

# How to add or remove tags to or from a KMC entry?

Last Modified on 02/12/2020 1:02 am IST

Tags are a non-hierarchical keyword or term assigned to an entry to help describe it and allow it to be found again through a search.

You can add or remove tags to more than one entry at a time, but only on entries appearing on the same page of the entries list.

See the article [The Content Menu](#) on how to add and remove tags.
