Kaltura MediaSpace and Kaltura Application Framework Configuration Modules

Last Modified on 03/25/2021 12:19 pm IST

The following links are to the KMS Management Console and KAF Admin page configuration modules. The parameters for each module are described within.

⚠Not all modules are displayed for each Kaltura MediaSpace instance or KAF applcation instance. Contact your Kaltura representative for more information about enabling modules.

Server Tools

Backup Configuration

Create a snapshot of the current site configuration (all modules) as a 'Last Good Configuration'. This snapshot can be later used in case a configuration restore is needed.
We recommend setting the backup snapshot after the initial setup is completed.

Available buttons:

Save Backup - Creates the snapshot. Once saved, a message will show with the date: "*Last configuration save date: 2018-02-07 17:30:46*"

Restore Last Backup Configuration - Click here to restore to the last configured snapshot.
