

Is there a limit to the number of assets per a Kaltura entry?

Last Modified on 08/21/2023 4:44 pm IDT

There is a limit of 500 assets per entry.

Assets may include:

- Flavors (videos)
- Thumbnails
- Captions
- Attachments

 Currently, Kaltura does not offer version history controls for Kaltura entries. There is no SLA on recovering previous versions of an entry after the 'Replace' function is used.

 The customer care team may find information and download the last two versions of an entry via the entry-investigation page in the admin console.
