

Modules: entryTypes - KMS Management Console/KAF Admin

entryType Modules

[collapsed title="Audioentry"]

Module info: this module allows you to set a dedicated player (different than the default KMS player) for audio entries.

Audioentry

Field	Description
customPlayerId	The player ID (uiConf ID) of the player that plays audios. Leave blank to use the KMS default player.
playerBarHeightPixels	The height (in pixels) of the custom player UI which is not part of the actual video (for example - the bottom bar). Leave blank to use the default player value.
playerVideoRatioPercent	The ratio (in percent) of the player (video asset area). Standard values: 16:9 = 56.25 , 4:3 = 75 , 16:10 = 62.5. Leave blank to use the default player value.
embedSizes	Set the sizes that can be used for embedded players. set the player size in the following format: {width}x{height}. This setting requires a custom player. If a custom player is not specified, the audio entry

Field	Description
	uses the default video player.

[/collapsed]

[collapsed title="Imageentry"]

Imageentry

Module info: this module allows you to set a dedicated player (different than the default KMS player) for image entries.

Field	Description

[collapsed title="Webcast"]

Webcast

 This module is used with InterCall Webcasting only.

Field	Description
enabled	Enable the Webcast module
intercallWebcastProfileId	The profile id of the webcast metadata profile.
sortMediaBy	By default, how should media in the gallery be sorted?
embedAllowed	The webcast is an external entry and embed is not allowed.
expiryTime	The session expiration time (in seconds) sent in the entry link. Keep it as short as possible.

[/collapsed]

[collapsed title="Youtube"]

Youtube

MediaSpace users can add YouTube video content and metadata into MediaSpace. Hosted content on YouTube is played back on the Kaltura V2 player from version 2.13 and above. To update the player to the latest player version, re-save the player settings in the KMC Studio > Universal Studio tab.

Because the video itself still ‘resides’ on YouTube, a YouTube entry is treated differently in some ways from a native Kaltura entry.

- What is supported?
- - Basic and custom metadata

- Sunrise/sunset (scheduled publishing)
- Commenting
- Collaboration (changing owner, adding co-editor and co-publisher)
- Attachments
- **Uploading caption file to Kaltura entry**
- Replace Video (with new YouTube URL)
- Playback analytics
- What is not supported?
- - Kaltura REACH auto-captioning
 - Change Thumbnail
 - Enable download
 - **Viewer's ability to enable/disable YouTube captions (these are the captions associated with the YouTube video)**
 - Timeline (Chapters and slides)
 - Trim/Clip
 - Playback rate selector

Field	Description
enabled	Enable the Youtube module
previewPlayer	The player uiconf to use for the YouTube entry preview when adding a new entry. Leave blank to use the default MediaSpace player.
replaceYouTubeEntryMessage	The message to display when replacing a YouTube entry.
