

How to set the entitlement settings in the KMC

Last Modified on 02/09/2020 12:53 pm IST

The Entitlements tab is accessed through the Categories tab for entries that have entitlements configured.

Additional Category Entitlement Settings

The following additional settings are available at the lower part of the Entitlements tab:

- **Category Owner** – a category attribute, for setting one of the channel managers as the channel owner for any applicative need. The category owner is automatically set with a manager permission level for the category. See [Change Owner](#).
- **Default Permission Level** – a category attribute for setting a specific default permission level to the category, for supporting different applicative flows.
- **Moderate Content** - a category attribute, for supporting the moderation of content prior it's publishing in the channel. (Moderation is configured through MediaSpace.)
