What live streaming types are available in the KMC

Last Modified on 02/14/2021 4:50 pm IST

The following Live Stream types are available:

- **Kaltura Live Streaming (HDS / HLS / DASH)** - Default - Kaltura live streaming services are provisioned within the cloud. Supports cloud transcoding, extended DVR window, live to VOD archiving with a single embed code, instant provisioning, and multi protocol delivery. Depending on your live streaming package simultaneous cloud transcodes will be restricted.
- **Manual Live Stream URLs** - Allows you to associate custom live end user URLs with a Kaltura entry. This option is useful if you are using a 3rd party to provision and broadcast a live stream.

Kaltura recommends **Kaltura Live Streaming.**

To configure live streaming in the KMC see the articles about Live Streaming Using Kaltura Live Streaming (https://knowledge.kaltura.com/help/kaltura-live-streaming-overview---kmc-ng).
