

# How to Generate Interactive Video Quiz Reports Using the Kaltura API?

Last Modified on 09/24/2019 2:15 pm IDT

There are 2 types of reports you can generate using the Kaltura API:

- [Detailed Information Reports](#)
- [Count Reports](#)

Each type of report contains 4 reports.

The answer from the server is returned as XMLJSON response.

## Detailed Information Reports

### **QUIZ**

Per each question:

- question\_id

Percentage of correct answers

- num\_of\_correct\_answers
- num\_of\_wrong\_answers

### **QUIZ\_USER\_PERCENTAGE**

For a list of users on a specific quiz:

Per each question:

- question\_id

Percentage of correct answers

- num\_of\_correct\_answers
- num\_of\_wrong\_answers

### **QUIZ\_AGGREGATE\_BY\_QUESTION**

For a specific question:

Percentage of correct answers

- num\_of\_correct\_answers

- num\_of\_wrong\_answers

### **QUIZ\_USER\_AGGREGATE\_BY\_QUESTION**

For a specific question and for a list of users:

Percentage of correct answers

- num\_of\_correct\_answers
- num\_of\_wrong\_answers

### Counts Only Information Reports

#### **QUIZ**
