Configuration Management: Category Modules

[collapsed title="Categoryembed"]

Categoryembed

This module allows you to decide on the default behavior of the embed when an entry is accessed in the context of a category.

Use this module to allow category managers to block embed-grabbing from their category (useful when managing copy-righted content whose consumption should be confined to the portal). For more information read [here](#).

You can also the limit embed-grabbing to published content only.

| Field | Description |
|------------------------|--|
| enabled | Enable the Categoryembed Module. |
| enableEmbedOnByDefault | What should be the default "Enable Embed" in the Channel settings page, affecting whether users can grab an embed of an entry in the context of a channel? |
| embedRoles | Select one or more roles that can grab an embed if enabled. |
| allowManagerOverride | Can a channel manager override the default behavior of |

| Field | Description |
|-------|---------------|
| | Enable Embed? |

[/collapsed]

[collapsed title="Categorymembers"]

Categorymembers

| Field | Description |
|--------------------------|---|
| enabled | Enable the Categorymembers Module. |
| preventAddingUsers | When Enabled, if the category is mapped to a group name - the category manager will no longer be able to add/remove users manually. The only other option is to change the role of the users that were added through the synchronization process. |
| preventChangingRole | Prevent the category manager from overriding users' roles, where the offline synchronization process controls both the users and their roles. |
| findGroupUserSuggestions | When enabled, the user suggestions in Add Member to Category also finds the groups. |
| enableGroupActionMenu | When enabled, the Remove and Edit group option in the category will be enabled. |

[/collapsed]

[collapsed title="Categorymoderation"]

Categorymoderation

This module may be used by a category manager to enable moderation for a category.

| Field | Description |
|--------------------------|---------------------------------------|
| enabled | Enable the Categorymoderation Module. |
| requestConfirmationPopUp | Request confirmation pop-up. |

[/collapsed]

[collapsed title="Categorytheme"]

Categorytheme

This module may be used to enable a category manager to choose what is the first tab to load into categories.

| Field | Description |
|-----------|---|
| enabled | Enable the Categorytheme Module. |
| playerSet | Galleries managers will be able to select a player set from the |

| Field | Description |
|---------------|--|
| | Gallery theme tab to use in all the Galleries media. A player set contains a list of players, one for each type of media. Media with no player will be using the default media player. Click Add Player Set. |
| playerSetName | Enter a player set name and click Add Player. |
| entryType | Select the type of entry. |
| playerId | Enter the PlayerID. |
