

# Kaltura Express Capture Supported Browsers / Devices

Last Modified on 09/27/2019 1:53 am IDT

## Kaltura Express Capture

The Kaltura express Capture is based on webRTC. To check supported browsers, please visit the [official webRTC page](#).

To test if your browser is supported follow these instructions:

1. Go to <https://webrtc.github.io/samples/src/content/peerconnection/constraints>
  2. Click “Get Media” and click Allow access to your camera.
  3. Wait for the stream. If the stream on the left does not display – the browser you are using is not webRTC compatible.
