 This article is designated for all users.

About

This article describes how to add and edit an Interactive room session.

Interactive rooms allow attendees to connect with others during your virtual event. Hosts can use this collaboration space to provide demos with advanced moderation controls, breakout rooms that allow smaller group interactions, and so much more! Engage attendees through interactive tools like chat, breakout rooms, live polls, screen sharing, whiteboard, and more. Enhance your event experience by adding an interactive session with the speaker right after the session for a small group of attendees to interact with the speaker in a more intimate environment.

Add Interactive room session

There are two ways to add a session to your event:

- On the Event Overview page, in the Agenda at a glance section, click **Add session**.
