

Sakai Extension May 2018 Release Notes - v5.1.1

Last Modified on 04/23/2020 11:42 am IDT

Version: 5.1.1

Date Released: May 2018

Highest Sakai Version Support: 12

KAF version: 5.72.10

Overview

In this document you will find all the release notes pertaining Kaltura Video Tool for Sakai. ([Link to download](#))

This release is based on the Kaltura Application Framework (KAF). We recommend that you read the updated [Kaltura Video Tool for Sakai documentation](#).

If you are currently using a previous version of this tool, please contact your Kaltura representative to discuss an upgrade.

- **Gradebook Integration for Video Quizzes (VQ)** (SAK-134) – Kaltura Video Quiz may now be integrated with Sakai. When a user takes a Kaltura quiz, the results will automatically be displayed in the Sakai site’s gradebook . For additional information about the VQ Gradebook integration with Sakai see [here](#). For admin setup, see the [Interactive Video Quiz Sakai Gradebook Integration Deployment Guide](#).
- **Responsive Player via BSE** (SAK-133) – When using the Kaltura button in the HTML editor, the Kaltura video will be embedded in a responsive iFrame. We recommend that you upgrade your BSE player (and other Sakai players) to the latest version via the KMC Universal Studio.

Resolved Issues

Issue	Description	
SAK-132	The CKEditor fails to load if it's in a forum embedded in a lesson.	
SAK-136	Sakai does not load the player into a DropBox HTML page.	

Known Issues & Limitations

Issue	Description
SAK-138	Full screen is not working for Gradebook videos in the lessons. This is due to the Sakai iFrame missing properties for the LTI iframes.(resolved in SAK-29690)
SAK-139	After using the VQ with the Gradebook in the site's lessons, the title cannot be changed. This is a limitation in Sakai and resolved on Sakai 11.4.
SAK-140	When site admin changes the VQ total score in the Gradebook, only new results will be affected, and the submitted score will not change. This is a Sakai limitation.
