Configure a Lecture Capture resource name

Content updated: 08/20/2019

About

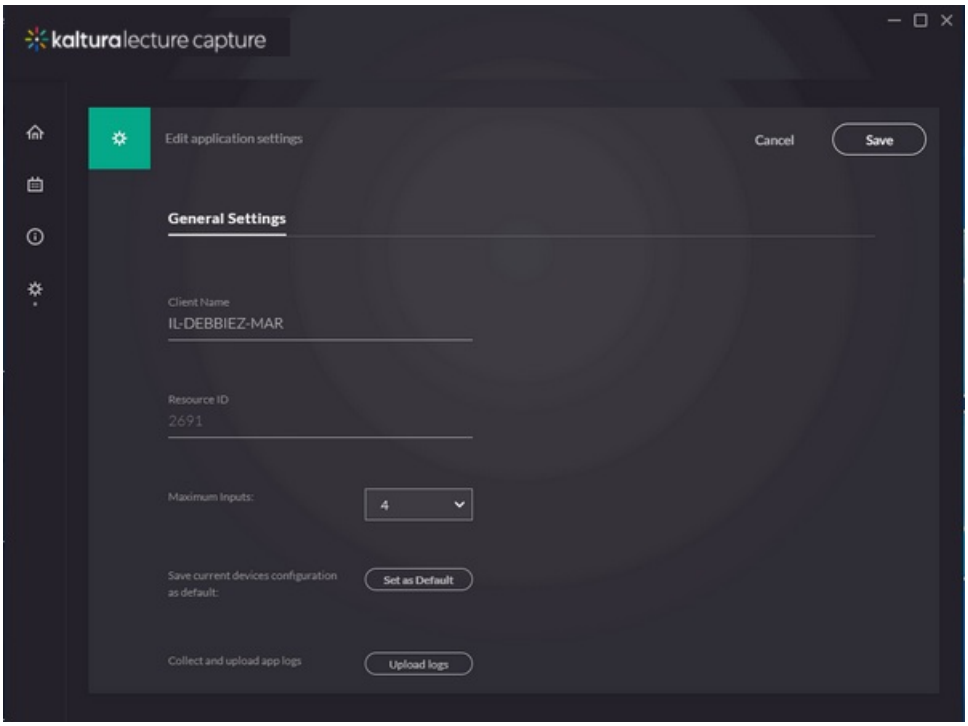

This article explains how to configure a Lecture Capture resource name.

Set the resource name for a specific installation

Resources in Kaltura are mapped to one Lecture Capture installation. You can remotely monitor and schedule each installation. See Scheduling Management - Adding Events for more information on adding events to your schedule. See Monitor Lecture Capture resources and recordings to learn more about monitoring each deployed application. The default name for each resource is the computer name. You can edit the resource name in the application settings.

View and edit the resource name for a recording

1. Click the Settings tab.
   The client name selected for this recording appears. The default client name is the name of your PC.
2. To change the name, update the current name, and click **Save**.
