

Adding Google Fonts to an Interactive Video Paths Project

This article provides steps on adding Google fonts to a RAPT Project.

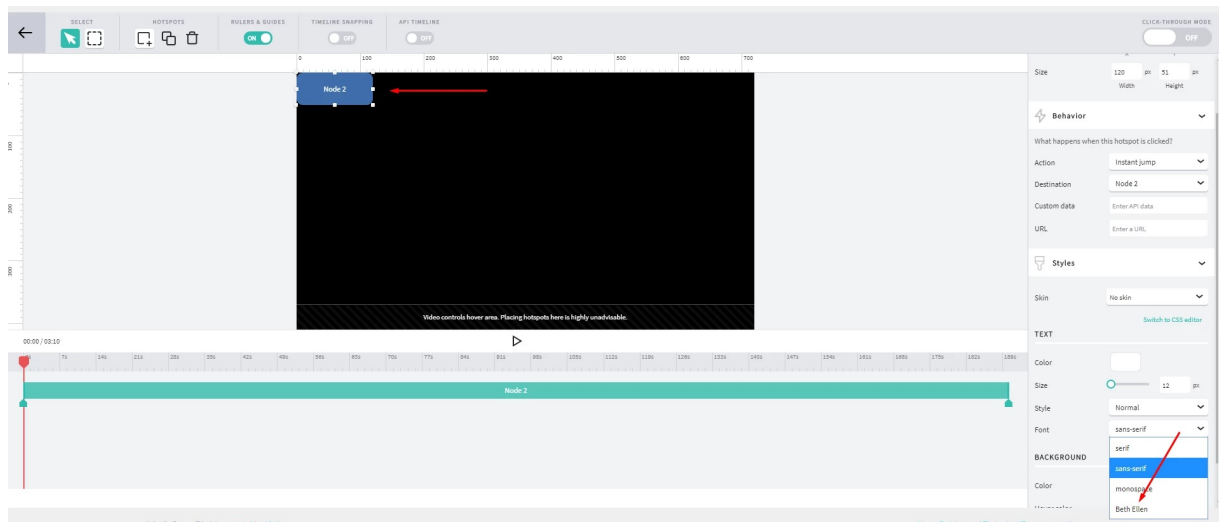

1. Create a new Interactive Video or edit an existing one
2. Click on 'Project settings'.

3. Insert 1 Google font to the project: `<link href="https://fonts.googleapis.com/css?family=Beth+Ellen" rel="stylesheet">`
4. Click on 'Update' button.

5. Close the 'Settings' screen.
6. Open a video in edit mode.
7. Select any node.
8. Open 'Font' dropdown.
9. Select added font from the list.

10. Click on 'Save project' button.
11. Play it outside the composer and verify that selected font is displayed correctly
12. If you want to add several Google fonts, please use following example: `<link href="https://fonts.googleapis.com/css?family=Black+Han+Sans|Sedgwick+Ave|Beth+Ellen" rel="stylesheet">`
