

Setting a Dedicated Player for a Specific Media Type

This article describes how to set dedicated players for each type of media.

To learn how to setup different player and other capabilities for the BSE (the Browse, Search & Embed tool for KAF tool) see the [best practice guide for upgrading the BSE](#) and [Browse Search and Embed Administrator's Guide](#) .

To set a dedicated player for **Images**:

- Go to the “[Imageentry](#) ” module and make sure it’s on, available, and the player ID is set in the “customPlayerId” field.

To set a dedicated player for **Audio**:

- Go to the “[AudioEntry](#) ” module and make sure it’s on, available, and the player ID is set in the “customPlayerId” field.

To set a dedicated player for **In-Video Quiz**:

- Go to the “[Quiz](#) ” module and make sure it’s on, available, and the player ID is set in the “quizPlayerId” - will reflect on quizzes in any KMS/KAF page.
"BSEPlayerId" - will reflect on the BSE player only (relevant to KAF only).

To set a dedicated player for **webcasts**:

- Go to the “[Kwebcast](#) ” module and make sure it’s on, available, and the player ID is set in the “PlayerUiconfId ” - will reflect on quizzes in any KMS/KAF page.
"BSEPlayerUIConfID" - will reflect on the BSE player only (relevant to KAF only).

If none of the player are set in described flows above, the default KMS/KAF player will be used (located in the [Player](#) module).
