

Kaltura REACH v2

Introduction to Kaltura REACH

Kaltura REACH is the Kaltura service for providing captions and enrichment services. Kaltura REACH supports captioning, transcription, translation, audio description, chaptering, in-video and cross-library search and discovery, deep-linking capabilities, and metadata and keyword extraction.

With Kaltura REACH, organizations can access global audiences, comply with government regulations and industry standards, and capture accurate data.

Kaltura REACH includes a full end to end process for caption ordering and return.

REACH provides you with the following abilities:

- You can request captions/translations/enrichment services through Kaltura via the KMC or KMS/KAF application.
- Captions and Enrichment services can be requested manually or automatically.
- You can moderate requests.
- Once a request is completed, your video is automatically updated the new captions/metadata/audio description.
- Editing Captions
 - Transcript widget - to follow captions in video, search in video, download/print transcript
 - Reports – usage dashboard and billing reports and much more.
