Kaltura Supported CDN (Content Delivery Networks) and Streaming Servers

This article provides a compatibility matrix of supported Content Delivery Networks and the specific delivery features supported for each.

Please note that while the information here outlines supported CDNs and Streaming Servers on all Kaltura editions, configuring the use of a specific CDN or Streaming Server may require customization and setup work.

Kaltura Supported CDNs for Origin Pull VOD / Kaltura Live

For video files that are stored in Kaltura, Kaltura supports HLS, HDS, Smooth and Dash practically on any CDN. Kaltura packages these protocols in our datacenters, and the CDN acts as a simple HTTP proxy.

CDN / Streaming Server	Tokenization	Progressive Download	HDS	HLS	MSS	DASH
Akamai	✔	✔	✔	✔	✔	✔
Amazon CloudFront	✔	✔	✔	✔		✔
Tata CDN	✔	✔	✔	✔	✔	✔
Limelight		✔	✔	✔	✔	✔
Level3		✔	✔	✔	✔	✔
Verizon		✔	✔	✔	✔	✔
Fastly	✔	✔	✔	✔	✔	✔
