Learn the new feature will be available in the next plugin/extension releases.

## Resolved Issues

ID	Description	KMS/KAF
KMS-19609	KMS Go - Security enhancement to the arbitrary method when reaching KMS Go.	KMS
KMS-20060	Edit Playlist - "Request-URI Too Long" error message no longer displays in Edit page for playlist with large number of media.	KMS
KMS-20203	Interactive Videos (Path) no longer display in My Playlists page.	KMS
SUP-17882	18n: Time is now properly translated in Edit Webcast Entry page.	KMS/KAF
SUP-18511	Styling: Gallery bullets on the search results page of Media Gallery now styled via the styling module in tablet and mobile view.	KMS
SUP-19227	Added hash to links for additional security.	KMS/KAF
SUP-19683	KMS Footer now displays in the correct place while viewing Quiz analytics.	KMS
SUP-19733	Express Capture: Added the MP4 extension for the produced file.	KMS/KAF
SUP-19906	Additional Date Format added to KMS/KAF. (e.g. 15-Oct-2019, 13:15 GMT)	KMS/KAF
SUP-20209	User is now able to change video ownership from group to self ownership.	KMS/KAF
SUP-20372	Added the missing media count to the Channels/Category View.	KMS/KAF
SUP-20384	UI of the Date format with GMT was fixed to remove the line break on the search pages.	KMS/KAF
SUP-20462	Remove redundant line from the admin page of Classroomcapture and Recscheduling modules. See <a href="#">Kaltura Scheduling Administrator's Guide</a> .	KMS/KAF

## KMS Version 5.94.15 - December 16, 2019

**Version: 5.94.15**

**Date Released: December 16, 2019**

### What's New

- **Playlist** - Channel playlists are embedded through the new playlist embed function. See [Manage Channel and Media Gallery Playlists](#) and [Playlist Administrator's Guide](#). (KMS-20131)

## Resolved Issues

ID	Description	KAF/KMS
KMS-19920	Adjustments to the channel's Subscribe/Unsubscribe button style were made to correct hover area.	KMS
SUP-20296	Added the Group Name in channel members list (in addition to the Group ID).	KAF/KMS
SUP-20117	Changes to the webcast entry now apply to the appended VOD entry that is connected to it.	KAF/KMS
SUP-20242	User channel permissions can now be updated for users with capital letters in their user name.	KMS
SUP-19940	Anonymous users can no longer gain access (through a direct link) to "open" categories in KMS that are restricted to specific roles in KMS Admin.	KMS
SUP-20321	For media awaiting approval in a channel, media that has a hashtag (#) in the name no longer produces an error.	KAF/KMS
SUP-20250	UI: In the Media Gallery, large gaps between KAF playlists no longer appear.	KAF/KMS
SUP-19190	KMS/KAF Admin: Fields can now be deleted from nested array settings type.	KAF/KMS
SUP-20299	More than 30 users can now schedule events.	KAF/KMS

## KMS Version 5.94.11 - December 2, 2019

**Version:** 5.94.11

**Date Released:** December 2, 2019

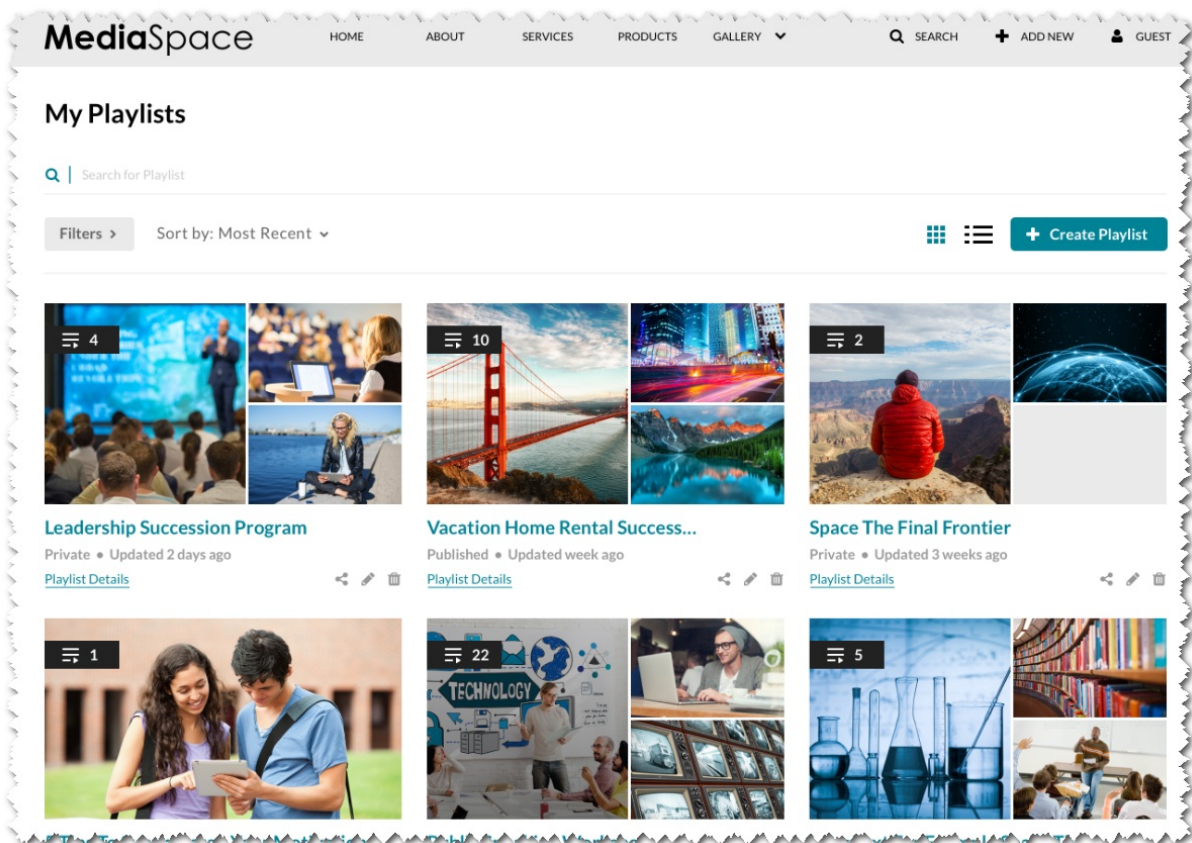

### Overview

These release notes pertain to MediaSpace and Kaltura Application Framework (KAF) version 5.94.11, released December 2, 2019.

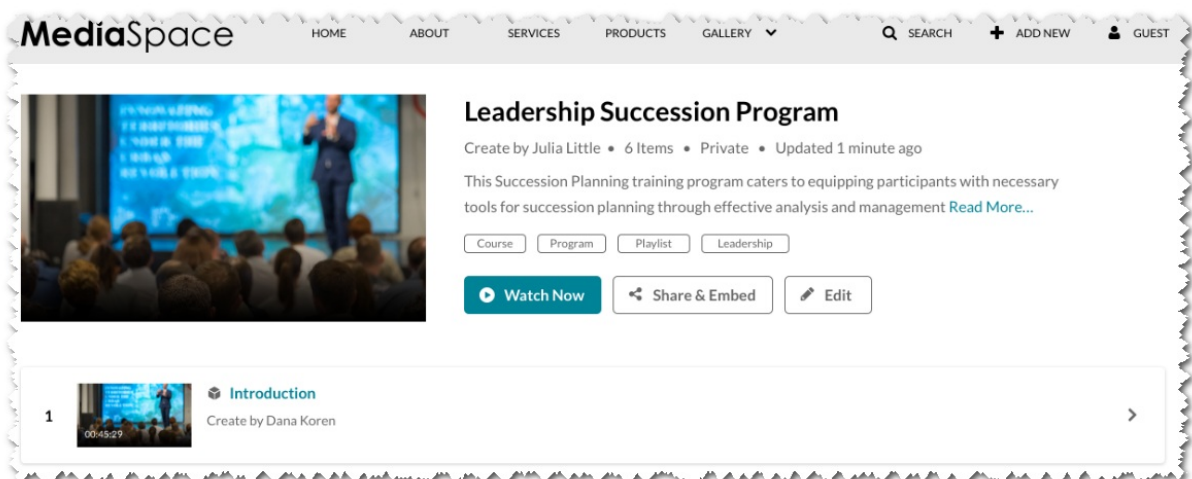

### What's New

- **Playlists** - Kaltura now offers a new and improved playlist experience, including: [My Playlists Page](#):

Two new playlist pages for [playback](#) and viewing [playlist details](#):

More features and capabilities will be released soon, including BSE playlist with LMS integrations, rule-based playlists, search, and more.

## Resolved Issues

ID	Description	KAF/KMS
SUP-19501	Interactive videos (PATH) are now supported in the assignment workflow and cloned to a new user once submitted. Note: Only the playlist is cloned; not the media nodes in the path project.	KAF
SUP-18542	Search with double quotes within the media gallery playlist creation flow no longer “breaks”.	KAF
SUP-19906	Added the missing date format “Day-Month-Year, Time Zone” (11-Apr-2018 1:15 PM MDT)	KAF/KMS

## KMS Version 5.93.19 - November 25, 2019

**Version:** 5.93.19

**Date Released:** November 25, 2019

## Overview

These release notes pertain to MediaSpace and Kaltura Application Framework (KAF) version 5.93.19, released November 25, 2019.

## What's New

- **Multi-Authentication** - If multi-authentication is set up on your KMS, admins can now set up direct links to each authentication method. For more information see [Authenticating Using Multiple Authentication Providers to Access Kaltura MediaSpace](#). (KMS-19272)
- **i18n** - The 2019 November language pack was updated for both KMS and KAF. (KMS-19993)
- **xAPI** - We are now sending the information that a “playback speed” selection was made by a user. (PSVAMB-9058)

## Resolved Issues

ID #	Summary	KMS/KAF Related
KMS-19932	The "Captions Request" action name was changed to "Caption & Enrich".	KMS/KAF
KMS-19853	The erroneous media count for channel media and pending items has been fixed.	KMS/KAF
KMS-19882	The image displayed on the timeline module when uploading a new slide deck has been adjusted.	KMS/KAF
KMS-19942	UI - In My Media, the "Publish" label now displays correctly when tags are not available.	KMS/KAF
KMS-19943	Canvas - The Search in embed shared repository no longer returns an empty row.	KAF
KMS-19966	Accessibility - A new subscription button is now keyboard accessible.	KMS
KMS-20014	SAML - Security Update for SimpleSAMLphp (SSP) has been added.	KMS
SUP-19944	Text - The "No Value" text in the channel's topics has been changed to "No Topic".	KMS
SUP-20010	When editing a Channel Playlist, the last entry is now shown. The error was due to a CSS setting.	KMS/KAF
SUP-19472	The "Access Denied" error that appeared on entries played from the Home Carousel, that was caused by changing the Home Carousel type, was resolved.	KMS
SUP-19940	When using the Restricted categories from the Category module, Anonymous users no longer can access the Open category with a direct link.	KMS
SUP-20048	The History module no longer overwrites direct links to a time in the video when coming from "Search in video" links.	KMS/KAF

## KMS Version 5.92.11 - October 28, 2019

**Version:** 5.92.11

**Date Released:** October 28, 2019

### Overview

These release notes pertain to MediaSpace and Kaltura Application Framework (KAF) version 5.92.11, released October 28, 2019.

## What's New

**SAML Authentication** – A dedicated logout URL to which users are redirected when they logout of KMS may now be added in the SAML module. (1)

For more information on the SAML module, see [Kaltura MediaSpace SAML Integration Guide](#).

**Enhanced SSO Security** – Our current SSO Gateway implementation was enhanced from SHA-1 (Secure Hash Algorithm) to a stronger SHA-256. (2)

To turn it on, use the "hashAlgorithm" field in the AUTH module.

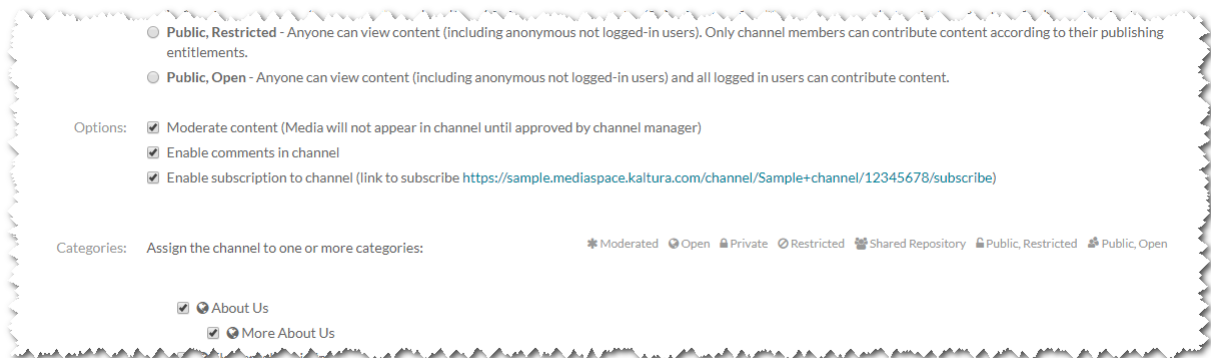

**Channel Subscription** – Users may now copy and share a link to use for channel subscription. A KMS user copies the subscription link (as shown below), sends the link to another KMS user, that user then clicks on the link and is automatically subscribed to the channel. (3)

The link displays in two locations:

Next to the subscribe button:

In the Channel Edit Page:

The link is built in the form of:

*`https://{KMS_URL}/channel/{Channel_Name}/{Channel_ID}/subscribe`*

Example: <https://sample.mediaspace.kaltura.com/channel/Sample+channel/12345678/subscribe>

See [Channel Subscriptions](#) for complete information.

**New Sakai Tool** – A new Sakai integration named “Kaltura LTI Tool for Sakai” is now available. In the future, this tool will replace the current Sakai video plugin. Using this new LTI tool, Sakai Admins utilize the built-in LTI placements capabilities within Sakai 12, instead of installing additional plugins. (4)

Documentation and announcements will be sent separately.

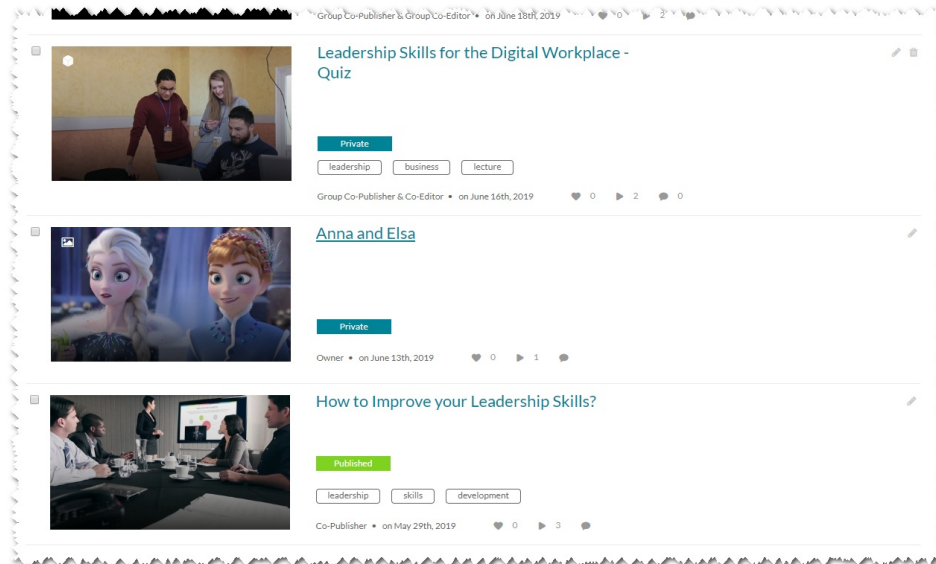

Please follow the new [Sakai](#) pages for the latest information:

## UI Changes

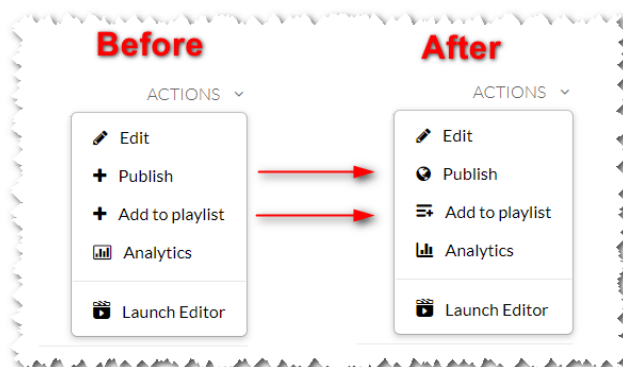

- Ownership and collaboration indicators are now available within My Media which

give a user insight into why this media displays in their list. The new indicator also shows if the collaboration is given personally to the user or via a group collaboration (see image below). (5)

- We have moved the media publishing status indication of "private" from the thumbnail to be available on the right of the thumbnail, above the tags - for Consistency and for Accessibility. (5)

**“Actions” buttons update** – Adjustments have been made to the icons on the Actions drop down list. (6)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-19849	<b>Multi Auth</b> – The "Remember My Selection" check box is now set to 'On' by default.	KMS

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-19871	<b>BB Ultra</b> – The issue where content published by a channel manager goes to Pending tab was fixed.	KAF
KMS-18859	<b>Featured Media</b> (BB, Jive) – The performance impact that the Featured Media had on loading time of the course gallery was fixed.	KAF
KMS-19816	<b>Scheduling</b> –Added the ability to see all events in the calendar.	KAF/KMS
KMS-19879	<b>Scheduling</b> – Entering the end time/date manually, no longer breaks the start time/date.	KAF/KMS
SUP-19851	<b>BSE</b> – The issue in BSE tool: when searching within the Course Gallery, the Embed Settings button for search result is no longer greyed out.	KAF
SUP-19287	In <b>Canvas</b> , when using a very small screen, the media title is no longer cut off.	KAF
SUP-18473	<b>D2L</b> – The issue where the BSE would not load for users with more than 1000 courses was fixed.	KAF
SUP-19610	<b>TouchCast</b> – The issue where TouchCast Embedded via secure embed and sandbox attributes caused interactions not to work was fixed.	KMS

## v5.92 References

## KMS Version 5.91.05 - October 7, 2019

**Version:** 5.91.05

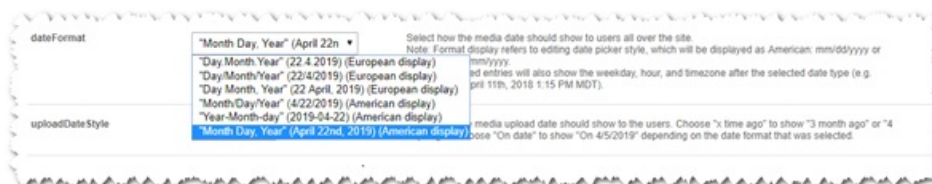

**Date Released:** October 7, 2019

## Overview

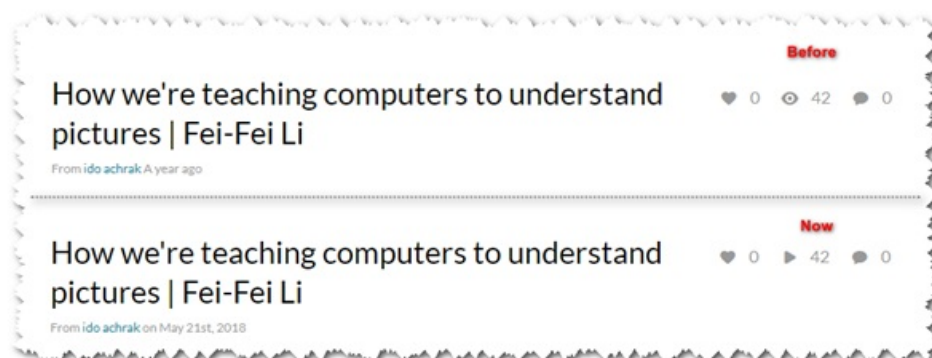

These release notes pertain to MediaSpace and Kaltura Application Framework (KAF) version 5.91.05, released October 7, 2019.

## What's New

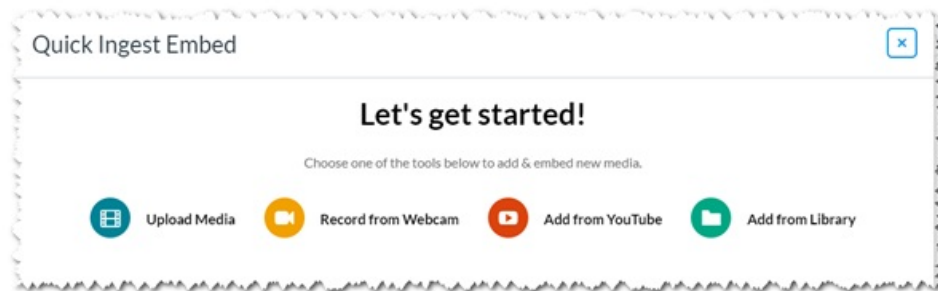

- **Time & Date** – We consolidated all the fields in the Admin that pertain to the way time and date show in KMS/KAF, and merged them all into one field. (1)  
This unification allows you to control the way time and date shows in KMS/KAF using the “[dateFormat](#)” field under the [application](#) module.  
We are also introducing a new field called “[uploadDateStyle](#)” under the [application](#) module, to allow the Admins to choose whether to show the explicit date, e.g. “*September 1st, 2019*” instead of “*2 days ago*”. (2)

- **UI Changes** – Under each entry, an icon showing the number of plays is presented. The current “eye” icon was changed to the triangle play button to make sure the visual representation is correct, as “eye” usually represents “player impressions” and not “plays”. (3)

- **Styling Module** – We added a new addition to the styling capabilities – “Dropdown Menu Background Color (:active)”.  
This new field modifies the background color when a dropdown menu element is active. (4)
- **Quick Ingest** – While still in open Beta, we have added the new “Add from Library” option to the list, now presenting Add New, YouTube, Webcam, and From Library. (5)  
This option takes you to the BSE page, showing your My Media and other options.

- **Support** – We are adding an easier way to collect support logs without using any external tools or the browsers' developer tools. See more in the [Collecting Support Logs within the App guide](#). (6)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-19782	We added "reference ID" in the BSE response.	KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-19784	Kaltura Capture - Once a user is deleted from the system (using the API), KMS will invalidate the user app-token, preventing them from using the Kaltura Capture tool.	KAF/KMS
SUP-18875	BSE v2 - when using the v2 of the BSE, Embeds on KAF now reflect the size that was set by the admin.	KAF
SUP-19473	Theme module - in the Moodle and D2L extensions, the Submit button under "Edit Media Gallery" > "Theme" now shows up as expected.	KAF
SUP-19568	Fixed the issue where the title for videos with long titles and no spaces goes out of frame in Chrome.	KMS
SUP-19610	Secure Embed - TouchCast embed links interactions no working with secure embed.	KMS
SUP-18615	Fixed the issue where Custom Metadata of type text, intermittently is showing a "looking for more" message.	KMS
SUP-18932	Fixed the issue where a user cannot be added to a channel due to lower-cased and upper-cased user-ID	KMS/KAF
SUP-19457	Home Playlist's metadata now displays properly in smaller screen resolutions.	KMS
KMS-19824	BB Ultra - The publish from my media to was changes to use a different element of the course ID	KAF

## References

(1) KMS-19537, (2) KMS-19536, (3) KMS-19757, (4) KMS-19762, (5) KMS-19812, (6) KMS-19834

## KMS Version 5.90.18 - September 18, 2019

**Version:** 5.90.18

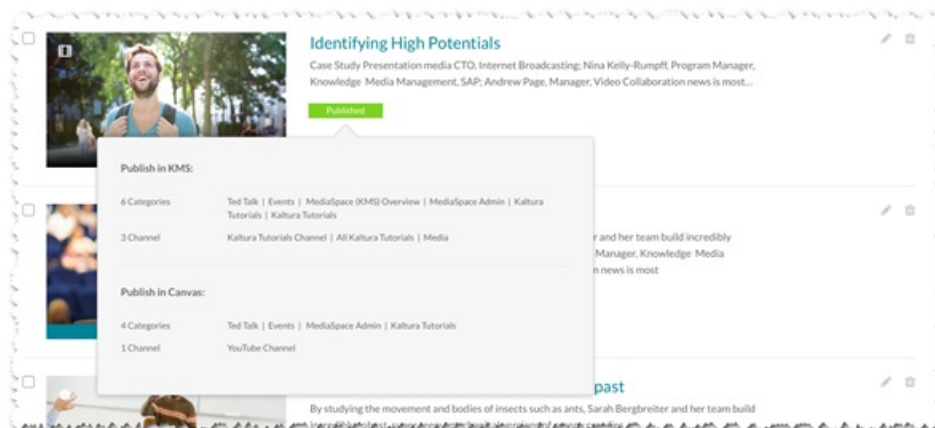

**Date Released:** September 18, 2019

## Overview

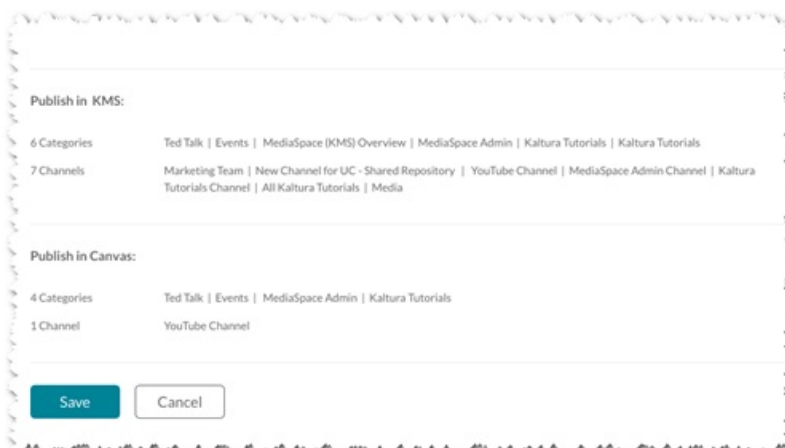

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.90.18, released on September 18, 2019.

## New Features and User Stories

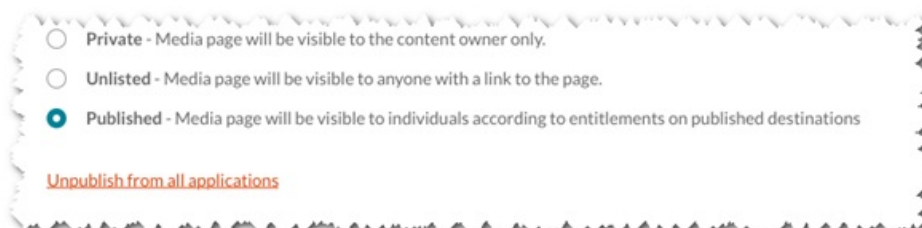

Cross Application Publishing – Currently, you can see all of the Kaltura applications into which media is published in the My Media Page by clicking on the green Published button.

Now, you are also able to see this information on each individual media's publish section just above the Save and Cancel buttons. (PSVAMB-8500)

We have also added a new feature in the media publish section called "Unpublish from all applications". This feature comes in the form of a button below the Published state radio button. Clicking this new button removes the media from ALL applications, including the current one, and makes the media entry completely private.

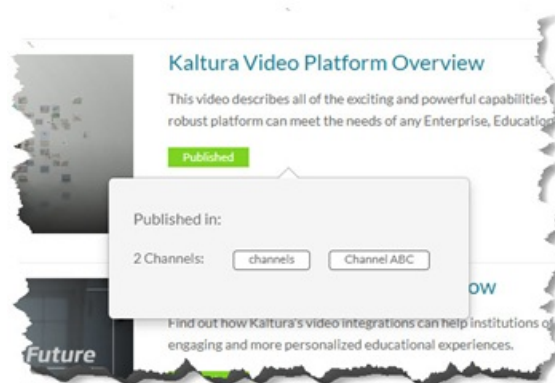

Don't have the feature turned on yet? Turn it on using the [external applications guide](#).

## Coming Soon - Changing the UI

Notice, too, the small changes made to the visual appearance of the categories.

Currently their appearance is similar to tags (shown below) which may cause some confusion to the user.

Their appearance is changed to the following.

## KMS Version 5.89.12 - August 13, 2019

**Version:** 5.89.12

**Date Released:** August 13, 2019

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.89.12, released on August 13, 2019.

In this release, we are focusing mainly in bug fixes for KMS and KAF. Pay special attention to some additional accessibility bug fixes. Take a look at the coming soon section, to learn more about what are we working on behind the scenes.

### New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-19640	[Accessibility] The publish saving confirmation alert is focused once the save it pressed.	KAF/KMS
KMS-19639	[Accessibility] Make the save button unavailable if there is nothing to save.	KAF/KMS
KMS-19633	[Accessibility] When Shared repository are turned on, the custom field is no longer read by screen readers when they are hidden to view.	KAF/KMS
KMS-19632	[Accessibility] Fixed the way the tags field is read when adding a new entry, to be read correctly by screen readers.	KAF/KMS
KMS-19515	When using the disclaimer module, once a user has checked the box and save, it is no longer available to uncheck.	KAF/KMS
KMS-19734	Moderation page - entry links now contain category ID to support KAF Context security	KAF/KMS
KMS-19688	[Entry Theme] When creating a new player set, you no longer can save it with a with a blank name.	KMS
KMS-19689	[Category Theme] We have removed the 'Category option' and 'Enable channel carousel' from KAFs.	KAF
KMS-18912	The issue where a user with Viewer Role cannot add members to channels was resolved.	KAF/KMS

## KMS Support Tickets

ID#	Summary	KMS/KAF Related
SUP-19057	Visual changes to the information icons in the category Theme page where made to makes it easier to click.	KAF/KMS
SUP-19024	Static Page no longer available to anonymous users when using a capital letters in the "slug" parameter	KMS
SUP-19004	Changed the limitation of sub categories displayed for publishing from 4 to 6 levels of sub categories.	KMS
SUP-18996	Made some visual changes to the channels page when using Table view to better align the text in the tables.	KMS/KAF
SUP-18991	Changes in the Hosted module now can be saved. The issue was caused by a redundant module that was removed from the affected instances.	KAF
SUP-18938	The limitation for number of "allowedUsers" users in the "Recscheduling" module was increased from 30 to 500.	KMS/KAF
SUP-18931	Setting the channel Theme to "Media" first, no longer causes the playlists thumbnail to disappear when clicking on "Home" tab.	KMS/KAF
SUP-18902	The "Appears In" dropdown is now displaying correctly over the media list below the channel's header.	KMS
SUP-18859	Change of warning message for replacing media to reflect the type of media you are about to replace.	KMS/KAF
SUP-18814	The "Save&Embed" for Kaltura Capture in BSE was removed, as it is not available in that workflow.	KAF
SUP-18557	The issue where users with certain time zone set (e.g. "America/Mexico_City") cannot change a thumbnail, was resolved.	KMS

## KMS Version 5.88.27 - July 23, 2019

**Version:** 5.88.27

**Date Released:** July 23, 2019

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.88.27, released on July 23, 2019.

## What's New KMS & KAF

- **URL for Filtered Results / Channel Topics (1)**

This is a 2 in one feature. Specific URLs for all pages that have data filtered have been added (except for the category pages).

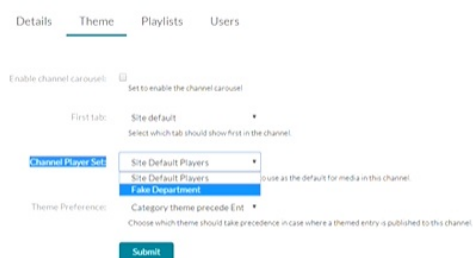

Each time you search or use filters for My Media, Global Search, or All-Channels, the URL changes accordingly to reflect your search/filtering results. You can save the URL in your favorites or send it to someone else.

An important use case for the filters' URL feature is the Channel Topics. The Channel topics filter may be used to add and filter topics for channels in the "All Channels" and "My Channels" Pages.

The URL created by filtering channels by topics provides a new way to create dedicated channel pages per topic.

For additional information see [Creating and Using Topics for Channels for KMS and KAF](#).

- **Themes** - Additional capabilities for Theming are available in KMS/KAF. (2)
  - Admins may setup sets of players to use in a category.
  - Each category owner (channel, gallery, media gallery) can decide what set of players to use for their category. This option is configured in the [ChannelTheme](#) (for both channels and media galleries) and [Categorytheme](#) modules (for galleries).

**⚠Note:** If you have the Theme Preference set up you may choose which option overrides the other. For example you can select the single entry theme to override the category theme or vice versa.

- **Subscribers** - A column has been added under the Members page for Categories. The "Subscribed" column, indicates whether a user has subscribed to the category or not. (3)

You can see subscribers that are members as well as subscribers that are not

5 users

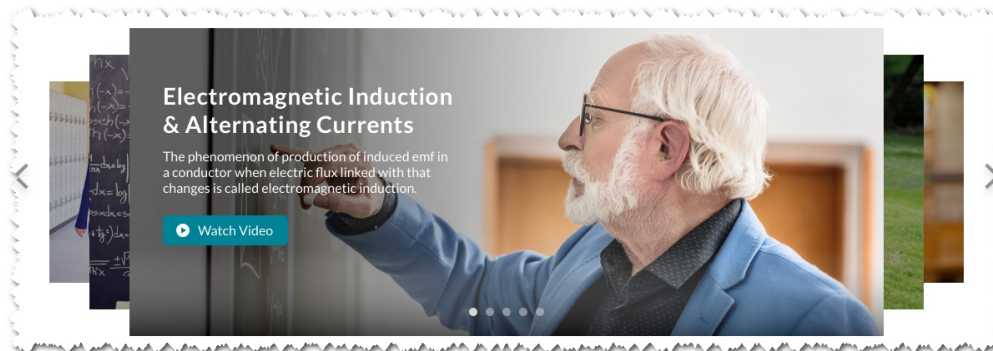

View All Permissions

Add Members

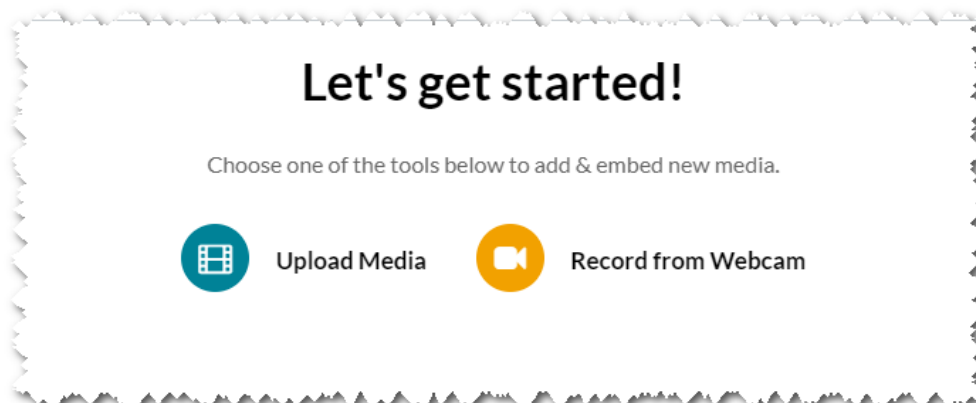

User/Group Name	User ID	Permission	Subscribed	Actions
John Dany	JohnD	Manager	Yes	You, Owner
Admin_Group [Internal Group]	Admin_Group	Member	No	
History User	history	Member	No	✎ ✕ Set as Owner
faculty member	faculty	Member	No	✎ ✕ Set as Owner
Example User	Euser	Not A Member	Yes	✎ ✕ Set as Owner

members.

- **Carousel Type** – The Home page has a new carousel type available. Turn it on from the [Home](#) module. (4)

- **Quick Ingest** – This Quick Ingest feature, is a new addition to the BSE family. It can compliment the BSE feature, or replace it. It is basically a BSE without the Browse and the Search. As this is currently released in Open Beta mode, we will release more information after we go live. (5)

- All new KMS/KAF instances will be created with players marked with version “Latest”. (6)
- Unnecessary Flash Vars have been removed from the embed code to speed up the embed process. (Webcasting) (7)
- RAPT/PATH: KAF users can now embed interactive videos from BSE. (8)
- A new and improved translation file is available. (9)

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-19547	The "Delete channel" is displayed on the main edit channel page only.	KAF/KMS
KMS-19257	The issue where the category selection disappeared when publishing to a new course in a LMS has been fixed.	KAF
KMS-19566	KMS admin: We changed the text in the valueMappingType field in the Samlgroupsync module from group's name to group's ID.	KMS
KMS-19527	Entry Analytics: The custom dates fields no longer overlao the dashboard image.	KMS/KAF
KMS-18882	The issue where the category name was cut in 'Appears In' as been fixed.	KMS
KMS-19593	The issue where the category name was not displayed in the page after uploading new media to category has been fixed.	KMS
SUP-17882	i18n: The time field is now translated in the Edit Webcast Entry page	KMS/KAF
SUP-18418	Styling: the "Loading" message now changes color according to the main styling color.	KMS
SUP-17869	Styling: A new field in the styling module was created to change the playlist title color in the home page.	KMS
SUP-17980	The tag search now shows exact matches only.	KMS

Issue ID#	Summary	KMS/KAF Related
17981	Summary: Labels now change color when using the contrast feature.	Related
SUP-18298	The issue where a collaborator could not be added due to a slash (/) in the user's name has been fixed.	KMS/KAF

## KMS Version 5.87.13 - June 24, 2019

**Version:** 5.87.13

**Date Released:** June 24, 2019

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.87.13, released on June 24, 2019.

## What's New KMS & KAF

### KMS Admin Text Changes

Text has been revised in the KMS/KAF admin to make it clearer. Modules: sortMediaBy, logoImageUrl, channelEmbed, galleryEmbed, Channeltopics (1)

### Groups Management

The following new features were added to the amazing Manage Groups tool:

- **Import Users** – Allows the admins to add new users to a group in a bulk. You can drop a list of user IDs separated by comma or semicolon. Note: The users will be imported with only their user-ID. Other details can be passed on login via SSO authentication. (2)

### Import List of Users

Paste a list of user IDs in the form of open text.

The user IDs may be separated by ',' or ';' or a line break. Spaces are not allowed.

example.user1, example.user2, example.user3

Cancel
Verify User IDs

### Add Users

Start typing to search for a user to add.

example.user1 x

example.user2 x

example.user3 x

☒ Create user if ID not found
0 Existing & 3 Unrecognized Users

Cancel
Add

- **Copy Group** – The ability to copy a group saves time when creating groups with almost the same user list. Create a basic group of users, clone it, and then add the missing users to each cloned group. (3)
- **Added groups' support** for the EntryDesign, Kalturacapture, Recorder, and Quiz modules (4)

See the article [Managing Groups from the MediaSpace or KAF Admin Console](#) for

## Topics Module Improvements

As part of our enhancements to add new capabilities for channel categorization, the [channelTopics](#) module now provides the ability to setup a [new filter](#) to display for channels. Each channel can be added to a topic chosen from a predefined list. (5)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-18896	Tool tips for the Styling color have been added to the Styling Configuration page that is accessed through the <a href="#">Styling module</a> .	KMS/KAF
KMS-19255	A new processing image has been added to all entries in KMS or KAF. This will show the viewer a meaningful.	KMS/KAF
KMS-19480	Limited (Profesional Services only) 2 Factor Authentication login support has been implemented for the admin login in KMS only.	KMS

## Resolved Issues

ID#	Summary	KMS/KAF Related
PSVAMB-7274	Anonymous user can now play Channel playlist in a public open channel.	KMS
PSVAMB-7546	xAPI module event list link now working in KAF applications.	KAF
KMS-18837	IVQ workflows – a smoother creation flow starting with "add new" and ending with a new quiz from a	KMS/KAF

	new entry.	
<b>ID#</b>	<b>Summary</b>	<b>KMS/KAF Related</b>
RAPT-207	[PATH] Custom data now apply when added in the creation flow.	KMS
KMS-14551	Player bar is now available in the category “add content” page.	KMS/KAF
SUP-18057	Public channels – changes to the text to provide a more accurate description.	KMS/KAF
SUP-17639	Express recorder now releases the camera when recording is completed.	KMS/KAF
SUP-18528	Adjustments to the buttons size on the Express Capture to fit larger text.	KMS
SUP-17813	Fixed the skewed thumbnails issue in categories when using the gallery View in Chrome	KMS/KAF
SUP-14358	Fixed the display issue with channels view in specific sizes.	KMS/KAF
SUP-4230	Replace Media is now available for audio and images media types	KMS/KAF
SUP-17881	Click on a tag in global search will now redirect to the tags search	KMS
SUP-17144	Comments on a comment are now counted in the sum of comments per entry.	KMS/KAF
SUP-18246	Fixed the issue where My-Media searches produce inconsistent results for collaborated entries.	KAF/KMS
SUP-18476	Fixed the padding around Kaltura embed videos in Canvas.	KAF

Item #	Summary	KMS/KAF Related
18490	Search is now working correctly with "Simplified Chinese"	
SUP-17551	KMS no longer shows an API error after removing a member of a channel of type manager that is also a subscriber.	KMS
KMS-19516	[Editor] The users can now close the editor while clipping is done in the background.	KMS/KAF

Coming Soon

Here is a sample of items to be released on our upcoming versions:

- Playlists - changes to the way playlists are created, viewed and managed in KMS/KAF.

References

(1) KMS-19491, KMS-19512, KMS-19519, KMS-19266 (2) KMS-19521; (3) KMS-19565; (4) PSVAMB-7557, KMS-19523; (5) KMS-19266

## KMS Version 5.86.11 - May 26, 2019

**Version:** 5.86.11

**Date Released:** May 26, 2019

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.86.11, released on May 26, 2019.

What's New KMS & KAF

#### In-Video Quiz - Multiple Attempts

Multiple attempts is now available for the KAF LMS extensions and plugins quizzes (1) . For more information see the section about [Multiple Attempts](#) in the Kaltura Video Editing Tools - Quiz Tab article.

Please make sure to [update all your players](#) in the Kaltura Management Console

Universal Studio. More information may be found in the [IVQ documentation](#).

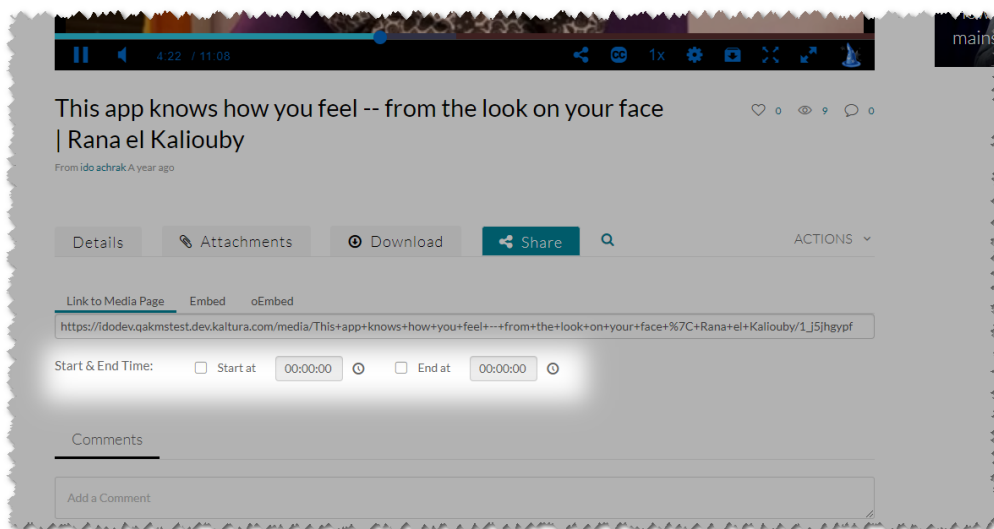

## CaptureSpace End-of-Life

CaptureSpace will reach end-of-life on June 1st, 2019. At that point, Kaltura Capture will replace CaptureSpace and CaptureSpace will no longer be supported by Kaltura.

To enable Kaltura Capture, follow the information in the [Kaltura Capture](#) documentation. Additional information about the transition may be found in the [FAQ page](#).

## Embed

MediaSpace sharing capabilities have been enhanced, allowing end users to share a video while pointing it to a specific time start and/or end time:

You can send a link to a media page with a specific portion of the media so only a concentrated portion of the media is shared. Use one of the following methods:

- Use the Start at time or End at time field to enter the viewing start and end times.
- Use the icon next to the field to sync the time that is currently on the media player.
- Manually input the start and end times into the link by adding `st=$ed=`

`st=226&ed=251`

## Groups Management:

Additional features have been added to the groups' capabilities; a checkbox for Specific Users/Groups has been added to support groups in the admin console for fields that contain check box types for permissions. (2)

- ☐ Owner Only
- ☒ Specific Users / Groups
- ☒ anonymousRole
- ☒ viewerRole
- ☒ privateOnlyRole
- ☒ adminRole
- ☒ unmoderatedAdminRole

Check the Specific Users/Groups box and enter the Users/Groups information.

For those using the [Samlgroupsync](#) – KMS now is able to handle special characters in the group name. (3)

In the next sprint we intend to add the ability to import new users directly to groups. (4).

## Home Page - Trending Videos

A new playlist type "Trending" is now available in the Home page setting. Set the option in the [Home module](#) carousel type in the KMS admin.

The Trending playlist presents the set of the most played media in the past 30 days, 7 days, or last 48 hours on the MediaSpace home page. (5)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-19247	Minor UI changes have been made to improve to the Upload page. An image and animation have been added to indicate the upload (drag and drop) process.	KMS
KMS-19488	The Express Capture HTML Recorder button's name was renamed to "Express Capture".	KMS/KAF
PSVAMB-6881	xAPI: Quiz Statements have been added to the xAPI beacons.	KMS/KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-19429	Clicking on playlists in the home page sends the relevant channel analytics.	KMS
SUP-17366	The Styling module settings now cascade to all the search pages.	KMS
SUP-17801	In the Analytics page, the data no longer overlaps with the header text.	KMS/KAF
SUP-18124	Unlisted videos are now set with a special tag to prevent Google search indexing.	KMS
SUP-17549	The following issue has been fixed on mobile: when the navigationStyle is set to 'Vertical', the global search bar is taking a higher section of the top.	KMS
SUP-4230	Replacing media in KMS/KAF is now available for audio files and images.	KMS/KAF
SUP-17810	The date on the quiz answers section in the entry analytics was removed to prevent confusion.	KMS/KAF
SUP-18347	IE11: When the xAPI module is turned on, the search bar is no longer missing on IE11.	KMS

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- Playlists - changes to the way playlists are created, viewed and managed in KMS/KAF.

## References

## KMS Version 5.85.17 - May 5, 2019

**Version:** 5.85.17

**Date Released:** May 5, 2019

### Overview

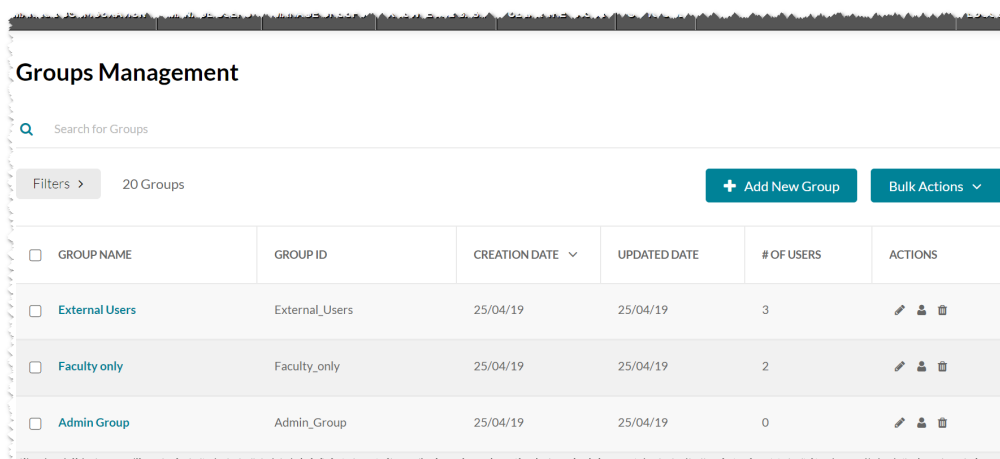

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.85.17, released on May 5, 2019.

### What's New KMS & KAF

**Groups Management:** The ability to manage groups is now available directly from the KMS/KAF admin. This is another important step allowing groups to become super useful, and to allow faster and better control over a user's permission in a bulk.

For more details, see the following articles about Managing Groups:

- [Managing Groups from the MediaSpace or KAF Admin Console](#)
- [Group Support in Kaltura Applications and Kaltura Groups FAQ](#)

The screenshot shows the 'Groups Management' interface in the Kaltura admin console. It features a search bar, a filter button, and a table of groups. The table has columns for Group Name, Group ID, Creation Date, Updated Date, # of Users, and Actions. Three groups are listed: External Users, Faculty only, and Admin Group.

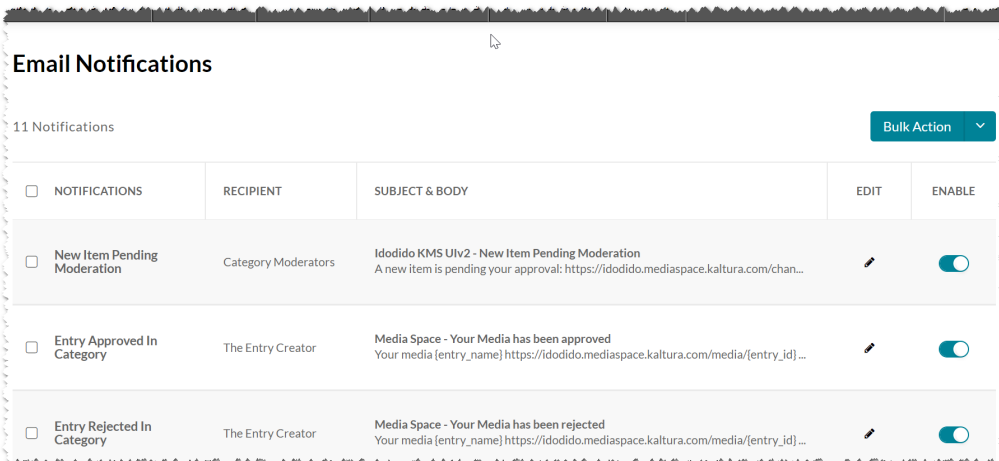

GROUP NAME	GROUP ID	CREATION DATE	UPDATED DATE	# OF USERS	ACTIONS
External Users	External_Users	25/04/19	25/04/19	3	[Edit] [Add] [Delete]
Faculty only	Faculty_only	25/04/19	25/04/19	2	[Edit] [Add] [Delete]

**New Channel type - "Public, Open":** We have added a new type of public channel. A public channel is a channel that is available to guests just like the galleries (assuming your KMS is open for anonymous users). The ability to add content to the existing public channel was restricted to channel members. The new Public Open channel is opened to any logged in user with the private Only role and above, and can add content to it without being a member of the channel. (1)

**Express Capture - HTML Webcam Recorder:** Several UI enhancements were made; such as making the text style, line separators, alignment of icons, and changing the text from “Save a copy” to “Download a copy”.

We also added a message that indicates that the upload is complete, and when so made sure that the webcam is released after the recording is completed.

**Email Notifications:** Introducing a new look to the old page, with preparations for the new features that will be added later – per instance notifications. These are currently in a closed-beta, and will be introduced in later sprints as a self-serve upgrade to all instances. (2)

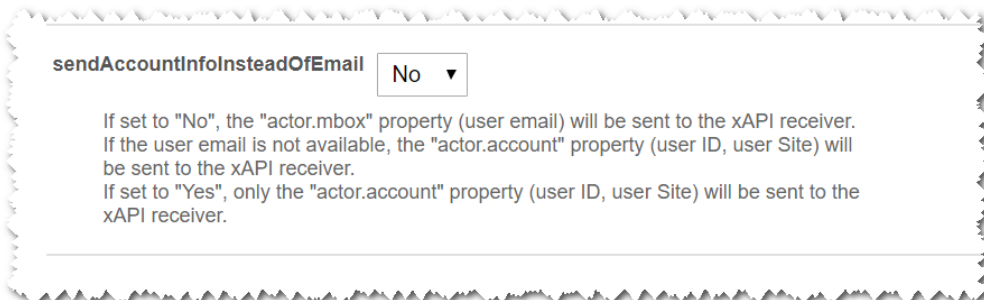

The screenshot shows the 'Email Notifications' management page. It features a table with 11 notifications. The table has columns for 'NOTIFICATIONS', 'RECIPIENT', 'SUBJECT & BODY', 'EDIT', and 'ENABLE'. Each row represents a notification type, such as 'New Item Pending Moderation', 'Entry Approved In Category', and 'Entry Rejected In Category'. The 'ENABLE' column contains a toggle switch for each notification type.

NOTIFICATIONS	RECIPIENT	SUBJECT & BODY	EDIT	ENABLE
<input type="checkbox"/> New Item Pending Moderation	Category Moderators	Idodido KMS UIv2 - New Item Pending Moderation A new item is pending your approval: https://idodido.mediaspace.kaltura.com/chan...		<input checked="" type="checkbox"/>
<input type="checkbox"/> Entry Approved In Category	The Entry Creator	Media Space - Your Media has been approved Your media [entry_name] https://idodido.mediaspace.kaltura.com/media/[entry_id]...		<input checked="" type="checkbox"/>
<input type="checkbox"/> Entry Rejected In Category	The Entry Creator	Media Space - Your Media has been rejected Your media [entry_name] https://idodido.mediaspace.kaltura.com/media/[entry_id]...		<input checked="" type="checkbox"/>

**xAPI Additions:** Adding more features/actions to the xAPI statements we are sending (3):

- Added actions: Resume play, pause, seek
- Added info: Length of Video
- Added configuration: Send user info or account info

The screenshot shows a configuration field labeled 'sendAccountInfoInsteadOfEmail' with a dropdown menu set to 'No'. Below the field, there is explanatory text:

If set to "No", the "actor.mbox" property (user email) will be sent to the xAPI receiver. If the user email is not available, the "actor.account" property (user ID, user Site) will be sent to the xAPI receiver.

If set to "Yes", only the "actor.account" property (user ID, user Site) will be sent to the xAPI receiver.

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-19247	i18n: Missing translated words in German were added.	KMS/KAF
KMS-17438	Groups: Added support for the viewer type in webcast entries.	KMS/KAF
KMS-19044	Youtube entries: We are now ingesting a higher resolution YouTube thumbnail.	KMS/KAF
KMS-19233	BSE: In the embed settings, you can now use the thumb embed with the start/end feature.	KAF
SUP-4230	Replace media feature was enhanced, and is now available for both the audio and image media types.	KMS/KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-19351 / SUP-15131	We enhanced the “Publish from category” to better support cases where users are enrolled in a great number of courses.	KAF
KMS-19384	Enhanced security was added to prevent XSS vulnerability when using the “saved searches” for a specific user.	KMS/KAF
SUP-17325	Resolved the issue where My Media in KAF is not responsive on small screen iOS devices.	KAF

SUP-17361 ID#	The issues where the 2nd lever gallery breadcrumbs are colored white was resolved <b>Summary</b>	KAF KMS/KAF Related
SUP-16687	The "CSS :hover button" effect is now available for the "extend" button in the Media Gallery	KAF
SUP-17069	Custom metadata now reflect the HTML tags	KMS/KAF
SUP-17593	Issue with share via email when an ampersand char (&) is present is resolved.	KMS
SUP-16923	Webcast: Users can now be added as Webcast Moderator and not only co-viewers.	KMS/KAF
SUP-17566	IE11: Fixed the issues where changes are not saved when uploading using IE11 browser.	KMS
KMS-19393	Samlgroupsync module now supports special characters and spaces for groups IDs. The fix will change any special char/space into an underscore (_).	KMS
SUP-17646	The time indicator in the quiz editor is now working correctly.	KMS/KAF
SUP-17164	Search results for categories (galleries/channels) with a slash (/) in the name are now linking correctly.	KMS
SUP-17464	In KAF, access to clicking on tags was blocked (in KMS it stay untouched, and will lead to a "per-tag" search).	KAF
SUP-16950	Channel managers added via a group can now see the channel in "My Channels" page.	KMS
SUP-	Added support for special domains (e.g.	

SOP-17916 ID#	https://KMS.URL.com/extension) to prevent error on home-playlist links.	KMS KMS/KAF Related
---------------	---	---------------------------

Coming Soon

Here is a sample of items to be released on our upcoming versions:

- Playlists - changes to the way playlist are created, viewed and manged in KMS/KAF

## KMS Version 5.84.19 - April 1, 2019

**Version:** 5.84.19

**Date Released:** April 1, 2019

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.84.19, released on April 1, 2019.

### What's New In-Video Quiz

A new release of the In-Video Quiz (IVQ) feature is now available.

Please see [IVQ release notes](#) page for more information.

The new features include a new **Analytics Table**, the ability to **Remove Attempts** of a user, the ability to allow **Multiple Attempts** for each quiz, and a brand-new question type – **Open Text Question**.

### What's New KMS & KAF

#### BSE Embeds

- We changed the "No source video was found" message for entries that are in conversion process to a new meaningful message. (1)

## Accessibility

- The “Load More” button was added to more pages when enabled. Also, a new link was added to the Accessibility module where admins can enable the button. (2)

## New Features & User Stories

ID#	Summary	KMS/KAF Related	
SUP-16403	We added a "Channel Actions" tool tip for the Channel button in the header.	KMS	

## Resolved Issues

ID#	Summary	KMS/KAF Related	
SUP-17533	Issue in pages where multiple entries existed with a quiz, resulting in error due to the cookies size, was resolved.	KAF	
SUP-17205	The issue where comments for entries marked in the KMC with status of “Flagged For Review” could not be disabled was fixed.	KMS/KAF	
SUP-17531	eSearch – Added a Cross-Site Scripting protection on the global search in KMS.	KMS	

ID#	Summary	KMS/KAF Related
SUP-17658	The issue where empty response is returned from the API, causing the grades not to pass to the gradebook was fixed.	KAF
SUP-17491	Kaltura Express Capture – Changes were made to the field browserNotSupportedText in the instance admin to allow adding of alternative text.	KAF/KMS
SUP-17183	The issue where users receive an error when auto-generating a thumbnail due to access control profile was fixed.	KAF/KMS
SUP-17409	The shift of buttons in the Media Gallery Analytics' engagement tab was resolved.	KAF
SUP-17268	We removed the "Delete Channel" option in KAF since in the LMSs extensions it is not relevant.	KAF
SUP-16923	Changes were made to the Webcast Moderator permissions to work in sync with the new Co-viewer permission.	KMS/KAF
KMS-19265	SAML – The issue where the Samlgroupsync module did not handle spaces was fixed. Spaces in group IDs will now be replaced with an underscore ("_").	KMS
SUP-17305	SAML – When using multi-auth configurations, the "shouldPost" field no longer appears.	KMS
SUP-17593	The issue where Ampersand (&) in the media name or description cause the email share to cut was fixed.	KMS
SUP-17410	i18n – The Load more button's "No More Media Found" message is now translated to German (Es gibt keine weiteren Medieneinträge).	KMS/KAF

<b>ID#</b>	<b>Summary</b>	<b>KMS/KAF Related</b>
SUP-16740	The issue where uploading a new thumbnail for a channel's cover on IE was resolved.	KMS/KAF
SUP-17436	Comments for Live Entries are now displayed.	KMS/KAF
SUP-17366	The Styling module is now affecting the Kaltura Capture page.	KMS/KAF
SUP-17695	A channel thumbnail can now be updated properly.	KMS
SUP-17535	Additional Cross-site scripting (XSS) prevention for Firefox was added for the embed page.	KMS

Coming Soon

Here is a sample of items to be released on our upcoming versions:

- Manual Groups management – Currently available as an Open Beta in the KMS/KAF admin pages.

## KMS Version 5.83.14 - March 4, 2019

**Version:** 5.83.14

**Date Released:** March 4, 2019

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.83.14, released on March 4, 2019.

## What's New for KAF & KMS

## Browse Search and Embed

- A [Timeline](#) has been added to the Kaltura Browse Search and embed feature. Use the timeline to select a start and end time for your media using the embed settings. [\(1\)](#)
- BSE Status message – An informative message about the status of the BSE embed has been added. [\(2\)](#)

## Express Capture

- The [Download a Copy](#) option has been added that allows you to download a copy of your recording before uploading and saving it to KMS. [\(3\)](#)
- [Keyboard shortcuts](#) have been added to Kaltura Express Capture. Keyboard control. [\(4\)](#)
- An [audio indicator](#) has been added to indicate that you are recording Audio only. [\(5\)](#)

## Groups-Management

- In the KMS admin in any location where you can set a role, you can now add users/groups. [\(6\)](#)
- Change Media Owner– You can set a “Group” as the owner of an entry. [\(7\)](#)

## Other

- **KMS Gallery/Channel theme** - First Tab Load - Admins and category managers can control which tab to load into the category first. Enable this option in the KMS Admin Console through the [Categorytheme](#) module or [Channeltheme](#) module.. [\(8\)](#)
- **New Translation Enhancements** have been applied to the KMS and KAF applications. [\(9\)](#)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-18766	Text has been added to the <a href="#">Moderation module</a> to describe it's functionality.	KMS/KAF
REACH2-260	(Canvas) When using the Browse Search and Embed feature, the iFrame is resized to allow sizes for each KAF application to support the Transcript Widget.	KAF
KMS-18838	IVQ Creation flow "Add New" changes. The Add New option has been removed from the IVQ flow to ensure a seamless workflow.	KMS/KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-19202	Instances no longer crash due to a Grade Book submission overload.	KAF
KMS-19148	The XSS issue in translations has been resolved.	KMS/KAF
KMS-18861	[IVQ] The editor in the preview quiz player is now displaying the "no skip" option correctly.	KMS
PSVAMB-6131	IE 11: Thumbnails are now aligned correctly within the carousel.	KMS
SUP-16917	German translation in MediaSpace has been corrected.	KMS
SUP-17273	The language characters in the MediaSpace header are now aligned.	KMS

SUP ID#	Summary	KMS/KAF Related
SUP-16964	The Channel Thumbnail is now displayed properly on initial upload.	KMS
SUP-15278	The API error on KMS Analytics when generating CSV file has been fixed.	KMS
SUP-17200	Caption Upload is now working properly with IE.	KMS/KAF
SUP-17264	French Translation in MediaSpace has been corrected.	KMS
SUP-16548	The KMS carousel bug has been fixed.	KMS
SUP-17044	Media Count is now updated correctly when a new entry is published to a channel.	KMS
SUP-16585	Sorting channel entries is now working properly.	KMS
SUP-16903	German Translation in MediaSpace has been corrected.	KMS
SUP-17116	[Moodle] Embed in TinyMCE is now working and displays the video as it should.	KAF
SUP-17205	Disabled comments for a specific entry are now working properly.	KMS/KAF
SUP-17039	The issue where the V2 UI loads the channel manager's list behind entry thumbnails has been corrected.	KMS
SUP-16564/KMS-18903	The issue with LTI Grading with multiple KAF sessions has been fixed. The LTIGrading module now saves its data in a cookie instead of relying on the session. IVQ grades are now sent properly to the LMS grade books.	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- Groups Support – We are adding additional group capabilities in the KMS admin.

## KMS Version 5.82.15 - February 4, 2019

**Version:** 5.82.15

**Date Released:** February 4, 2019

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.82.15, released on February 4, 2019.

### What's New for KAF & KMS

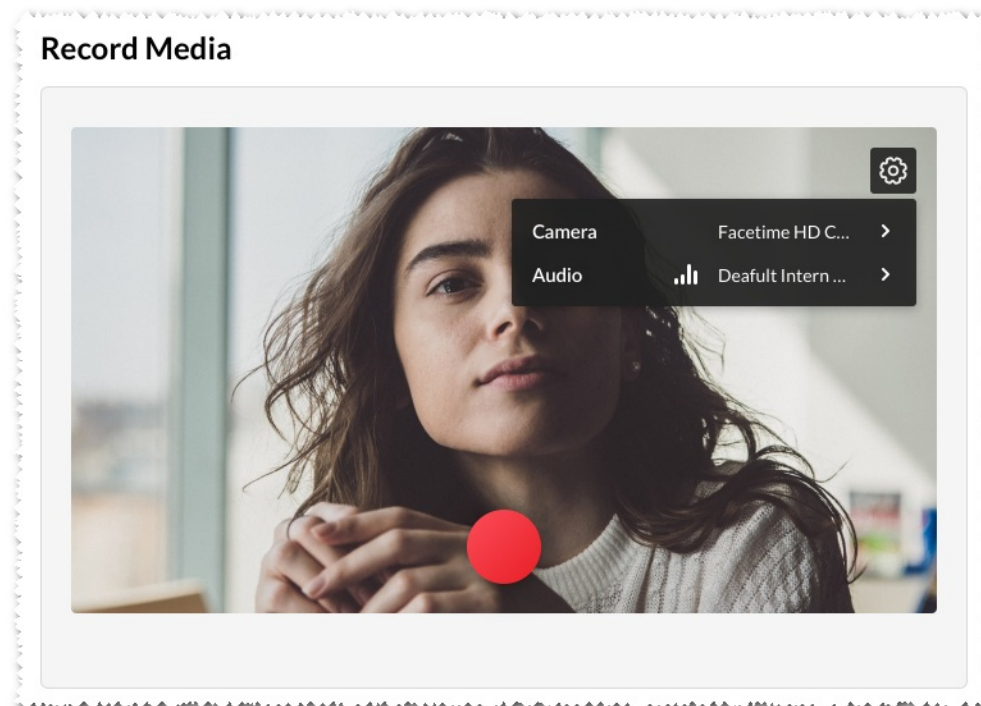

- **Kaltura Express Capture - HTML Webcam Recorder** – A new Big Red Button has been added to the Kaltura Capture suite. This new feature is now available for all KMS and KAF instances. Kaltura Express Capture enables recording content directly from the browser, with no need to install any additional software.

Admins: Give it a try by going to the instance admin and enable the new “[Recorder](#)” module. [\(1\)](#)

Note the Player version must be v3. A new v3 player will automatically be created in the module when you turn enable it.

The new webcam recorder will replace the Flash recorder, which is anticipated to be removed from KMS and KAF later this year. (An announcement will be sent.)

For more information on how to use the Webcam Recording option to add media, see the article [Kaltura Express Capture](#).

- **BSE (Browse Search & Embed) “Advanced Settings”**

For Admins: The Embed Advanced Settings feature may be enabled on all KAF instances by choosing a new BSE version – V3. When enabled, the Kaltura Embed Media page is displayed with an entire new set of embed features (more to come). See the [Browse Search and Embed Administrator's Guide](#) for more information. To try it out, login to the KAF admin page, select the [browseandembed](#) module and turn on the v3 version in the [enableNewBSEUI](#) field. Please note, the v3 version will replace previous versions, that are intended to be removed later this year (A separate announcement will be sent with more information). (2)

For Users: Please see the articles [Browse Search and Embed](#) for information on how to launch the BSE feature, and the article [Using the Kaltura Browse Search and Embed \(BSE\) Feature](#) for more information.

- **Collaboration, Co-Viewer - A new collaboration type is now available - “Co-Viewer”. This option allows users to share videos with other team members or groups without the need to publish the video or make it unlisted. (3)**
- **Optimization - We have enhanced the API for several pages, making them load smarter and faster (There are no changes from a UI perspective, except for a faster load).(4)**

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-18891	We added a tool tip for long fields in the entry's custom data information.	KMS/KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-18374	Custom metadata filters in the search filter tab, containing a lot of data, can now show all the fields.	KMS/KAF
KMS-18482	Search - the channelsSorting field in the KMS admin will now effect the new search.	KMS
SUP-16515	The issue when trying to set flavors for download in webcast entries was resolved.	KMS/KAF
SUP-16828	The issue where the empty "Options" tab appeared in the entry edit page, due to live and clipping features has been fixed.	KMS/KAF
SUP-15323	Admins can now disable the Trimming option in the Editor module.	KMS/KAF
SUP-16852	IE11 -The issue in IE11 where a new entry automatically turns to private after uploading has been fixed.	KMS
SUP-16637	Blackboard - We removed the white border around the player when using the BSE.	KAF

ID#	Summary	KMS/KAF Related
SUP-16823	The issue where the "Display embedded media in this Media Gallery" option in the Media Gallery Edit page does not disappear after disabling it in the KAF admin has been fixed.	KAF
SUP-16797	We changed the order of the playlist to show the channel playlist first in the channel carousel field in the Channel Edit page.	KMS
SUP-16788	We removed the "Launch Editor" option from the Actions drop down, when the user is not allowed to use the editor.	KMS
SUP-15998	IE11 - The issue where the channel thumbnail is not stretched out in IE 11 was resolved.	KMS
SUP-15479	We made minor changes to the Download button colors to improve the display.	KMS/KAF
SUP-16398	Groups - We added the ability for category owner to change the permissions of groups in the Category Users page.	KMS
SUP-16786	The issue where Media gallery managers are unable to import content from a different Media Gallery has been resolved.	KAF
SUP-16702	We fixed the issue with upload of custom Favicon in the KMS admin.	KMS
SUP-16418	The "My History" custom dates filter is now displaying correctly.	KMS
SUP-16420	We added the channel header (name and thumbnail) to the Channel Analytics page.	KMS
SUP-	We added the ability for a media owner to add	

16792 ID#	themselves as a media collaborator. Summary	KMS KMS/KAF Related
SUP-16726	The issue where pressing the "Edit Captions" button resulted with an error has been fixed.	KMS/KAF
KMS-18453	i18n - Missing translated words in Dutch have been added.	KMS/KAF
SUP-16365	The issue where a user got an "Access denied" message for some entries in the My History page has been fixed.	KMS
SUP-16657	Users can now use the new "Edit Captions" capabilities, even if the REACH v2 module is not enabled.	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Groups Support** - We are adding additional group capabilities in the KMS admin.

## KMS Version 5.81.08 - January 7, 2019

Version: 5.81.08

Date Released: January 7, 2019

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.81.08, released on January 7, 2019.

## What's New for KAF & KMS

- **KMS Header Dropdown Menu** –Admins can create a dropdown of items in the navigation bar. For example, you can add a list of channels. This new feature is available in the [Navigation module](#).

Select the “Add items” button to add the dropdown items. (1):

**+ Add "items"**

- **Custom Data Display** – We made changes to the way Custom Metadata is displayed on the entry page. It is now displayed vertically, and the ‘Related Entry’ images are displayed (if available) (2):

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-18832	Added support for multi-entry tasks, such as approval of moderated entries in a channel.	KMS/KAF
KMS-18565	BSE – We changed the icon for the “Embed” and “Save & Embed” buttons.	KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
SUP-16254	Media that is out of the scheduled timeframe, will no longer be displayed in galleries/channels and will only be displayed in My-Media.	KMS/KAF
SUP-16398	Added the ability to edit group permissions within a KMS category for groups created automatically by the SAMLgroupSync module.	KMS

ID#	Summary	KMS/KAF Related
	SAML - We Improved the login via SAML to	
SUP-16226	redirect users to the launch page after login is completed.	KMS
SUP-16275	Accessibility -The issue where the “Subscribe” button was not keyboard accessible has been fixed.	KMS/KAF
SUP-16534	The number of media in a Category now displays the correct number and no longer, includes hidden entries.	KMS/KAF
SUP-16671	The issue where the Quiz admin module is not accessible after removing the player ID has been fixed.	KAF
SUP-16562	The issue where users that were previously set as “subscribers” could not be added as “members” has been fixed.	KMS
SUP-14980	SUP-15838 The “ChannelsSorting” field in the “Channels” module is now affecting the “channels” page sorting correctly.	KMS
SUP-16236	Flagged media is now displayed in KMS categories correctly.	KMS/KAF
SUP-14861	i18n - The translation for the “co-publisher” string in Spanish has been changed.	KMS/KAF
SUP-15929	i18n - We added translations for missing words in the German language.	KMS/KAF
KMS-	i18n - We added translations for missing words in	KMS/KAF

18453	the Dutch language.	
ID#	Summary	KMS/KAF Related
SUP-16365	The issue where users received the message "Access Denied" for private entries in My History page has been fixed.	KMS
SUP-16657	REACH - The issue where the "Edit Captions" button produces an "Access Denied" alert has been fixed.	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **HTML webcam recorder** - We are replacing the Flash recorder with a new HTML one.
- **BSE enhancements** - We are adding some new capabilities in the BSE allowing player selection and more.
- **Groups Support** - We are adding additional group capabilities in the KMS admin.
- **Collaborator** - new collaborator type: "Viewer".

## KMS Version 5.80.14 - December 14, 2018

Version: 5.80.14

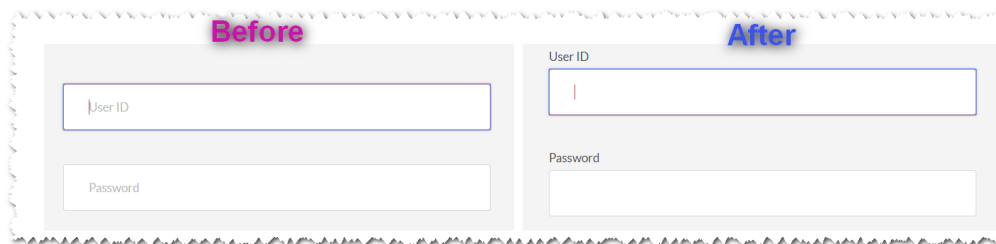

Date Released: December 14, 2018

## Overview

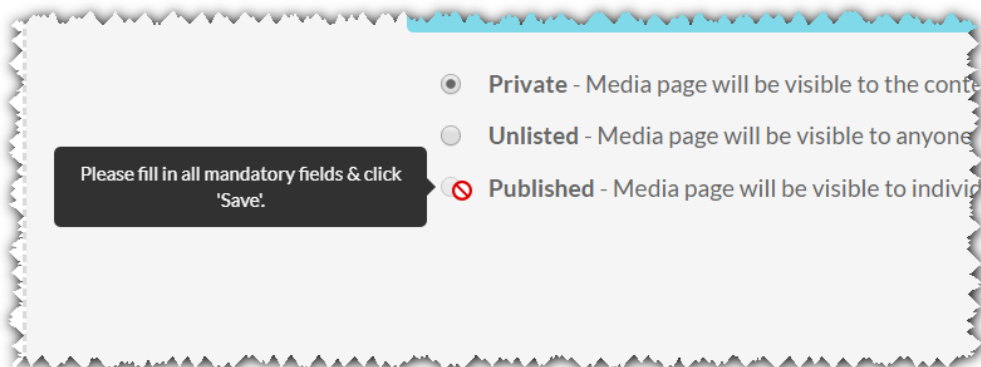

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.80.14, released on December 14, 2018.

## What's New for KAF & KMS

- **Accessibility** – Additional changes to support accessibility were introduced:
  - **Contrast button for our LMSs** – This is a great step with accessibility, that's allowing our LMS integrations to provide contrast mode. Turning the feature on is a simple click of a button from the accessibility module in your KAF admin. (1)
  - **Login Page Text Boxes** – To make it more accessible, we took the text out of the box. This change is only relevant for KMS instances not using SSO (which will be using an external login page). (2)
  - **Small fixes** – see in the Resolved Issues table.
  - **Multi languages** – Each language can be read by a SR.

- **Groups** - We added a new Group Sync module, similar to the SAML one, that will allow all you SSO gateway users to be assigned automatically to groups. See the new module information [here](#). (3)
- **Workflows** – We are improving the publishing workflow right after upload. A new tool tip allows users to know what they need to do before they can publish the video. (4)

- **UI v2** –
  - **Channel Carousel** – Introducing a new feature available in the UI v2 only. The Channel Theme currently holds the first feature that allows channel owners to customize their channels. Adding a Channel Carousel displays a playlist of videos on the top of the channel, instead of a static image. (5), This option is

configured in the [Channeltheme](#) module.

- **Language Flags vs. Text** - Since a language can be used in many countries, we added the ability to use text instead of flags when using multiple languages in KMS. Set the new '[showLanguageFlag](#)' field to "No" to activate this behavior.

(6)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-18307	In the History page UI, when there are many tags – the display is collapsed.	KMS
KMS-18789	[i18n] – A newly translated Language Pack was added for KAF, KMS.	KAF/KMS
PSVAMB-4492	The featured Media Gallery was refreshed and now matches the UI v2. (BB, JIVE)	KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
-----	---------	-----------------

ID#	Summary	Related
SUP-14134	Accessibility - We made sure that the 'aria-labelledby' have unique IDs.	KMS/KAF
SUP-14137	Accessibility - Input fields now contains a description in the login page	KMS
SUP-16274	Accessibility - Alt text has been added to the Attachments download button.	KMS/KAF
PSVAMB-2845	UI - We aligned the "Responsive Sizing" toggle button with the other elements on the embed tab.	KMS/KAF
SUP-14476	UI -The issue with the responsive layout for the Description "container" in a Channel was fixed.	KMS/KAF
SUP-14861	i18n - The translation for co-publisher in Spanish has been corrected.	KMS/KAF
SUP-14937	SUP-14937 The issue where analytics for Media Gallery showed no data (Moodle) has been fixed.	KAF
SUP-14980	SAML Logout issues when using 'useInternalLogoutPage' were fixed.	KMS
SUP-15432	The issue where media added to the Media Gallery by manager role (instructor) is pending moderation was fixed.	KAF
SUP-16096	UI - The first playlist on the list is now aligned properly.	KMS

ID#	Summary	KMS/KAF Related
SUP-16154	When Adding an Entry to a Playlist from the My Channels Label "Remove from Playlist" is no longer cut off.	KMS/KAF
SUP-16289	The issue where entry details information was not showing after Drag and Drop is now resolved.	KMS/KAF
SUP-16368	We added a solution to allow files upload in the KMS admin (e.g. CSS upload), when a session expires.	KMS/KAF

## Coming Soon

## KMS Version 5.79.19 - November 19, 2018

Version: 5.79.19

Date Released: November 19, 2018

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application

## What's New for KAF & KMS

- **Flash Dependency** – Flash components in KMS/KAF have been removed. Components on KMS/KAF and the KMS/KAF admin that contained Flash elements were replaced with a non-Flash component.(1)

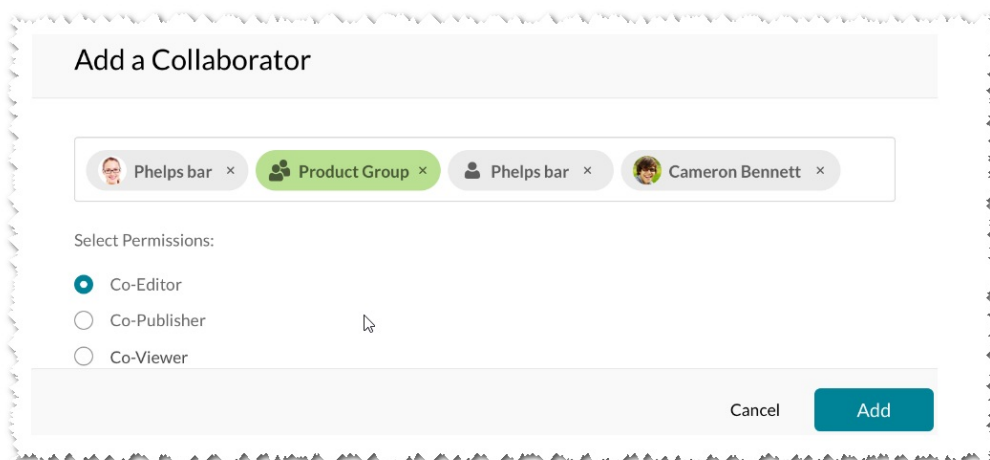

The Webcam recorder, will be replaced with HTML recorder in the next sprints. Of course, non-flash Kaltura Capture is available to all our clients.

- **Super-Fast Upload** – We have been working on decreasing the upload time. It is now 7 times shorter (as our tests show).  
Our upload process sends chunks of a file in parallel, thus utilizing the bandwidth to the max and increases the upload speed. (Relevant for KMS and KAF).(2)

- **Add User** –The Add User interface has been enhanced to allow multiple selection of users and groups with one click. This enhancement is part of our general Groups improvements. A visual component has been added to the groups and users that will let you differentiate between the 2 types.(3)

The change will take effect in the following locations:

- - Add member to a channel/gallery
  - Add Collaborator to an entry
  - Change Media Owner

- **Caliper 1.1 upgrade** – Caliper integration has been upgraded and supports Caliper 1.1.(4)

- **LTI Advantages (aka LTI 1.3) support** – Kaltura’s KAF is an early adopter of LTI Advantages. This will allow us to enable better teaching and learning experiences.(5)  
Please refer to the IMS Global information <http://www.imsglobal.org/lti-advantage-overview>, for more information.
- **Accessibility** – Additional changes to support accessibility were introduced (6):
  - Changed the WAI-ARIA role, state or property.
  - Set the language of page.
  - IE11 – Fixed the issue where the contrast button is removed upon page refresh.
  - Changed the way “Bold” tags are used to format

## New Features & User Stories

ID#	Summary	KMS/KAF Related
PSVAMB-4909	We have added the ability to set permissions for embedding media based on the co-publisher/editor in the <a href="#">Embed module</a>	KMS/KAF
KMS-15946	<p>The Continue Watching progress bar (aka History Progress bar) has been added to all the Search results <a href="#">pages</a>.</p>  <p>This app knows how you feel -- from the look on your <a href="#">face</a>   Rana el Kaliouby She demos a powerful new technology that reads your <a href="#">facial</a> expressions and matches them to corresponding Keyword found in: <a href="#">1 Tag</a>   <a href="#">1 Details</a>   <a href="#">20 Captions</a> <a href="#">Show More</a></p>	KMS/KAF
PSVAMB-4792	Additional Information in the form of Video Length was added to the Channel/Media Gallery Analytics Media Reports.	KMS/KAF
PSVAMB-3268	Added the ability to upload a custom font file from within the Styling module. For more information about setting custom fonts see <a href="#">here</a> .	KMS/KAF
KMS-16826	Guests/anonymous users can now be granted access to static pages even if anonymous is turned off. Read more about this setting in the Staticpages module <a href="#">here</a> .	KMS

ID#	Summary	KMS/KAF Related
KMS-17987	Guests/anonymous users can now be granted access to the Attachment Summary new field available in the Attachments module to turn this on.	KMS/KAF
KMS-18535	We improved the "More filters" arrow in the Search Filters screen by making their area of affect occupy a larger space, so they will be easier to click.	KMS/KAF
PSVAMB-4790	We added the User ID column to the Channel Analytics Engagement reports.	KMS/KAF
KMS-18111	<p>We added the player KS to static pages. You can now get end-user analytics for player events in the static pages.</p> <p>Additional Technical Info: When rendering a static page, it will replace {ks:entryId} and {userId} at runtime. (KS should be player KS with the given entryId. In case of anonymous it will generate uuid as the user.)</p>	KMS

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-18341	UI - The issue where Styling module "drop down text" value does not take effect on the site has been fixed.	KMS
KMS-18586	i18n - New language/PO files were added to the KAF applications with translation for missing words.	KAF
SUP-13561	UI - We adjusted the way a home page carousel looks with a single entry to match the basic view.	KMS
SUP-15731	We adjusted the responsive design in lower screen resolution to become aligned.	KMS/KAF
SUP-15657	We changed the names of the A-Z filters names in both My Media and Channels to match.	KMS/KAF

ID#	Summary	KMS/KAF KMS/KAF Related
SUP-15877	UI - The typo in the upload bar that shows progress in Mb (Megabit) instead of MB (Mega Byte) has been fixed.	
SUP-15576	The issue where clicking on media owner as guest is restricted has been resolved.	KMS
SUP-15866	UI - We made a change to the order of CSS files loading when using the Styling module and the CSS Upload module. Now, the CSS upload module will be last in the order, to remove the need of adding "important" on different properties.	KMS/KAF
SUP-13847	Playlists - We removed the empty channel playlists from display on the channel page. It is now displayed on the edit playlist page only.	KMS/KAF
SUP-12140	UI - The issue where long text on a webcast/live event will slide out of the thumbnail box has been resolved.	KMS/KAF
SUP-15416	The issue where "Appears in" drop down in channel playlist only shows the first category has been resolved.	KMS
SUP-13806	UI - The location of the Nested filters bar in the entry's edit page has been changed.	KMS/KAF
SUP-15724	The issue where channel ID field for carousel was missing from the Home module has been fixed.	KMS

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Groups Support** – We are adding additional group capabilities in the KMS admin.
- **HTML webcam recorder** – We are replacing the Flash recorder with a new HTML one.
- **Collaborator**– new collaborator type: "Viewer"

## KMS Version 5.78.10 - October 15, 2018

Version: 5.78.10

Date Released: October 15, 2018

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.78.10, released on October 15, 2018.

### What's New for KAF & KMS

In this version, we have mainly added more features to the new search:

- Browse Search & Embed (BSE) Enhancement** – We are continuing to enhance the BSE feature and changed some of the BSE workflows to improve performance and usability.  
 We reviewed all the BSE workflows to make sure they work seamlessly and added the “Save & Embed” button to follow the end users while navigating through the different BSE pages. The “Save & Embed” button will ensure users’ continuous progress while working with the BSE pages. [\(1\)](#)
- Kaltura Search** - We have added support for the new search in the following pages: Entry Page, Add to Channel/Gallery, and IVQ Creation Page [\(2\)](#)  
 We also added the Recent search feature, which allows you to see your search history on the search text bar [\(3\)](#)
- SAML Group Sync** – We corrected and made some changes to the SAML Group Sync module for the error handling, and support. If an error occurs, the end user is presented with a meaningful message, and debug info they can send to their admin or to Kaltura Support. [\(4\)](#)

### Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-10542	Reach – Blackboard mashups without transcript	KAF

18343	widget no longer increases their height	
ID#	Summary	KMS/KAF Related
SUP-14246	Player - The issue when using embedded playlist with URL parameters (FlashVars) in embed code from KMS has been fixed.	KMS/KAF
SUP-15005	Media titles for long titled videos now display correctly in the related media section	KMS/KAF
SUP-13054	UI - The channel banner in the Edge browser is now displayed correctly. ('Sharp ' display instead of 'Blur')	KMS
SUP-15340	A typo in the admin configuration page ('kalturacapture' module) has been corrected.	KMS/KAF
SUP-15048	The issue with the static pages was fixed, and now supports appending URL parameters to static pages.	KMS
SUP-14612	Media description issue with '+' signs was fixed.	KAF
SUP-15224	The delete option for a playlist that was lost when resizing browser size has been restored.	KMS
SUP-13806	UI - The nested filters header was displayed under the wrong div and has now moved to the correct one.	KMS/KAF
SUP-15427	Timeline - Black thumbnails are no longer displayed on the player when creating a chapter.	KMS/KAF
SUP-15195	Player/Chapters bar - The Scroll Bar in Chapters is displayed correctly in all player sizes.	KMS/KAF
KMS-18453	i18n - Missing words in the Translation files were added to the English PO file.	KMS

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Groups Support** – We are adding additional group capabilities in the KMS admin and in the ‘Add User’ pop up.

## References

(1) KMS-16735; (2) KMS-16801; (3) KMS-14853; (4) KMS-18465, KMS-18511, KMS-18466

## KMS Version 5.77.14 - September 26, 2018

Version: 5.77.14

Date Released: September 26, 2018

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.77.14, released on September 26, 2018.

## What's New for KAF & KMS

In this version, we have mainly added more features to the new search:

- **Captions Filter**– A common request to have the ability to filter entries containing closed captions was added to the new search capabilities. [\(1\)](#)
- **Added new search support** – The new search has been added to the following pages: Create new IVQ page, Entry page, and Add to Channel/Gallery page. [\(2\)](#)
- **Custom Metadata Filters Selection** – While you may filter your search according to Custom Metadata, it is possible that not all custom fields should be used. We added the ability to select which fields should be set as filters. This feature is configured in the [Customdata module](#). [\(3\)](#)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-17900	Default of My-Media ownership filter was changed to "any owner", allowing users to see by default content they own, co-publish, and co-edit.	KMS/KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
SUP-15284	Blocked the old search page URL from all KAF instances.	KAF
KMS-18477	Browsers, Firefox – An entry with a long title and without spaces is no longer cut on the My Media page in the new search when using Firefox.	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Groups Support** – We are adding additional group capabilities in the KMS admin and in the 'Add User' pop up.

## KMS Version 5.76.12 - August 27, 2018

Version: 5.76.12

Date Released: August 27, 2018

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.76.12, released on August 27, 2018.

## What's New for KAF & KMS

**BSE Workflows Enhancements**- We listen! After feedback from you, we have made many improvements to the BSE (Browse, Search & Embed). The changes are diverse, from simply adding a Refresh button, to other complex changes like faster loading time. The following lists the current changes:

- **New Upload**- We added the ability to drag and drop files when uploading via the BSE. Currently, the drag and drop works for only 1 video at a time, but bulk upload is on its way. Good news – this feature is also available in KMS. (1)
- **New Refresh Button**- We added a “Refresh” button on the BSE main page. This allows better support for Kaltura Capture and CaptureSpace workflows.(2)
- **Faster BSE**- Changes to the backend to use less API calls provide better BSE performance. (3)
- **Minor Style Changes**- We changed some buttons colors and made some alignment changes to elements(4)

**New Search Items**- Additional changes and improvements have been made to the new search feature.

- Added the Shared Repository filters to the custom data filters. The little cog will no longer be visible, and the Shared Repository filters will be included with the rest of the filters.(5)
- All irrelevant filters for chosen options are now hidden (e.g. the duration is hidden if images are selected).(6)
- Support for default sorting value in galleries.(7)

## What's New for KAF

**KAF Security Enhancements**- Additional layers of security have been added to all KAF applications.

- Disabling the “allow anonymous” mode for KAF instances. (8)
- Enhanced entry URL security, so users cannot get to an entry by guessing the entry ID. (9)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
PSVAMB-3644	Additional xAPI events were added to the list of supported events..	KMS/KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-18136	IE browsers - Fixed the issue where the “forceIECompatibilityMode” did not work with very long description entries.	KMS
KMS-18320	UI - Adjustment to the brighter font color in some KMS objects.	KMS/KAF
SUP-11628	UI/Live – The “Start Streaming” button was relocated due to the collision with the publishing status button.	KMS/KAF
SUP-14569	Auth - Set KMS to ignore SSL verification when using automaticIdpMetadata.	KMS
SUP-14843	Webcast – Fixed the counting issue, when webcast entry was unpublished from a channel, the channel kept the same count. (This was due to the VOD entry).	KMS/KAF
SUP-15142	The set thumbnail action for clipped entries now works as expected.	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Groups Support** – We are adding additional group capabilities in the KMS admin and in the ‘add user’ pop up.

## KMS Version 5.75.17 - July 30, 2018

Version: 5.75.17

Date Released: July 30, 2018

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.75.17, released on July 30, 2018.

## What's New for KMS

- **New Search** – The look and feel of the new search filters has been enhanced to better support accessibility features and to display better.(1)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
PSVAMB-3012	When using Scheduling or Webcasting, admins can select whether to show the dates and times in the user's local time zone. In the KMS admin page <a href="#">Application</a> module , set the 'useUserTimezone' field to Yes.	KMS/KAF
KMS-14977	UI: Due to the automated translation (REACH), the amount of tags per entry has become very large. We have made visual changes to limit the amount of tags shown in My-Media.	KMS/KAF
KMS-17495	Text: Corrections were made to the KMS admin page in the Auth module.	KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-18092	When choosing a quiz for a gradebook integration, the BSE page now filters media types to display only quiz, automatically.	KAF
SUP-14430 SUP-14641	Webcast: We enabled the ability to change the webcast thumbnail of an event before it ends. In addition, admins can now set a default thumbnail for all webcast entries other than the Kaltura default thumbnail.	KMS/KAF
SUP-14633	The issue where users were idle on the site causing the session to expire in certain pages has been fixed.	KAF/KMS
SUP-14888	The issue where the Cielo24 transcript player plugin caused issues in playback has been fixed.	KMS/KAF
SUP-13251	The "Download locales" button on the admin page editor tab is now working properly in all browsers.	KMS/KAF
SUP-14388	The Dropdown list for channel managers and moderators now show as supposed to be.	KMS
SUP-12140	The text on the thumbnail for webcast entries has been shortened.	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **BSE Enhancements** - We will be smoothing the workflows and adding new capabilities.
- **Groups support** - We are adding additional group capabilities in the KMS admin and in the 'add user' pop up.

## KMS Version 5.74.30 - July 8, 2018

Version: 5.74.30

Date Released: July 8, 2018

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.74.30, released on July 8, 2018.

### What's New for KMS

- **Revamped Search Engine** – The new and improved Search includes additional new filters and search capabilities such as partial search, synonyms and more. The new search is now available on KMS and KAF.(1)

For more information please see:

- [Kaltura Media Search Admin Guide](#)
- [Kaltura Media Search User Guide](#)

- **KMS-KAF Interoperability**– As the first phase in the larger effort implementation of KMS-KAF interoperability – we added the ability for end users to see where content is published outside the current application. If content is published to another KMS, LMS, or both, users will be able to see where else media is published.

This new feature is available from the [Categories module](#). Additional documentation will be added later.(2)

### New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-17601	Numbers Format Globalization – Added number format support per language. Since numbers can be formatted differently (e.g. where "." represents thousands instead of ",") we added support for the numbering per the locale chosen.	KMS/KAF
KMS-17140	New instances' comments default - We have updated the new defaults for KMS/K	KMS/KAF

### Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-17540	Text – A typo was fixed in the Styling module text	KMS
SUP-12846	Webcast – the Issue where the ampersand "&" character of a Webcast event does not render properly was fixed .	KMS/KAF
SUP-14202	The color black was added to the channel description text editor color selection.	KAF
SUP-14444	Webcast – Changes were made to the embed code to differentiate between embed of a live entry and a VOD and add or remove the Q&A feature respectively.	KMS
SUP-11966	UI – Made some changes to the titles of channels in the ‘Channels’ page, to show aligned left.	KMS
SUP-14596	The issue with access to the Media Gallery via the ‘appears in’ link has been fixed.	KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **BSE Enhancements** – We will be smoothing the workflows and adding new capabilities.
- **Groups support** – We are adding additional group capabilities in the KMS admin and in the ‘add user’ pop up.

## KMS Version 5.73.24 - June 4, 2018

Version: 5.73.24

Date Released: June 4, 2018

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.73.24, released on June 4, 2018.

### What's New for KMS

- **Automatic Groups sync via SAML**– A new feature has been added that allows the admins to setup KMS to map SAML groups to Kaltura groups.  
This is the first phase in the larger effort to add automatic and manual groups' management. Additional features are planned for later this year to enrich groups' capabilities in KMS and KAF. For more information see the [Group Support in Kaltura Applications and Kaltura Groups FAQ .\(1\)](#)

### New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-14077	New instances' players - We updated the default players that are loaded with new instances. While this is not relevant to existing instances, we do recommend all administrators to update KMS and KAF players to the latest versions using the KMC Universal Studio.	KMS/KAF
KMS-17595	New instances' comments default - We have updated the new defaults for KMS/KAF instances to have time-based comments ON by default. While this change does not apply to existing instances, we do recommend turning on this great feature from the KMS/KAF admin page, under the <a href="#">Comments</a> module.	KMS/KAF

### Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-17540	Text – A typo was fixed in the Styling module text	KMS
SUP-12846	Webcast – the Issue where the ampersand "&" character of a Webcast event does not render properly was fixed .	KMS/KAF
SUP-14176	Collaboration – When using the Media Change Owner feature an alert will pop up if the media is published in channels/galleries which the new owner is not entitled to. We have made the change to show ALL such categories, and not just the first few.	KMS
SUP-14181	Webcast – When a Webcast entry was published to moderated channel, only the live entry was approved, but not the VOD media. We have made the change so both entries are affected upon approval/rejection by the moderator.	KMS/KAF
SUP-11966	UI – Made some changes to the titles of channels in the ‘Channels’ page, to show aligned left.	KMS
SUP-14409	Accessibility – In the KAF BSE page, we added to the “Select” button label, not just the name of the button, but also what media you are selecting.	KAF
SUP-14008	Playlists – Fixed the issue where if the “embedplaylist” module is turned off, users cannot delete their playlist.	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Search.** New and enhanced search capabilities will be added to KMS and KAF. Enhanced filters, additional results information and support for custom metadata fields will be added with the new search.

## KMS Version 5.72.10 - May 7, 2018

Version: 5.72.10

Date Released: May 7, 2018

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.72.10, released on May 7, 2018.

### What's New for KMS & KAF

**Policy Controlled Features (1)** - There are many changes in feature policy management that are rolling out across browsers vendors and have already taken affect in Chrome. These changes allow site authors to selectively enable and disable use of various browser features and APIs.

One of the changes in the policy-controlled features include the ability to enable setting permissions for various attributes across contexts (iFrames), such as auto-play, encrypted media playback, use of camera and microphone and others.

Kaltura is working to make sure that these changes are compatible with Kaltura products and has therefore implemented additional permissions to Kaltura iframe embeds

More information can be found [here](#). A list of features that will require explicit enabling can be found [here](#)

### Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-17347 SUP-13433	Correct an issue when using custom CSS, the Styling module, and new UI, to allow them to work together.	KMS/KAF
SUP-13116	The issue where using wide images caused the channel logo to exceed the screen border was	KMS

ID#	Summary	KMS/KAF Related
KMS-17128	fixed IVQ: We have set the order of the questions in the analytics to be presented according to the question appearance time and not the creation time.	KMS/KAF
SUP-11994	UI - IE11: Display issues in IE11 on the channel analytics page have been corrected	KMS/KAF
SUP-12610	Shared repository – The green ‘published’ button icon has been fixed.	KMS/KAF
SUP-13695	Shared Repository – adjusted the location of the Shared Repository custom fields.	KMS/KAF
SUP-14010	When performing a channel import, users are now able to see more than 50 channels	KMS/KAF
SUP-14224	The workflow of adding a Youtube entry to a channel was fixed	KMS
SUP-12831	Made some adjustments to the unlisted media workflow. When Unlisted used with scheduling, and the entry is outside of the scheduling window, you will no longer be required to login	KMS
SUP-13739	We made some changes to the API of setting a flavor as source. This is relevant only in cases where the source is deleted, and you wish to use other flavors for the clipping and trimming features	KMS/KAF
SUP-12661	Fixed the ‘Published In’ indicator on the entry page, to show all the categories to which the video is published to.	KMS/KAF
SUP-12550	The issue with incorrect entry count in channels due to caching was resolved	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Search.** New and enhanced search capabilities will be added to KMS and KAF. Enhanced filters, additional results information and support for custom metadata fields will be added with the new search
- Other items that we are secretly working on are more IVQ accessibility additions, new Reach capabilities, and more in the Kaltura Video Editing Tool department.

## KMS Version 5.71.16 - April 9, 2018

Version: 5.71.16

Date Released: April 9, 2018

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.71.16, released on April 9, 2018.

### What's New for KMS

- **Responsive embed** - Users can grab responsive embed code that enables the embedded player to resize according to the browser's dimensions. The [embedResponsiveness](#) field in the Embed module should be used to configure this feature. (1)
- **Multi-Auth**- We added the "logout" URL in the KMS admin 'AUTH' module; Just in case you can't find it in the Multi-Auth guides(2)

### What's New for KMS & KAF

- **Interactive Video Quiz** -Admins can configure the new Quiz options using the [enableQuestionsV2](#) and [allowedRolesQuiz](#) in the Quiz Module. For more information see the [Kaltura Interactive Video Quizzes Administrator's Guide](#).

- **Player Accessibility**—Additional changes to support accessibility standards for the player have been implemented:
  - Testing and adjusting screen reader support for Chapters and Slides has been implemented (3)
  - Verified that the keyboard focus does not change location when in a dialog screen (4)

## New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-16706	Security – jQuery was upgraded to the most recent version	KMS/KAF
PSVAMB-245	A confirmation pop up option was added for moderation approval/reject workflow in the Categorymoderation and Channelmoderation Modules	KMS/KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
PSVAMB-2456	When using the new KMS logo upload feature, images are only displayed in the KMC	KMS
SUP-13116	The channel analytics are now consistent when considering the current owner of the content vs the original uploader	KMS/KAF
SUP-12432	A live entry's VOD can now be downloaded from the Download module, in addition to the existing player download capability	KMS/KAF
SUP-13907	On-Prem only – You can now change entries from Private to Unlisted in bulk	KMS
SUP-13652	The entry's description now displays correctly when using a special combination of characters.	KMS/KAF
SUP-13695	The Kaltura Video Editing Tools now loads properly for users that contain an apostrophe in their last name.	KMS/KAF
SUP-12256	It is now possible to copy/paste the caption's label when uploading a new caption file to a video	KMS/KAF
SUP-13247	The Custom favicon will now show in the login page even when Anonymous Users are not allowed	KMS

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Search.** New and enhanced search capabilities will be added to KMS and KAF. Enhanced filters, additional results information and support for custom metadata fields will be added with the new search

## KMS Version 5.70.18 - March 12, 2018

Version: 5.70.18

Date Released: March 12, 2018

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.70.18, released on March 12, 2018.

### What's New for KMS

- **Multi-Authentication**- KMS provides support for the following types of authentication methods: LDAP, SAML, SSO Gateway, and Kaltura authentication. Until now, only one type of authentication method was supported, and combinations of the different types of authentication methods were not available. KMS is now able to support multiple types and combinations of authentication methods and allow users to login through different authentication methods. A common use case for example, is for external users, who do not have the same access as internal users. With this new feature, external users may login with LDAP credentials, and internal users with SAML credentials. Read more about it in the article [Authenticating Using Multiple Authentication Providers to Access Kaltura MediaSpace](#) see the [Kaltura MediaSpace Setup Guide](#)for setup instructions..(1)

### New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-16627	KMS Admin - The collapse mechanism was added in the KMS Admin Console to allow a more organized work area.	KMS/KAF
KMS-14976	Share - When the hidden 'default entitlement enforcement' flag is turned on, the Facebook and Twitter modules are now able to use the Share feature.	KMS
KMS-16938	Accessibility - Adjustments and improvements have been made to the contrast button	KMS
PSVAMB-1819	KMS Admin - The KMS Admin now allows the admins to upload a file to setup the <a href="#">KMSheader logo image</a> , and not just a through URL.	KMS

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-16923	KMS Admin – The Backup Configuration button 'Last configuration save date' is now working properly.	KMS/KAF
KMS-16986	Custom Data – Support has been added for the URL patterns in the 'text' custom metadata of type 'Multiple Text'.	KMS/KAF
SUP-12446	Embed – Additional URL parameters are now working with the playlist player embed.	KMS
SUP-11759	KS-based KAF (e.g. Jive) - Fixed the Share Repository (SR) behavior within BSE through the "allowSharedRepository" privilege.	KAF
SUP-12955	V2UI – The thumbnail display issue on iOS Mobile Browser in the Pending tab was fixed.	KMS/KAF
SUP-13433	V2UI –The issue where applying the new Styling Module conflicts with V2UI due to access control was fixed.	KMS/KAF
SUP-11657	V2UI – The thumbnail hover effect on the channel playlists has been removed.	KMS/KAF
SUP-12137	V2UI – In some browser dimensions (width off 1897px), Media Gallery shifted to the right when V2UI is enabled in KAF has been fixed.	KAF
SUP-13296	The issue where a large gallery tree slowed the KMS page load has been fixed.	KMS

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Search.** New and enhanced search capabilities will be added to KMS and KAF. Enhanced filters, additional results information and support for custom metadata fields will be added with the new

## KMS Version 5.69.19 - February 12, 2018

Version: 5.69.19

Date Released: February 12, 2018

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.69.19, released on February 12, 2018.

### What's New for KMS

- **Entry Design**- We have added the ability to customize the look and feel of each individual entry. Design features for example are choosing different player, background color, logo, and more.(1)For more information see [Customizing the Media Entry Display for Kaltura MediaSpace Entries](#) .
- **Accessibility**- More? Yes! We are adding additional support for accessibility on the new UI for screen reader, enhanced contrast support and more. See the [New Features](#) section for more information.

### What's New for KMS and KAF

- **Backup and Restore**- Admins can save a snapshot of the current KMS or KAF configuration as a 'Last Good Configuration' and can use it to restore the configuration later if needed. See [Kaltura MediaSpace and Kaltura Application Framework Configuration Modules](#) for more information.(2)

### New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-16597 / KMS-16811	Accessibility - Contrast button now adjusts the Carousel color, to support the text on it.	KMS
KMS-16598	Accessibility - Added missing focus on several elements.	KMS/KAF
KMS-16599	Accessibility - Contrast button is now visible when using a dark style.	KMS
KMS-16600	Accessibility - Buttons which were not fully interpreted by the screen reader are now readable.	KMS/KAF
KMS-16601 / KMS-16753	Accessibility - Adjusted the order of tabbing between buttons when using the keyboard to navigate	KMS/KAF
KMS-13688	Added support for URL patterns in KMS 'text' custom metadata	KMS/KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
SUP-13066	Changes to the styling module to allow a faster load of the module	KMS/KAF
SUP-13308	Fixed the channels' Subscribe button to work in IE 11	KMS
SUP-11758	Adjustments to the captions search results, to provide a more accurate "just to video" experience	KMS/KAF
SUP-13073	Allowing a large file upload (more than 10GB) when the admin set a short session life time for KMS	KMS
SUP-12682	Added support for the single quotation mark character in text when using the add collaboration workflow	KMS/KAF
SUP-12504	Download button is now available on tablet dimensions	KMS/KAF
SUP-12258	Share using 'Copy URL' is now available in tablet and mobile view	KMS
SUP-12591	Adjusted the 'share video via email' workflow to allow a better display of the entry's description	KMS
SUP-11811	Rich text can be added and displayed for the channel's description	KMS

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

- **Search.** New and enhanced search capabilities will be added to KMS and KAF. Enhanced filters, additional results information and support for custom metadata fields will be added with the new search

## KMS Version 5.68.12 - January 11, 2018

Version: 5.68.12

Date Released: January 11, 2018

## Overview

These release notes pertain to KalturaMediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.68.12, released on January 11, 2018.

### What's New for KAF

- **Kaltura Video Editing Tools** - The Clip and Trim features are replaced with the new Kaltura Video Editing Tools. As part of the efforts to remove Flash from KMS and KAF, the new Kaltura Video Editing Tools will be not just the home of the Clip and Trim, but also for the Quiz, and future video editing capabilities (such as chop and splice – a true Ninja).<sup>(1)</sup>For more information see [Kaltura Video Editing Tools - User Guide](#).
- **Removed Features**- As part of moving along with the advance of technology, and as most browsers have removed support for Java and Flash, we have retired the Java based Kaltura Screen Recorder (KSR) which was replaced with CaptureSpace <sup>(2)</sup>. Another feature that was retired is the Flash based Video Presentation which was replaced with the in-player chapters capabilities <sup>(3)</sup>.The announcement to stop supporting these two features was around the end of 2016, and a migration effort took place for the Video Presentation feature. Onwards and Upwards!
- **Webcast**- For you webcast users, we are making some adjustments, and from now on, the archived videos from the webcast application will show up in KMS/KAF, and not just in the KMC. <sup>(4)</sup>Read more in the [Kaltura Webcasting Release Notes Page](#)
- **Accessibility**- More? Yes, we are constantly adding more and more accessibility features and support to our new UI. Adding any missing keyboard focus, making sure that each element is reachable by tabbing, screen reader support for all elements, and contrast. <sup>(5)</sup>

### New Features & User Stories

ID#	Summary	KMS/KAF Related
KMS-16149	It is now possible to add KMS-Go translation files through the Language Module in KMS.	KMS
KMS-14066	Accessibility – We have adjusted the contrast button to work with the v2UI.	KMS
KMS-16064	LTI – We have added support for the existing LTI's Content Item Message to return the "data" parameter if applicable.	KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-16037	v2UI- Fixed the color of text in the headerMenu when using the KMS dark header style.	KMS
SUP-11786	IE - The 'Channel Edit' icon on the channel thumbnails is now available in 'My Channels' page.	KMS
SUP-13063	IE - The Home page carousel no longer appears blurry in IE11.	KMS
SUP-11586	REACH - We made some adjustments to the caption requests table, to make it more responsive.	KMS/KAF
SUP-11794	v2UI - Switching HeaderStyle color between light/dark will now also affect the vertical menu color to the relative color.	KMS
SUP-11573	v2UI - A small visual change has been implemented to remove some redundant spaces in the entry view page.	KMS/KAF
SUP-13056	We set the upload mechanism to keep long uploads safe even if the user's login session has expired. This will allow users to upload files even if the admin set a shorter session life.	KMS/KAF
SUP-11811	We changed the rich text in the Channel Description to display in plain view, and not just when clicking the "Read More".	KMS

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

1. **Search.** New and enhanced search capabilities will be added to KMS and KAF. Enhanced filters, additional results information and support for custom metadata fields will be added with the new search.
2. **Entry Design.** We are intending on adding the ability to customize the look and feel of each

individual entry, for example, different players, background color, logo, and more.

## KMS Version 5.67.17 - December 18, 2017

Version: 5.67.17

Date Released: December 18, 2017

## Overview

These release notes pertain to KalturaMediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.67.17, released on December 18, 2017.

### What's New for KAF

- **KAF/Brightspace** – As we are working on adding the Gradebook capabilities to Brightspace, you will see some changes as in [KMS-16126](#). This is a change to the LTI XML that KAF sends to the LMSs. Since this is just an add on, the change will not be seen on the LMS until we add the gradebook capabilities..[\(1\)](#)

### New Features & User Stories

ID#	Summary	KMS/KAF Related
PSVAMB-425	We added the "Download Action" analytics in the Download Module.	KMS/KAF
KMS-15956	The Kaltura Webcasting download link has been updated to the Kaltura Webcasting version.	KMS
KMS-16126	The KAF xmlns have been updated to send a newer XML.	KAF

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-16036	History - The History Page display (number of entries displayed) issue has been resolved.	KMS
KMS-16150	The Warning message on the "Upload media" page that appeared between buttons now displays correctly.	KMS/KAF
SUP-12182	Changed the Disclaimer Module so the custom data is set to 'False' automatically.	KMS/KAF
SUP-12717	The issue when filtering "All Media" in table view has been fixed.	KMS
SUP-12410	The issue that caused a delayed response in the Blackboard's My Media Edit page has been resolved.	KAF
SUP-12440	The icon in the channel's analytics page has been changed.	KMS/KAF
SUP-12381	LDAP authentication no longer fails when the Auth Module is saved without the tlsCipherSuite.	KMS
SUP-11540	The Flashvars from Secure Embed URL have been removed so the KMS modules can dynamically add them.	KMS
SUP-11468	Added support for special characters (& Ampersand) in username	KMS/KAF
SUP-11633	UI: The Channel banner in IE is now blurred, and Description and Tags are legible.	KMS

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

1. **Kaltura Video Editing Tools.** (Limited availability) Clip and Trim will be replaced with new Kaltura

Video Editing Tools. As part of the efforts to remove Flash from KMS and KAF, the new Kaltura Video Editing Tools will be not just the home of the Clip and Trim, but also for the Quiz, and additional video editing capabilities (such as chop and splice – a true Ninja). Try the new editor out at our [demo KMS page](#). For more information see [Kaltura Video Editing Tools - User Guide](#).

2. **Search.** New and enhanced search capabilities will be added to KMS and KAF. Enhanced filters, additional results information and support for custom metadata fields will be added with the new search.

## KMS Version 5.65.12 - October 23, 2017

Version: 5.65.12

Date Released: October 23, 2017

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) and Kaltura Application Framework (KAF) version 5.65.12, released on October 23, 2017.

## What's New for both KMS and KAF

- **KMS Admin** – As an admin, you will now be able to download the list of all KMS/KAF users. (1)
- **IVQ Localizations** - Learn how to change the language for IVQ text [in this guide](#). In addition, the IVQ player texts are now translated to all basic languages - see the list of supported languages [here](#). This means that changes to the KMS/KAF language will automatically change the IVQ language as well.
- **IVQ Customization**- Find [CSS examples](#) and a [guide](#) on how to change colors, fonts, and the general theme of the quiz in the IVQ page.

## What's New in KAF

- **KAF Analytics - Caliper** – The new Caliper integration is getting a new boost. You can now send the Caliper events and details directly to your LRS (assuming it is supported) if your LMS does not have Caliper support yet. Fill in the 3 fields and you are good to go.[\(2\)](#)

## Resolved Issues

ID#	Summary	KMS/KAF Related
SUP-11780	Player – on the player version 2.57 and above, the chapter scroll is not working when using the bar. The mouse scroll is working properly. Fixed on player version 2.61.	KMS/KAF
SUP-11687	Webcast - When creating a new webcast event, the Disclaimer module text (when enabled) no longer covers some of the text.	KMS
SUP-11612	IVQ – A new quiz now retains the the co-editor as the owner when the co-editor created the quiz from the video.	KMS/KAF
SUP-11864	KMS – Bulk approval of entries is now working in channels.	KMS/KAF
SUP-11800	Adjusting the channel/gallery embed modules, now woks and allows the embed override by the admin when using secure embed.	KMS
KMS-15574	KMS Admin – The problem with the Mask Cielo24 account password in the KMS admin module has been fixed.	KMS/KAF
KMS-15415	KMS Admin – Only admins can see the KMS version.	KMS

## Known Issues

ID#	Summary	KMS/KAF Related
SUP-11743	KMS BE – The issues when selecting "unsubscribe" that removed the user subscription, and retained the user object has been fixed.	KMS/KAF

## Coming Soon

Here is a sample of items to be released on our upcoming versions:

1. **Kaltura Video Editing Tools.** (Limited availability) Clip and Trim will be replaced within this new Kaltura Video Editing Tools. As part of the efforts to remove Flash from KMS and KAF, the new editing tools will be not just the home of the Clip and Trim, but also for the Quiz, and additional video editing capabilities (such as chop and splice – a true Ninja).
2. **Search.** New and enhanced search capabilities will be added to KMS and KAF. Enhanced filters, additional results information and support for custom metadata fields will be added with the new search.

SUP-11360	Thumbnail disappears on dual screen player when using audio entry	KMS/KAF
KMS-15096	Self-signed SSL certificate prevents webcasting desktop app to launch	KMS

## KMS Version 5.63.15 - August 28, 2017

**Version: 5.63.15**

**Date Released: August 28, 2017**

## Overview

These release notes pertain to Kaltura MediaSpace (KMS) version 5.63.15, released on August 28, 2017.

What's New for both KMS and KAF

- **Test the New UI** – This new feature will allow the admin to preview how KMS will look with the new UI, without turning on the V2ui module for all users. To use the feature, login to the KMS/KAF admin, navigate to the V2ui module and follow the on-page instructions.
- **Accessibility Improvements** – The missing label and area tags for screen readers were added, and the ordering of content in the tabbing and screen readers is logical. Adjustments were also made to the contrast button.

## What's New in KMS

- **Search Capabilities** – A preview of the upcoming search efforts planned for this year are introduced in this release. You can search through KMS directly from the KMS URL using a 'tab'.
- **Additional SAML Admin Improvements** – Improvements for the technical team setting up their SAML integration have been made. Support for a larger metadata XML has been added. XML with mixed IDP and SP for the automatic metadataMode is supported.
- **Accessibility Improvements** – The "Skip to content" link in the KMS header was added that allows you to skip all the galleries and header menu items and go directly to the content.

## Resolved Issues

KMS-14708	In the Channel information bar, the user dropdown is now displayed properly.	KMS
KMS-14509	When enabling the new UI on KAF, the BSE (Browse Search & Embed) player is displayed properly and no longer displays with a scroll bar.	KAF
	The issue that caused users with 'allowEdit' permission not to be able to see the "Cantion Requests" link even though	

ID#	Summary	KMS/KAF Related
REACH-167	‘allowView’ permission was been granted to them has been fixed	KMS/KAF
REACH-161	You can now order captions for Webcast type entries.	KMS/KAF
REACH-156	A co-editor can now view the caption requests list.	KMS/K

## Known Limitations

ID#	Summary	KMS/KAF Related
KMS-13879	Accessibility - Contrast - The ‘Loading’ text should be accessible.	KMS
KMS-14954	The 'Delete Entry' button is on top of the disclaimer message.	KMS

## KMS Version 5.62.18 - August 1, 2017

**Version: 5.62.18**

**Date Released: August 1, 2017**

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) version 5.62.18, released on August 1, 2017.

What's New for both KMS and KAF?

- **My History and Resume Playback** - This new feature will take you to where you left off the last time you watched a video, and let you continue from the same place, from every device.  
For information on how to use this feature, see the [Kaltura My History and Resume Playback](#) article. This feature is enabled and configured in the History module by your admin. Admins can refer the [Kaltura History Module - Administrator's Guide](#) for instructions on how to setup and configure this feature.
- **New UI** -The newly released theme (v2 UI) just keeps getting better and better. We

made some adjustments to whitespaces to make it look just right. We've moved a few icon's positions and aligned some of the text to make the new theme shine.

## What's New in KMS?

- My History Page** – If you were wondering what you watched last, and where is that video you started watching a week ago, the new 'My History' page is now available in KMS.  
 The History module allows end users to reach the “My History” page in KMS and watch their viewing history.
- Recently Watched and Continue Watching Playlists** – New on the Home page, 2 playlists that can be turned on to show each user the recent videos they watched (taken from the My History page), or what the user started watching and might want to continue watching.  
 Enable these 2 playlists from the History Module, and then set them on the Home Module.
- SAML Admin Improvements** – With the changes introduced last release to LDAP and SAML in KMS, we are adding some additional items for the SAML module in the effort of introducing self-serve authentication setup capabilities. One of the new changes, is the new SAML AuthNAdapter in the AUTH module. We also added a log map to allow troubleshooting the login after setup.  
 See the [Kaltura MediaSpace™ SAML Integration Guide Troubleshooting](#) section for additional information.

## Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-14123	Timeline feature - the Upload Deck image/button has been resized.	KMS/KAF

SUP-10600	When changing the language via the Sakai LMS, the KAF elements (My Media and Media gallery) are changed as well.	KAF
SUP-10591	The Pound (#) character in Channel's name now allows you to save changes to the channel.	KMS
	Media Upload workflow - The Drag and Drop feature no longer	

SUP-10213 ID#	causes the media to be uploaded several times. Summary	KMS/KAF KMS/KAF Related
	Entry Publish Page - The checkbox now appears for eligible	
SUP-11391	categories when the number of private/restricted galleries is greater than 500.	KMS
SUP-10987	Embedplaylist - Using secureEmbed together with allowAnonymous has been fixed and autoRedirect now works properly.	KMS
SUP-11423	The Jive Extension on Internet Explorer has been fixed and no longer falls back to the old KSU uploader in the BSE.	KAF
SUP-11545	In a channel using Ulv2 and IE11, the drop down of names is invisible	KMS
SUP-11326	Download feature - the cache time on the flavors is long. If a user tries to download before the flavors are ready, the response will be cached for 30min.	KMS/KAF
SUP-11344	KMS Search - When searching a letter, the results come back with the owner as a link VS when searching a full word, the results come back with the owner in simple text.	KMS
SUP-10707	In the analytics dashboard, when moving to a different tab and navigating back to the dashboard tab, and selecting a different timeframe, the analytics results disappear.	KMS/KAF
SUP-10972	Player progress bar in Chrome - when pausing and dragging the progress bar indicator outside of the player, the indicator "stick" to the mouse until another click.	KMS/KAF
SUP-11128	Webcasting - when inviting attendees only the event name and description appear.	KMS
SUP-11397	Cache issue in content that existing in the open gallery and related public channel sends users to login.	KMS

ID#	Summary	KMS/KAF Related
SUP-10659	When KMS uses Access control - Quiz Editor will produce "We're sorry, this content is only available on certain domains."	KMS/KAF
SUP-11336	Ownership of a live entry changes to a random co-editor while broadcasting.	KMS/KAF
KMS-14823	(Out of cycle fix) BSE - In Canvas, user of type student cannot use the BSE in Canvas group or announcement.	KAF (Canvas)
SUP-11688	(Out of cycle fix) In KMS with SAML/Shibboleth authentication - users are unable to login to MediaSpace.	KMS
SUP-11391	(Out of cycle fix) Entry Publish Page - Checkbox does not appear for eligible categories when # of private/restricted galleries larger than 500	KMS

## Known Limitations

ID#	Summary	KMS/KAF Related
KMS-13879	Accessibility - Contrast - The 'Loading' text should be accessible.	KMS

## KMS Version 5.61.31 - July 3, 2017

**Version: 5.61.31**

**Date Released: July 3, 2017**

### Overview

These release notes pertain to Kaltura MediaSpace (KMS) version 5.61.31, released on July 3, 2017.

What's New for both KMS and KAF?

- **New UI Theme - Responsive** - The recently added KMS theme now supports both

KMS and KAF and includes responsive web support.

To turn the new theme on, login to the KMS/KAF admin and enable the 'V2ui' module. If your KMS contains custom modules or CSS, please contact your Kaltura representative beforehand about changes on production.

- **Language Update** – Missing words or new phrases were translated to all the supported languages in both KAF and KMS. See the [Supported Language](#) page for more information.
- **Changes to the CaptureSpace Loading Page**– Some UI and text changes were implemented to make the page more explanatory.
- **New Filter**– Since our header was starting to get full, we have consolidated all the filters into one. This will affect both old and new UI themes.

#### What's New in KMS?

- **LDAP and SAML Admin Improvements** – Changes made to the settings defaults and the LDAP wizard allow the new LDAP and SAML setup to become self-serve.

#### Resolved Issues

ID#	Summary	KMS/KAF Related
KMS-13886	Accessibility – when the contrast button is enabled, the login page is no longer affected.	KMS
SUP-10676	Channels now display the correct thumbnail layout in a gallery's related channel.	KMS
SUP-10748	The Mail-To option in channels is now working.	KMS
SUP-11094	Intermittent 500 Error Blackboard KAF when publishing to Media Gallery has been fixed.	KAF
SUP-10739	MediaSpace – The webpage icon when saving Kaltura as a link on mobile devices is now correct.	KMS

#### Known Limitations

ID#	Summary	KMS/KAF Related
SUP-10594	The Comments count is updated only after a page refresh.	KMS/KAF
KMS-13879	Accessibility - Contrast - 'Loading' text should be accessible.	KMS
KMS-14411	New UI - There are a few visual issues with very small screens (below 300px width)	KMS/KAF

## KMS Version 5.60.12 - May 22, 2017

**Version: 5.60.12**

**Date Released: May 22, 2017**

### Overview

These release notes pertain to Kaltura MediaSpace 5.60.12, released on May 22, 2017.

### What's New?

- **KMS Go**– As part of the new release of KMS Go, we have added a new module to KMS called KMSAPI that will allow you to setup your mobile app configuration. Please refer to [KMS Go release notes](#) for more information.
- **IVQ analytics** – We have improved the CSV and printable version reports produced by the IVQ.
- **Accessibility**– This new KMS module will allow you to enable the Contrast button. Currently only supported on the old UI (new UI support will be added in the next release).
- **"Add New" button** – A new option was added to hide/show the "Add New" button in KMS for guests/anonymous users
- **KMS admin changes**
  - **Manage Users page** – In the Manage Users section, the option to search by user ID was added.
  - **Login page** – **The KMS Admin login page title will now be taken from the Title field in the Application module. This will allow Admins to**

**differentiate between instances when there are multiple instances on the account.**

## Resolved Issues

ID#	Summary
SUP-10787	The spelling mistake in Spanish has been corrected.
SUP-10570	Cielo24 caption information is no longer cut off in the new UI.
SUP-10939	The KMS URL containing ">" sign no longer causes issues with certain SAML systems.

## Known Limitations

ID#	Summary
KMS-13920	Samsung S7 doesn't show the right KMS icon when saving the KMS homepage to the phone's desktop.
SUP-10594	The Comments count is updated only after page refresh.
