This guide provides information about how to setup and enable Kaltura Video Plugin for Wordpress.

This guide is intended for the Kaltura Wordpress administrators. For additional information see the Kaltura Video Plugin for Wordpress User Guide .

For Wordpress Legal Information and Notices, please see the Wordpress Open Source Terms of Service.

The following topics are described:

- Introduction to the Kaltura Video Plugin for Wordpress
- Enabling the Kaltura Video Plugin for Wordpress

Introduction to the Kaltura Video Plugin for WordPress

Kaltura's All in One WordPress Video Plugin is a standard WordPress Plugin, that adds Kaltura's powerful video capabilities into WordPress.

With the plugin activated, WordPress authors and contributors can add videos to the posts; WordPress administrators can add a recent videos sidebar widget and can allow video comments by WordPress subscribers and guests.

1. In the MediaSpace Configuration Management window, select and set enabled to 'Yes'.
[/collapsed]

Getting Started

Workflow:

1. Install and Activate the Plugin
2. Configure the Plugin
3. Add Media to a Post
4. Add Video Comments
5. Manage Existing Media
6. Create Video Posts in Bulk from your KMC Content

Installing and Activating the Plugin

You can install or upgrade the plugin from a previous version and then add or activate the Recent Videos Sidebar Widget.

   To install the plugin for the first time

1. Download and extract the plugin zip file to your WordPress server.
2. Paste the 'all-in-one-video-pack' directory under the '/wp-content/plugins/' directory.
3. Activate the plugin through the 'Plugins' menu in the WordPress admin application. The following message is displayed:

To complete the All in One Video Pack installation, you must get a Partner ID.

4. Click the link to get a Kaltura Partner ID or to connect the Plugin to an existing Partner ID.
5. Fill in All in One Video Package Installation form.

- If you do not have a Kaltura Partner ID, fill in the All in One video Package installation Form.
- If you have a Kaltura Partner ID, click "Click here if you already have a partner ID" and fill the form with your Kaltura credentials.
- If you are installing the plugin on a WordPress MultiSite network (from the Network Admin interface), fill in the following form with your Kaltura credentials:

6. After the Plugin is connected to a Kaltura Partner ID, go to Settings > All in One Video Pack to setup the plugin.
