

Getting Started with Kaltura Capture

Last Modified on 09/27/2019 1:53 am IDT

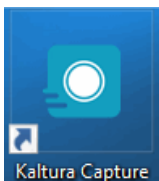

This article describes the following topics:

- [Launch the Application](#)
- [Recording Options](#)
- [Exiting the Application](#)

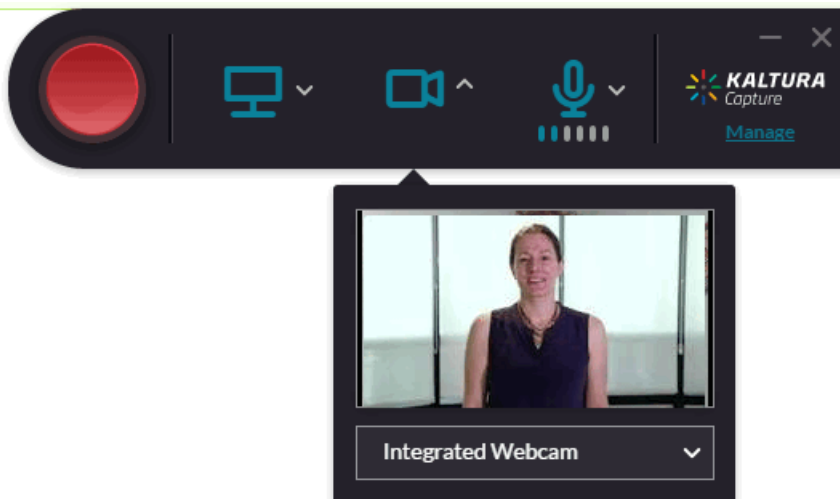

Launch the Application

☰ To launch the Kaltura Capture Application

- Click on the Kaltura Capture Application icon on your Desktop.

The Kaltura Capture Recorder is displayed.

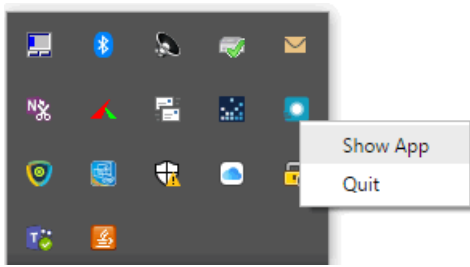

Recording Options

By default, all recording inputs are configured to the optimal quality available, so you can start recording. If you would like to change the default input settings, camera, screen or audio, please see the article [Kaltura Personal Capture Recording Options](#) for information on how to modify the default recording inputs.

Exiting the Kaltura Capture Application

☰ To Exit the Kaltura Capture Application

1. In your Taskbar and Navigation Properties box, right click on the Kaltura Personal Capture Application icon.
2. Select Quit to exit the application.

To hide or show the Kaltura Capture Application

- Right click on the Kaltura Capture icon and select Show or Hide. Hiding the application does not exit the application.
