

How to update the Playlist default player

The newly created V7 Player is used for the playback of playlists in your Kaltura MediaSpace and KAF applications. For additional information, see the [PlaylistPage](#) module.

If needed, please also follow the steps below for [Channelplaylists](#) , [Addtoplaylists](#) , [embedplaylist](#) modules respectively.

Step 1 - Create a new player

Go to your KMC and create a player via the **Kaltura Player Studio**. See [The Kaltura Player Getting Started Guide](#) for more information.

7 Players ☆ Starred [+ Create Player](#)

Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)	
☆ MediaSpace Default Webcast Homepage Preview Player (Do Not Delete)	Outdated Version 51398672	21/11/2022	21/11/2022	0	0	...
☆ MediaSpace Default Registration Player (Do Not Delete)	51398572	21/11/2022	21/11/2022	0	0	...
☆ MediaSpace Default Path Player (Do Not Delete)	51398562	21/11/2022	21/11/2022	0	0	...
☆ MediaSpace Default TemplatePages Player (Do Not Delete)	51398272	21/11/2022	21/11/2022	0	0	...
☆ MediaSpace Default Recorder Widget Player (Do Not Delete)	51010512	16/11/2022	21/09/2022	45	2	...
☆ New Player css	<u>50970682</u>	14/09/2022	14/09/2022	0	0	...
☆ Knowledge Center Player - DO NOT DELETE	50952692	12/09/2022	12/09/2022	3	2	...

< 1 >

Step 2 - Configure your player

Configure the player with the desired capabilities and design using the **Kaltura Player Studio**. To learn more, see [Player Plugins & The Kaltura Player Studio Admin Guides](#) Make sure to enable the **Playlist Plugin** under the Plugins tab. After your player is configured, copy the player ID.

Step 3 - Apply the new player on your KMS/KAF application

1. Go to your KMS/KAF admin page and navigate to the [PlaylistPage](#) module.
2. Set **playerId** with the uiConfId of the new player.
3. **Save.**

The screenshot shows the 'Configuration Management' page for the 'PlaylistPage' module. On the left is a sidebar with a list of configuration categories: Server Tools, Global, Application, Auth, AddNew, Categories, Channels, Client, Debug, EmailService, EmailTemplates, Gallery, Header, Languages, Login, Metadata, Moderation, My-media, Navigation, Player, Recaptcha, Security, SharedRepositories, Widgets, Search, MediaCollaboration, **PlaylistPage** (highlighted), and TimeAndDate. The main content area is titled 'PlaylistPage' and contains a 'Module Info' section with the following text: 'This module controls the visibility of Playlists. To enable Channel Playlist functionality - navigate to the ChannelPlaylists module. To enable the ability to add content to personal playlists - navigate to the AddToPlaylists module. To enable the ability for users to grab embed codes of playlists - navigate to the EmbedPlaylist module.' Below this, there is a 'playerId' field with the value '51010522' and a description: 'Playlist player ID (uiConf ID) for playlists dedicated view page'. A 'Save' button is located at the bottom left of the form.
