Introduction to Lecture Capture

Content updated: 08/20/2019

This article is designated for all users.

About

Kaltura **Lecture Capture** enables you to create high-quality recordings in every classroom.

With Lecture Capture you can manage your schedule and create an automated hands-free experience for your faculty. Kaltura's robust platform allows you to set where the content will be shared to, whether in your LMS or your Video Portal.

The user-centric design allows a simple, easy-to-use workflow for professors and teaching assistants. The background upload ensures content will be available within the Kaltura platform with an engaging interactive viewing experience with Kaltura's dual stream player.

Kaltura Lecture Capture includes:

- HD recording of screen and camera
- Live streaming of the primary input (either screen or camera)
- Support for software management install
- Automated recording schedule
- Ad-hoc recordings
- Recording and uploading PowerPoint slides
- Background upload
- Automated publishing to Content Hubs and LMS Extensions
- Intuitive user interface
- Unlimited recording duration and size

  And much more.

Lecture Capture workflow

- Navigate the Lecture Capture application
- Create an ad-hoc recording
- Complete and view your recording
