

# Scheduling Events - Viewing the Recording Schedule

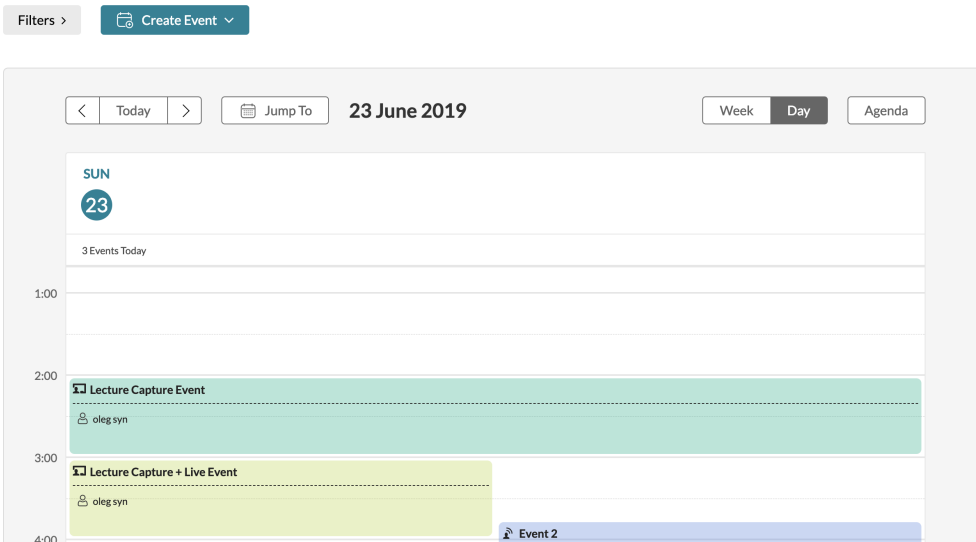

Last Modified on 10/31/2019 10:04 pm IST

## ☰ To access the Calendar Page

- In MediaSpace, select My Calendar from the user drop down.
- In KAF, select My Calendar from the My Media page.  
The Calendar Page is displayed.

The Calendar Page displays all of the scheduled events on your Agenda. Use the Calendar Page to create, edit, or delete a scheduled event.

### My Calendar

The screenshot shows the 'My Calendar' interface. At the top, there are navigation buttons: '< Today >', 'Jump To', and the date '23 June 2019'. To the right are view toggles: 'Week', 'Day' (selected), and 'Agenda'. Below the navigation is a calendar grid for Sunday, June 23rd, with '3 Events Today' listed. The events are displayed as horizontal bars on a timeline from 1:00 to 4:00. The first event is 'Lecture Capture Event' from 2:00 to 3:00, and the second is 'Lecture Capture + Live Event' from 3:00 to 4:00. Both events are attributed to 'oleg syn'. A small blue bar at the bottom right is labeled 'Event 2'.

## Calendar Views

Each date has aggregated information for day and week views. There are three calendar views:

1. Day view - All the scheduled events for the current day
2. Week view - All the scheduled events for the current week
3. Agenda view - displays all the scheduled events in a list view

## ☰ To scroll to a different day

- Click on the Previous and Next arrows to scroll to the Previous or Next day.
- Click on Today to return to the current day.
- Click on Jump To to open a monthly calendar.
  - Click on the Previous or Next buttons to scroll to the month you are looking for.
  - Click on the day in the monthly calendar to view the specific events for that day.

## ☰ To Create an Event

- See [Scheduling Management - Adding Events](#).

### **To Create a Recurring Event**

- See [Scheduling Management - Adding Recurring Events](#).

### **To Edit an Event**

- See [Scheduling Management - Editing Events](#).

### **To Delete an Event**

- See [Scheduling Management - Deleting Events](#).
-
