

How to Disable the Full Screen Functionality in the Kaltura Player

Last Modified on 04/14/2021 1:40 pm IDT

To disable the full-screen functionality in the KMC Universal Studio

1. In the KMC, select Studio and then select Universal Studio.
2. Select a player.
3. Select the plugins icon. 
4. Check UI variables and add: "fullScreenBtn.plugin" with a value of "false" to the UIVars custom plugin.
5. Click Save Player Settings.

The fullscreen button is disabled. Double click to enter fullscreen binding.
