

Is there an upload file size limit when using KMS?

Expand/Collapse All

Kaltura MediaSpace (KMS) supports uploading files of any size in all major browsers - Chrome, Safari, Firefox and IE 10+.

Starting version 5.75 (Aug, 2018), Kaltura MediaSpace will not support uploading files via Flash dependent browsers (such as IE8 or IE9) as KMS no longer supports the legacy Flash component (KSU- Kaltura Simple Uploader) as a fallback.
