Working with the Contributors Dashboard

The Contributors dashboard enables you to discover who your top contributors are and how content is created in your account. To learn more about the Contributors dashboard, see [Contributors Dashboard](#) (<https://knowledge.kaltura.com/help/contributors-analytics-kmc>).

You can use advanced filtering and comparison options to dive deeper into the data and learn more about content contribution trends in your account. In this article, you can review:

- [How to change the time frame for the dashboard](#)
- [How to compare different time periods](#)
- [How to filter the data](#)
- [How to export reports to a CSV file](#)

The filters are automatically applied to all elements of the dashboard.

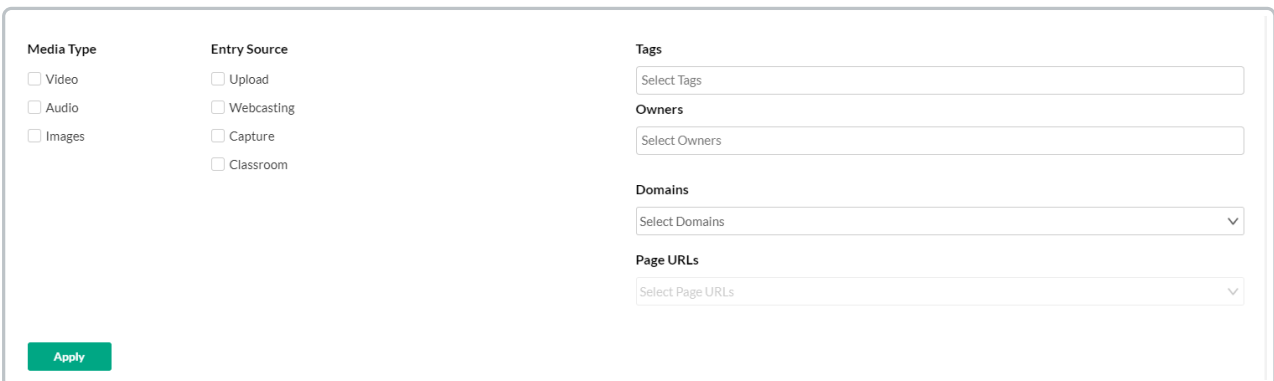

As a reference for analytics terms and definitions, please see the [Advanced Analytics Terminology](#) (<https://knowledge.kaltura.com/help/advanced-analytics-terminology>) article.

Filter the Data

You can filter the data in the dashboard based on additional dimensions such as the location, tags, categories and more.

To filter the dashboard data based on a specific parameter

1. Click on the Filter option to open the Filters pane.
2. Fill in the relevant filters you would like to use.
3. Click Apply to show the filtered data in the dashboard.

The screenshot shows a filter pane with the following sections:

- Media Type**: Video, Audio, Images
- Entry Source**: Upload, Webcasting, Capture, Classroom
- Tags**:
- Owners**:
- Domains**: (dropdown arrow)
- Page URLs**: (dropdown arrow)

An **Apply** button is located at the bottom left of the pane.

The filtering options are:

- Media Type(s) - video, Audio, and/or Images
- Entry Source - the source of the content ingested to the system. Content can be uploaded, created via Kaltura's Capture Suite, live streamed, or created in many other ways.

- Tags - the tags on the content
- Owners - the owners of the content
- Domains/ URL Pages - domains and URLs pages where the video was viewed

Export to CSV

All analytics tabs have the option to Export to a CSV.

Click Export to open the drop-down list and select the data you would like to export. One or more options may be selected.

A notification is sent about the export request status. If the data in the report was filtered, the report is based on the filter applied. You will be notified that your export request is being processed and will be emailed to you when completed. Note that export is limited by the number of records and time to execute. If you receive an error, break down your report into smaller time frames or use filters to reduce the size of the report.

NOTE: The files expire in 7 days.
