

Manage groups in the Configuration Management console

Last Modified on 04/14/2025 2:59 pm IDT

 This article is designated for administrators.

About

Groups are a convenient way to assign access to a large number of users in Kaltura applications. For example, you can create groups and then assign entitlements and collaboration rights. The Manage Groups tab is located in the video portal and [KAF Configuration Management](#) window. Users that were added to a group using the [Samlgroupsync](#) module are recognized as automatically added users within each group.

Using the Manage Groups feature, admins can easily administer groups, add or delete users from groups and perform bulk actions on several groups/users at one time.

You can manage user group assignments in one of two ways:

- Manually - Groups that are created in the [Groups Management Dashboard](#).
- Automatically - Groups that were created via [Samlgroupsync](#) / [SSOGroupSync](#) modules are displayed in the [Group page](#).

Create groups

1. Login to the application Configuration Management window.

MANAGE CONFIGURATION	MANAGE USERS	MANAGE GROUPS	KNOWLEDGE BASE	CLEAR THE CACHE	GO TO SITE
----------------------	--------------	---------------	----------------	-----------------	------------

Configuration Management

2. Click the **Manage Groups** tab.

The [Groups Management Dashboard](#) is displayed.

Groups Management

 Search for Groups

Filters > 0 Groups

[+ Add New Group](#)

[Bulk Actions](#) ▾

<input type="checkbox"/> GROUP NAME	GROUP ID	CREATION DATE ▾	UPDATED DATE	# OF USERS	ACTIONS
-------------------------------------	----------	-----------------	--------------	------------	---------

No Groups

When you create groups, they will appear in here

[Create Your First Group](#)

3. Click **Create Your First Group** or **Add New Group**.

Choose Group Name

Group Name:*

Group ID:*

Add Users:

Type user name

Cancel

Add

4. Enter the Group Name.

Add New Group

Group ID:*

Add Users:

Type user name

Cancel

Add

Creating a Group Name/ID with special characters is not supported. Special

characters include all characters above the numbers (shift+Num) and other languages such as Japanese, Hebrew and Cyrillic.

The Group ID is created automatically from the Group Name.

5. Add users to the group.

Please note that no more than 3,000 users can be added in one batch.

Manage groups

Groups management dashboard

The groups management dashboard displays the following information and actions for each group:

- Group Name
- Group ID
- Creation date
- Updated date
- Number of users in the group
- Actions - The actions include Edit, Add Users, Delete Group

Use the groups management dashboard to:

- [Create/Add groups](#)
- [Perform actions on a single group](#)
- [Perform \(bulk\) actions on multiple groups.](#)
- [Drill down into group details - The Group Dashboard](#)
- [Filter Groups](#)
- [Sort](#) - Sort groups in ascending or descending order - according to their creation date.
- [Search groups](#)

Delete

Perform (Bulk) Actions on Multiple Groups

The Bulk Actions feature allows administrators to add users to multiple groups, or delete groups through the groups Management Dashboard.

In the Groups Management Dashboard, check the boxes next to the groups you want to modify.

Add users to multiple groups

1. In the Groups Management Dashboard, check the boxes next to the groups you want to modify.
2. Select Add Users from the Bulk Actions drop down menu.

Groups Management

Search for Groups

Filters > 3 Groups, 2 Selected

[+ Add New Group](#) [Bulk Actions](#)

<input type="checkbox"/>	GROUP NAME	GROUP ID	CREATION DATE	UPDATED DATE	# OF USERS	
<input checked="" type="checkbox"/>	Human Resources	Human_Resources	16/04/19	17/04/19	2	Add Users Delete
<input checked="" type="checkbox"/>	Marketing	Marketing	15/04/19	16/04/19	3	Add Users Delete
<input type="checkbox"/>	Techpubs	Techpubs	14/04/19	15/04/19	6	Add Users Delete

3. Add users in the Add Users window and click Add.

Add Users

Start typing to search for a user to add.

[Import List of Users](#) 0 users

[Cancel](#) [Add](#)

4. Click **Import List of Users** to add new users to a group in a bulk. You can drop a list of user IDs separated by comma or semicolon.

Import List of Users

Paste a list of user IDs in the form of open text.

The user IDs may be separated by ',' or ';' or a line break. Spaces are not allowed.

Cancel

Verify User IDs

5. Enter the list to import and click Verify User IDs.

Add Users

Start typing to search for a user to add.

☒ Create user if ID not found

0 Existing & 1 Unrecognized Users

Cancel

Add

6. (Optional) Click Create user if the ID is not found.
7. Click Add to bulk import your list to multiple groups.

To delete (multiple) groups

1. In the Groups Management Dashboard, check the boxes next to the groups you want to delete.
2. Select Delete from the Bulk Actions drop down menu.

A delete confirmation message is displayed.

3. Click Delete.

The Group page - User's Table

To view detailed information about the group (User's table) and other parameters

Click on a Group Name on the Groups Management Dashboard.

Groups / **Techpubs** [Back to Groups](#)

Group ID: **Techpubs** | Creation Date: **14/04/2019** | Number of Users: **4**

Search for Users

The Group Dashboard /User's Table contains the following information for each user in the group:

- **User name** - List of users in the group . The User's image is presented if available. If not, the user's initials are displayed. If neither is available, a generic user icon is displayed..
- **User ID**
- **Email address**
- **Application role** - set in the Manage Users tab. You can continue to use roles to create groups, however, the ability to renounce roles for permissions was moved to the Managing Groups tab.
- **Creation mode** - (Indicates whether the user added automatically or manually) See [Creation Mode](#).
- **Actions** - (Trash icon) Click to Remove the User from the group.

Other actions available on the Group Dashboard /User's Table include:

- **Group Name** - The Group Name may be modified, see [Change the Group's Name](#).
- **Search for users.**
 - Filters - see [Group Dashboard / User's Table Filters](#).

- **Link to Back to Groups** to return to the [Groups Management Dashboard](#).
- **Sort** - Users are sorted according to User Name by default. Click on the arrow in the User Name column to change from Ascending to Descending order.

Change the group's name

To change the group's name

1. Hover over the group name. A pencil appears.
2. Click the pencil to edit and to change the name.

Groups / Techpubs 

A text box opens with the group name. Edit the name.

When done, "x" or "v" buttons are displayed to approve or reject the change.

Techpubs

Filter the data

You can filter the groups in the Groups Management dashboard based on:

- A specified time period according to the Creation Date
- A specified time period according to the Updated Date.

To filter the Groups Management Dashboard data

1. Click Filters.

Groups Management

 Search for Groups

Filters ▾

3 Groups

Creation Date	Updated Date
After	After
<input type="text"/>	<input type="text"/>
Before	Before
<input type="text"/>	<input type="text"/>

2. Enter the filtering dates.

The Groups Management Dashboard displays the relevant groups.

You can filter the information in the groups dashboard by :

- User Roles (within the launching application)
- A specified time period according to the Creation Date
- A specified time period according to the Updated Date.

To filter the groups dashboard user's table data

1. Click Filters.
