Playlist page

This article is designated for all users.

About

The **Playlist page** allows users to watch media in the playlist one by one.

Features

- The first item in the playlist is displayed in the large player on left. (If the playlist was set to auto-play, the first item in the playlist starts playing automatically as soon as you visit the Playlist page.)
- The playlist name, status, and complete list of items in the playlist are display on right.
- The bottom half of the screen shows the name, creator, when the item was last updated, along with the number of views, likes, plays, and comments, and a field to enter a new comment. Tabs are displayed based on the media's settings.
- Media related to the media being played is shown as well.

If your playlist page doesn't look like this, it could be because you haven't got our Theming feature set enabled. Visit our article Getting started with the Theming module to find out how you can get your theming on!
