

Create a town hall (webcast)

Last Modified on 07/03/2025 6:39 pm IDT

 This article is designated for administrators.

About

When you create a Town Hall event, you'll set the date and time and design a dedicated entry page for your audience.

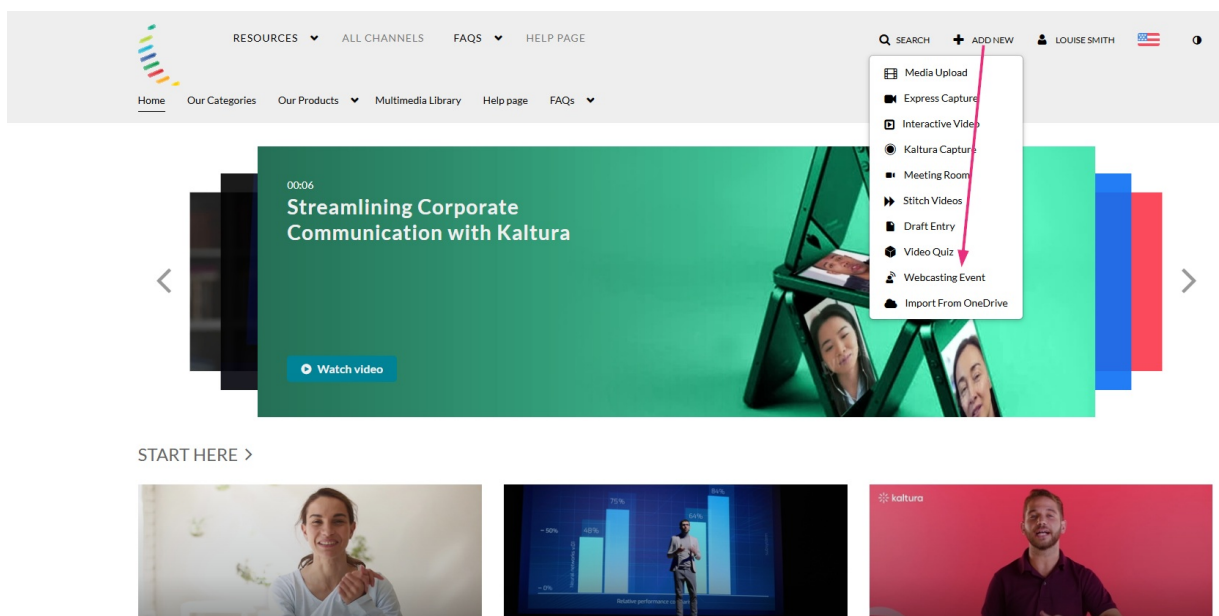

This page acts as the event's hub - providing key details beforehand and, when the time comes, serving as the live stream and archive. You can edit it as needed and adjust privacy settings to keep it private until you're ready to share it.

The instructions below are for non-Theming users. If you have [Theming](#) enabled, please refer to our article [Create a Town hall event - Theming](#).

Create a new event

1. In your video portal, select **Webcasting Event** from **Add New** menu.

The **Schedule a Webcast Event** screen displays.

Schedule a Webcast Event

Name:
(Required)

Description:

Black ▼ Bold *Italic* Underline

Enter Description...

Start Time:

08/07/2020
10:00 AM

End Time:

08/07/2020
11:00 AM

(UTC -4:00) Eastern Time (US & Canada) (EDT)

Event Recording:
(Required)

Append recorded content to a single entry
Select the recording option for when broadcasting and recording multiple sessions to the entry.

Publishing Schedule:

☒ Always
☐ Specific Time Frame
(The time range in which this media will be visible to users in published channels/categories)

Create Event

2. Enter values for the following fields to describe the event.

- a. **Name** (Required) - used and displayed in the event page Webcasting created for each event
- b. **Description** - used and displayed in the event page Webcasting created for each event.
 You can use the editing tools in the description area to apply basic formatting to the text and include hyperlinks and images.
- c. **Tags** - use to apply metadata to the event to make it easier to catalog and search.
- d. Select a review option -
 - a. Submitted for Review
 - b. Pending Review
 - c. Approved
 - d. Flagged
- e. Related Entries - use to display related entries for the webcast
- f. Projected Audience - estimated number of audience members
- g. Select a location for the webcast

- h. Select the **Start Time** and **End Time** - make sure to include enough buffer in case the event continues beyond the allotted time.
Event duration must be less than 24 hours. If the allocated time exceeds 24 hours, an error message will display notifying that.
- i. Select the **Time Zone** from the drop down menu.
- j. Select an **Event Recording** option from two options:
 - a. Append recorded content to a single entry - each time a broadcast session finishes the content the recording of the session will be added to the entry content thus making one long recording.
 - b. Export on each broadcast to VOD entry - once a broadcast finishes the recording will automatically be archived and a new VOD will be created. If slides were used during the broadcast they will also be migrated as part of the archiving process, [see here](#) for more information.

Event Recording option cannot be updated once the webcast has been created.
- k. If the [Registration Module](#) has been enabled in the KMS Admin, then you can configure in the Add Registration dropdown which registration form will be used for the webcast
- l. Select a Publishing Schedule
 - a. Always
 - b. Select the time range in which the media will be visible to users in the published channels/categories
- 3. Choose Publishing Status (Note that if Publishing Status *unlisted* is not enabled on your instance, the Publishing Status section does not display at all and your entry is set to Private. The privacy level of the event can be changed at a later time.)
 - a. Private - Media page is visible to content owner only.
 - b. Unlisted - Media page is visible to anyone with a link to the page.
- 4. Click **Create Event**. You are redirected to the Edit Webcast Page where you can edit the event's settings.
