

Upload media - Theming

Last Modified on 06/09/2025 9:32 am IDT

 This article is designated for all users.

About

Uploading media from your desktop to your video portal is quick and easy. Simply follow the steps below to share your videos, audio files, images, and documents. You can upload single or multiple files at once, edit metadata, and publish them in bulk - all during the upload process.

These instructions are specifically for users with [Theming](#) enabled. If you don't have Theming enabled, please refer our article [Upload media](#).

A user with an application role of **privateOnlyRole** and higher (adminRole, unmoderatedAdminRole) can upload content.

Before you start

The [Uploadmedia module](#) must enabled.

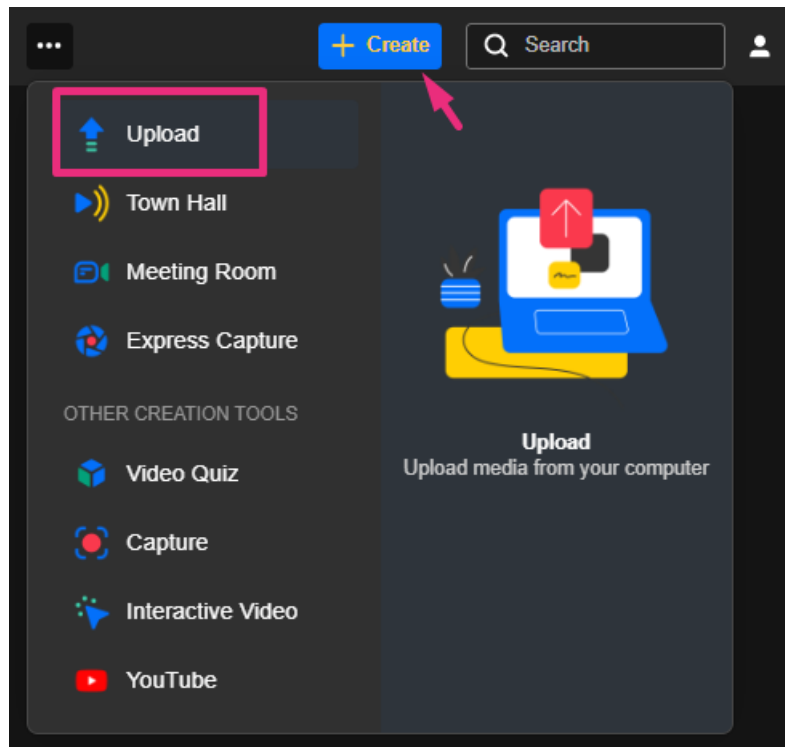

Upload media

To upload a YouTube video, please see our article [Add a YouTube video](#).

1. Click the **+ Create** button and select **Upload**.

Alternatively, go directly to the upload page using: `base_url/uploadmedia`.

Your **+ Create** menu may vary depending on your environment. If options are missing, contact your Kaltura administrator.

If a disclaimer is set by your administrator, click the **Accept** button to proceed.

The **Upload Media** page displays.

- Click **Select Files** and choose one or multiple files, or drag and drop files inside the dotted area. Different types of files can be uploaded at the same time.

For MS Word and PowerPoint files, a maximum of **10 MB** is supported, and for Excel files, up to **5 MB**. Attempting to upload files larger than 10 MB will trigger a 'file too large' error message after the view component loads for a while.

Kaltura supports files of any size across major browsers (Chrome, Safari, Firefox,

IE 10+).

Upload Media

Drag and drop files to upload

All common video, audio and image formats in all resolutions are accepted.

Select files

The upload process begins.

Keep the browser tab open! Closing or navigating away will cancel any media in the queue or currently uploading.

If multiple files were selected, one file starts the upload process, and the rest of the files are then added to the queue. The queue continues to upload content from bottom to top, skipping any canceled or errored-out media.

4 All Media		Cancel All Uploads Set Privacy To All Edit All
	karate - 1031 (360p) Uploading 100 %	Cancel Upload Private Edit
	sunset - 12332 (540p) Processing	Media Page Private Edit
	wrestling training camp Processing	Media Page Private Edit
	wrestling training Processing	Media Page Private Edit

The status of the upload is indicated on the right of each item as well as the top left of the Upload Media window:

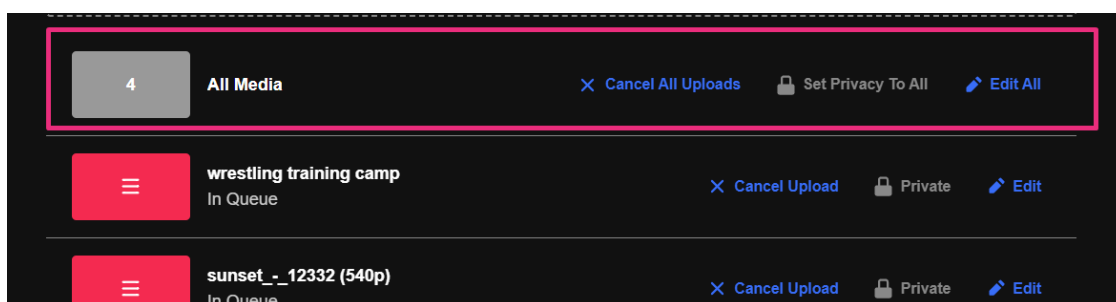

Upload statuses

- **In Queue** - Files waiting their turn to upload. You can cancel these before they start uploading.
- **Uploading** - Displays progress percentage. You can cancel uploads still in progress.
- **Processing** - The file is being converted. The cancel option is no longer available.
- **Ready** - The upload is complete, and the thumbnail is displayed. You'll see a link to the media page.
- **Failed** - Indicates an upload error. These files cannot be edited or canceled.
- **Cancelled** - Previously canceled uploads can be removed from the list.

Bulk actions

At the top of the upload list, you'll find bulk actions for managing multiple files.

- The gray box displays how many files are in the upload list. Entries with the status 'Canceled' or 'Failed' are not counted here.
- **Cancel All Uploads** - Stop all uploads in progress or in the queue. 'Processing' or 'Ready' files are unaffected..
- **Set Privacy to All** - Publish or adjust the privacy status of your entries in bulk.
- **Edit All** - Modify details for multiple media files at once.

Edit your media

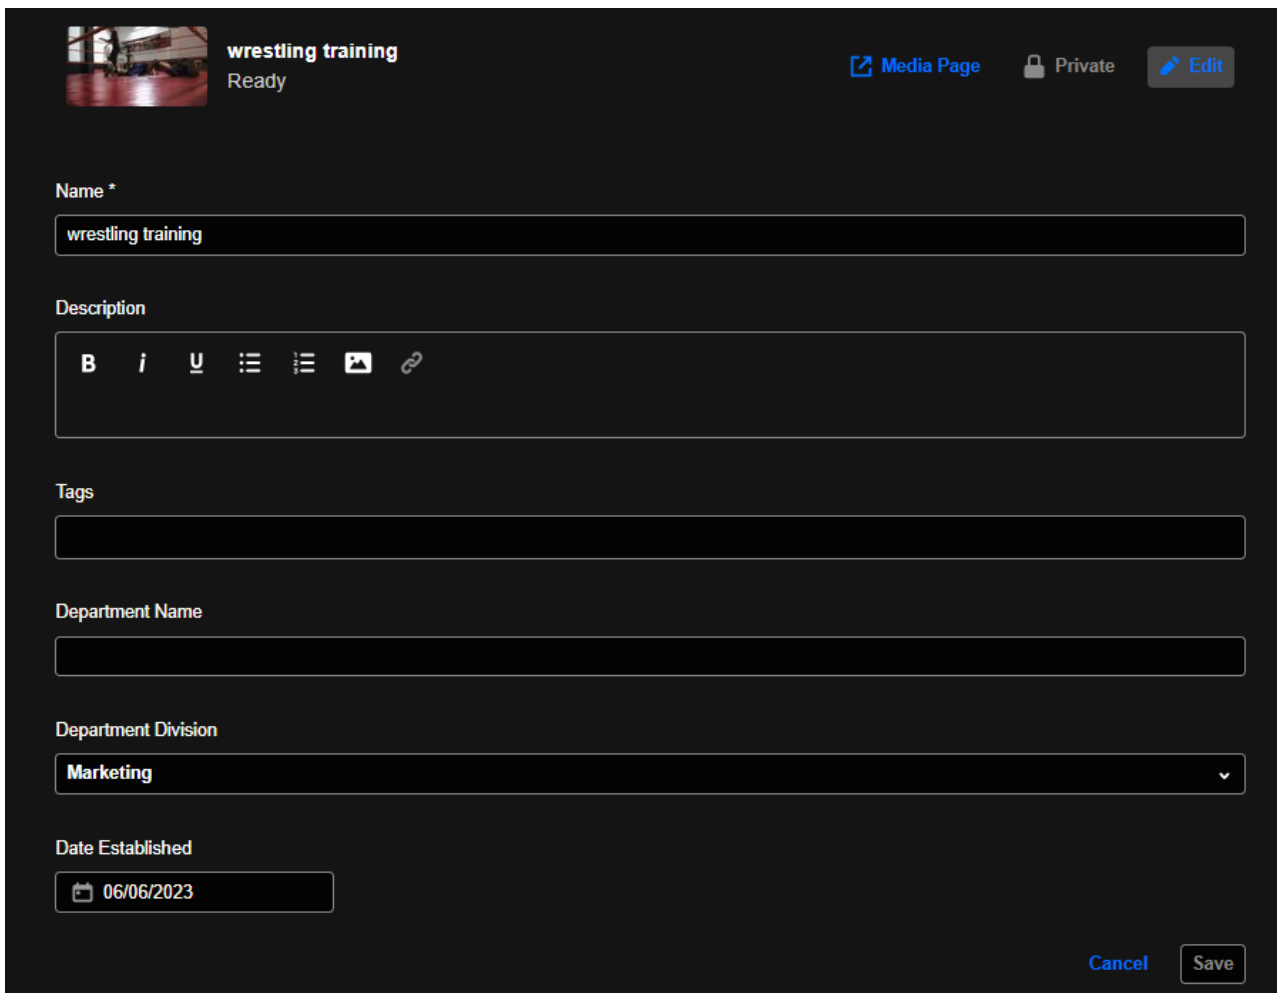

Edit a single media

Click **Edit**.

The edit page displays.

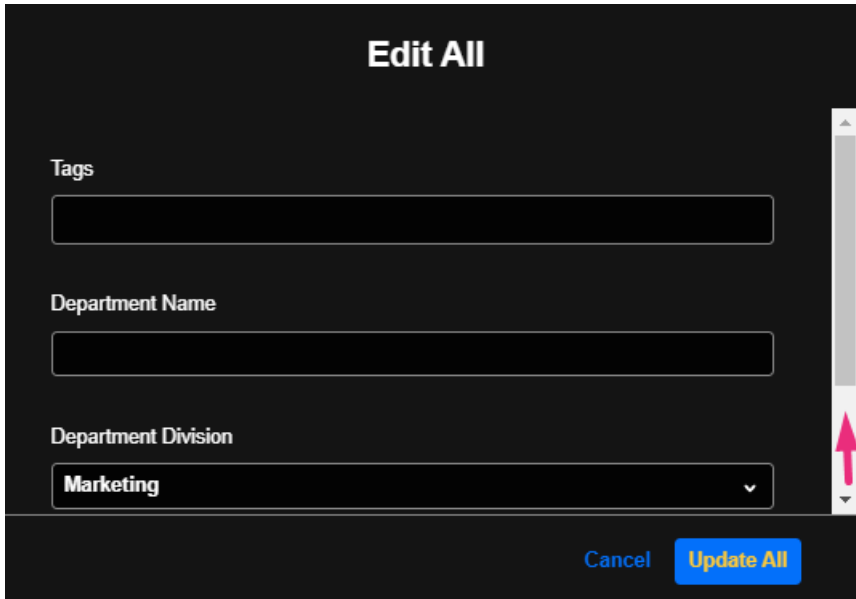

You can edit the title, description, tags, and custom metadata for each uploaded file.

Edit multiple media

Click **Edit All** at the top right.

You can add tags and custom metadata for multiple media at once (don't forget to scroll down).
