My Analytics - Administrator Guide

> **This article is designated for administrators.**

Overview

Kaltura's **My Analytics** is a powerful tool for providing detailed metrics on video engagement, and equips content creators with the insights needed to make informed decisions. The **My Analytics** dashboard uses a variety of parameters enabling users to track and optimize their content.

Configure

Enable Userreports module

1. Go to your KMS or KAF admin page, and navigate to the Userreports module. Your link should look like this: https://{your_KMS_URL}/admin/config/tab/userreports.

2. In the Userreports window, set all fields to 'Yes'.

3. Click Save.

Enable the link via the Headermenu module

1. Navigate to the Headermenu module.

2. In the headermenu window, make sure the module is enabled (set to 'Yes').

Configure the Headermenu

1. Click the **+Add "menu"** button.

2. Configure the fields as follows:

- **type** - URL
- **label** - My Analytics
- **link** - /my-content-analytics
- **sameWindow** - Yes
- **linkLocation** - User Drop Down

3. Click Save.

My Analytics displays in the MediaSpace user menu .
