

# Kaltura Video Integration with Zoom

Last Modified on 09/21/2020 10:43 pm IDT

## Introducing the Kaltura Video Integration with Zoom

The Kaltura video integration with Zoom enables archiving recordings of Zoom meetings and webinars automatically in Kaltura. Recordings can be mapped to a specific category and the owner becomes the host of the call. Co-hosts can be added as collaborators on the recorded entry. In addition, transcription files and chat transcripts from Zoom are copied to Kaltura and attached to the recording entry.

The Zoom integration is available in the Zoom marketplace and can be found here:

<https://marketplace.zoom.us/apps/VqdWYBqSRg-G6y4GTVMnCQ>.

## Documentation Guides

The following documentation is available:
