

# Lecture Capture - Monitoring Recordings

Expand/Collapse All

## My Dashboard

The Monitoring dashboard enables admins to view the status of their campus wide installation of Kaltura Lecture Capture.

The screenshot shows the 'My Dashboard' interface. At the top, there is a search bar and several filter dropdowns: 'Resources: Favorites', 'Resource status: All Statuses', 'Connection status: All Statuses', 'Recording modes: All Modes', and 'Sort By: Alphabetically - A to Z'. Below these is a table with columns: RESOURCE NAME, CONNECTION, RECORDING, STATUS, UPLOAD SERVICE, and SCHEDULED. The first row shows a resource named 'IL-TSVIKW10-RND' with a green 'Online' status, a red 'Running' status with a timer at '00:00:11', and a status of 'OK'. Below the table are four preview thumbnails: 'Primary Preview (09:53AM)', 'Input2 Preview (10:07AM)', 'Input3 Preview (10:07AM)', and 'Input4 Preview (10:07AM)'. The second preview shows a woman with text 'FEATURING A SPONSOR' and 'RS: Search allows you to capture beautiful images in the dark...'. A small number '570961' is visible in the bottom right corner of the dashboard area.

The Monitoring Dashboard lists all resources with an expand option for each resource.

The dashboard includes:

- Resource Name - Each installation has a resource name. This resource name is also used for scheduling recordings if those are enabled. For more information see [Setting the Resource Name for a Specific Installation](#).
- Online/Offline - When the resource is not connected to the Internet it appears as offline. The last time it was seen online is shown. A resource must be online to report status for monitoring.
- Recording/Idle - When a resource is recording, it will appear as Recording with a timer indication how long it's been recording. If a scheduled recording is currently happening, the timer will show the remaining time for recording.

- Status - The status shows whether there are any errors or notification or whether the status is ok. If an error happened, the error will appear with the timestamp.
- Upload Service - Provides the status of the service uploading recording files to Kaltura. If the status is offline, a timestamp of the last time the service reported itself online is shown.
- Next scheduled event - Displays the next scheduled event planned for this resource. This column will only be shown when the Scheduling module is enabled and when the user has permission to schedule events.

For additional information about a specific resource, click on the row to expand the view. The following is displayed:

- Recent snapshot of each input.
- Resource ID
