Sakai Extension May 2018 Release Notes – v5.1.1

Last Modified on 04/23/2020 11:42 am IDT

Version: 5.1.1

Date Released: May 2018

Highest Sakai Version Support: 12

KAF version: 5.72.10

Overview

In this document you will find all the release notes pertaining Kaltura Video Tool for Sakai. (Link to download)

This release is based on the Kaltura Application Framework (KAF). We recommend that you read the updated Kaltura Video Tool for Sakai documentation.

If you are currently using a previous version of this tool, please contact your Kaltura representative to discuss an upgrade.

- **Gradebook Integration for Video Quizzes (VQ)** (SAK-134) – Kaltura Video Quiz may now be integrated with Sakai. When a user takes a Kaltura quiz, the results will automatically be displayed in the Sakai site's gradebook . For additional information about the VQ Gradebook integration with Sakai see here. For admin setup, see the Interactive Video Quiz Sakai Gradebook Integration Deployment Guide.
- **Responsive Player via BSE** (SAK-133) – When using the Kaltura button in the HTML editor, the Kaltura video will be embedded in a responsive iFrame. We recommend that you upgrade your BSE player (and other Sakai players) to the latest version via the KMC Universal Studio.

Resolved Issues

Issue	Description	
SAK-132	The CKEditor fails to load if it's in a forum embedded in a lesson.	
SAK-136	Sakai does not load the player into a DropBox HTML page.	

Known Issues & Limitations

Issue	Description
SAK-138	Full screen is not working for Gradebook videos in the lessons. This is due to the Sakai iFrame missing properties for the LTI iframes.(resolved in SAK-29690)
SAK-139	After using the VQ with the Gradebook in the site's lessons, the title cannot be changed. This is a limitation in Sakai and resolved on Sakai 11.4.
SAK-140	When site admin changes the VQ total score in the Gradebook, only new results will be affected, and the submitted score will not change. This is a Sakai limitation.
