

How to convert an XML Document to CSV File or Excel Spreadsheet

Last Modified on 06/06/2021 3:38 pm IDT

1. Open the XML file and select all the text by clicking Ctrl + A then copy it by clicking Ctrl+C.

```

Click entity for XPath. Double-click to collapse/expand. Enter XPath or XML string then click XPath/Render for results or to XML Tree-ify, respectively.
Source Options
XPath/Render XSL

<xml>
<result>
  <objectType>KalturaUserListResponse</objectType>
  <objects>
    <item>
      <objectType>KalturaUser</objectType>
      <id>omri</id>
      <partnerId>1763321</partnerId>
      <screenName>omri</screenName>
      <fullName>Omri Katz</fullName>
      <email/>
      <dateOfBirth/>
      <country/>
      <state/>
      <city/>
      <zip/>
      <thumbnailUrl/>
      <description/>
      <tags/>
      <adminTags/>
      <gender/>
      <status>1</status>
      <createdAt>1407860489</createdAt>
      <updatedAt>1407861089</updatedAt>
      <partnerData>pw=d444fe44123da07989bdfad5a4c3415c78828f6d,</partnerData>
      <indexedPartnerDataInt/>
      <indexedPartnerDataString/>
      <storageSize>0</storageSize>
      <password/>
      <firstName>Omri</firstName>
      <lastName>Katz</lastName>
    </item>
  </objects>
</result>
</xml>

```

2. Open Notepad ++ and paste the text from the previous step.

****You will need to delete the first two lines in the document:**

**"SourceOptions
XPath/RenderXSL"**

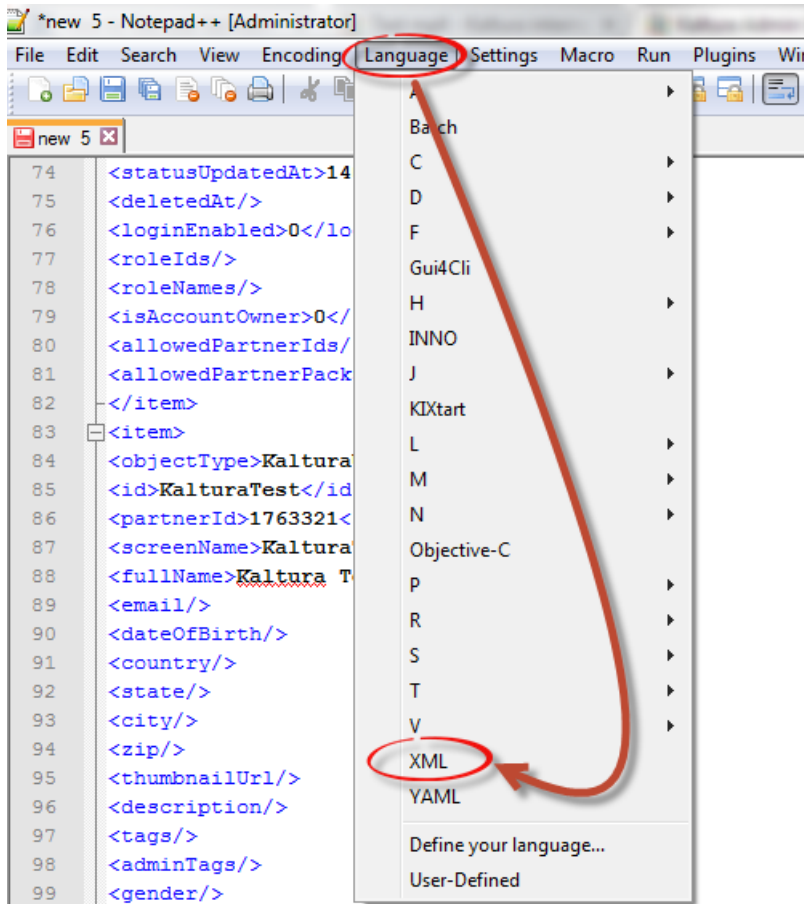

```

*new 5 - Notepad++ [Administrator]
File Edit Search View Encoding Language Settings Macro Run Plugins Window ?
new 5 x
1
2 SourceOptions
3 XPath/RenderXSL
4 <xml>
5 <result>
6 <objectType>KalturaUserListResponse</objectType>
7 <objects>
8 <item>

```

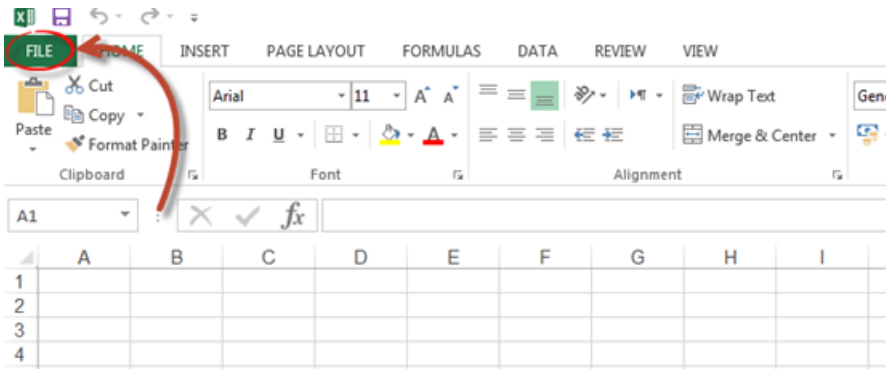

3. From the top menu, open the **Language** sub-menu, then select **XML**.

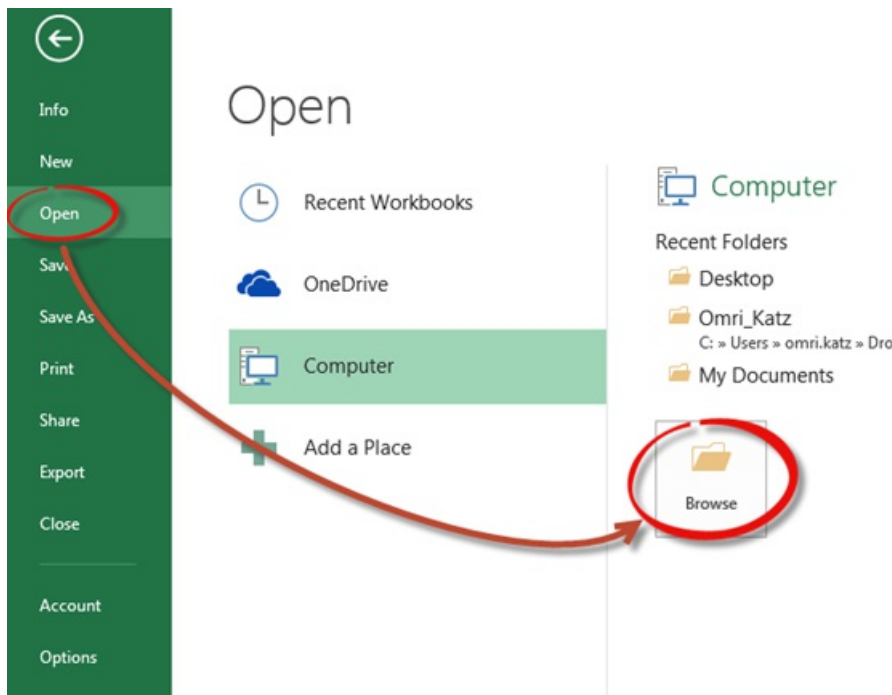

4. After you choose the correct language, click **File**, then **Save As**. Choose where to save the file and click **Save**.

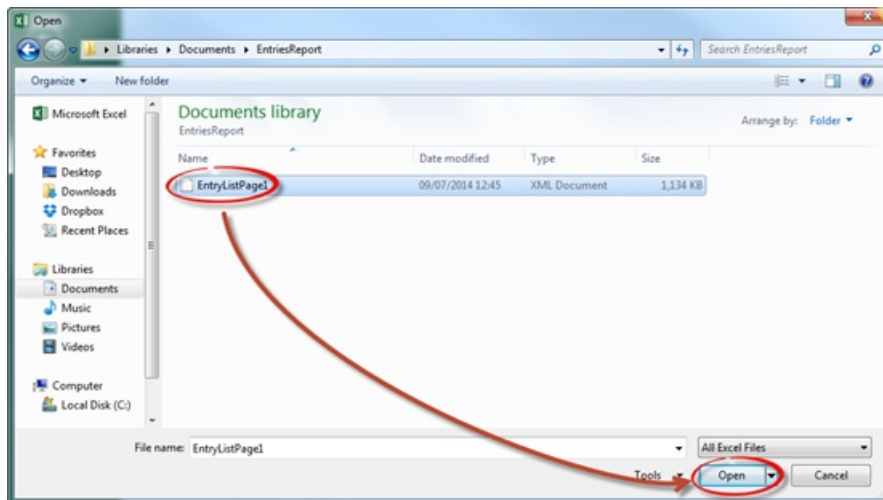

5. Open **Excel** and click on **File** from the ribbon bar.

6. Choose **Open** and **Browse**.

7. Locate the file you saved in the previous steps and choose **Open**.

8. A new pop-up box is displayed. Choose **As an XML table** and click **OK**.

9. Another pop-up is displayed, to alert you that this source has no schema. Ignore this error and click **OK**.

10. You should now see the Excel sheet populated with all the correct fields.
