Kaltura Express Capture

The Kaltura express Capture is based on webRTC. To check supported browsers, please visit the official webRTC page (https://webrtc.org/).

To test if your browser is supported follow these instructions:

1. Go to https://webrtc.github.io/samples/src/content/peerconnection/constraints
2. Click “Get Media” and click Allow access to your camera.
3. Wait for the stream. If the stream on the left does not display – the browser you are using is not webRTC compatible.
