Is there a limit to the number of assets per Kaltura entry?

Last Modified on 08/05/2025 7:37 pm IDT

Yes, each Kaltura entry supports up to 500 assets.

Assets include:

- Flavors (videos)
- Thumbnails
- Captions
- Attachments

Exceeding this limit may lead to issues with playback, editing, or entry management. If your workflow requires a high number of assets per entry, consider consolidating or archiving older versions.
