

How to add or remove related entries?

Expand/Collapse All

To add or remove related entries

1. Create a schema and add the Related Entries field. See [Adding Custom Metadata Fields](#).
2. Select an Entry and then select the Metadata tab.
3. Scroll to the Related Entries field and click +Add/remove Linked Entries.

The screenshot shows the 'Edit Entry - open_shut' interface. On the left is a sidebar with navigation tabs: Metadata, Thumbnails, Access Control, Scheduling, Flavors, Distribution, Captions, Advertisements, Related Files, and Users. The 'Metadata' tab is active. The main content area contains several metadata fields: Publish Date, Publish Status (dropdown), Copyright, Authors (with a '+ Add' button and 'x Remove' button), Related Links (with a '+ Add' button and 'x Remove' button), and You Tube Distribution. The 'Related Entries' field is highlighted in yellow and contains the text '+ Add/remove Linked Entries'. Below the main content area are 'Save' and 'Save & Close' buttons. On the right side, there is a video player for 'Entry ID: 0_2rn0a468' with a 'Play' button and options for 'Preview & Embed', 'Clip This', and 'Trim This'. Below the video player, there is a metadata section with fields for Creator (debbie.zioni@kaltura.com), Created on (06/05/2012), Landing Page, Type (Video), Duration (00:34), Moderation (Auto approved), Clipped from (0_ehtb0...), and Plays (0). At the bottom right, there are 'Previous Entry' and 'Next Entry' navigation links.

4. Move the Related Entries from the Entries table to the Selected Entries list and click Save.
