Version 4.0.3

These release notes pertain to the Kaltura Video Tool for Sakai, released March 2016.

The Kaltura Video Tool for Sakai supports Sakai version 10.x.

Resolved Issues

Issue	Description
SAK-90	The CK editor integration security issue has been resolved.
	Spelling was fixed for "expiration_date" in SQL scripts

Known Issues

Issue	Description
SAK-89	You may not be able to scroll down on some iOS devices when using the Browseandembed(BSE) module.

NOTE: There is a known Sakai issue that causes LTI launches to break on mobile devices. (Ref https://jira.sakaiproject.org/browse/SAK-21129)

To bypass this issue you may do the following:

- **Add the following to sakai.properties: portal.pda.autoredirect=false**
- **Restart the Sakai server.**
- **On your mobile device, enable 3rd party cookies by going to Settings -> Safari -> Block Cookies -> Always Allow.**
