

What live streaming types are available in the Rich Media CMS

Last Modified on 05/06/2026 8:41 pm IDT

The following Live Stream types are available:

- **Kaltura Live Streaming (HDS / HLS / DASH)** - Default - Kaltura live streaming services are provisioned within the cloud. Supports cloud transcoding, extended DVR window, live to VOD archiving with a single embed code, instant provisioning, and multi protocol delivery. Depending on your live streaming package simultaneous cloud transcodes will be restricted.
- **Manual Live Stream URLs** - Allows you to associate custom live end user URLs with a Kaltura entry. This option is useful if you are using a 3rd party to provision and broadcast a live stream.

Kaltura recommends **Kaltura Live Streaming**.

To configure live streaming in the Rich Media CMS see the articles about [Live Streaming Using Kaltura Live Streaming](#).
