About

Use this guide to enable gradebook sync for Kaltura Interactive Video Quizzes in Blackboard.

Before you start

- Ensure the Kaltura LMS integration for Blackboard is installed using LTI 1.3.
- If you're setting up the integration for the first time, follow the full steps in Kaltura LMS integration for Blackboard - Deployment guide.
- To enable grade sync, make sure:
  - The Ltigrading module is enabled in your KAF instance
  - The Kaltura Video Quiz tool is enabled in Blackboard

Setup

Enable gradebook support in Kaltura

1. Log in to your KAF Configuration Management console.
2. Search for and open the **Ltigrading** module.
3. Set the module to **Enabled**.
4. Click **Save**.

Enable the Kaltura Video Quiz tool in Blackboard

1. In Blackboard, go to **System Admin** > **Tools**.
2. Find **Kaltura Video Quiz Tool** and enable it.

Once the integration is set up:

- Instructors can add quizzes using the Kaltura Video Quiz tool (available via the **Content Market**).
- Student quiz results are automatically sent to the Grade Center once submitted.

> ✓

To ensure grades sync correctly, quizzes must be added using the Content Market and not through the Add Content editor.

ℹ

For details on adding a quiz to a course, see How to add a Kaltura Video Quiz to Blackboard Learn Ultra.
