

How to prepare a live stream entry

Use this option to create a live stream entry.

To prepare a live stream entry

1. Select the Upload tab.
2. Select Live Stream Entry, to provision a live stream on the CDN. The live stream should be configured with your encoder IP address.
3. After the live stream is provisioned, you can set the entry metadata and specific broadcasting settings in the KMC's Content > Manage tab.

For more information see [Workflow for Setting up Live Streaming](#).
